3P omnichannel GMV grew 16.2% in 2Q'25 (R\$1.7 billion), and revenue increased by 15.5% to R\$215 million, driven by efforts to improve profitability and enhance the experience for customers and sellers through a greater number of services offered on our platforms, such as logistics and credit, and complementary assortment to 1P. Selling, General, and Administrative Expenses

R\$ million	Q2'25	Q2'24	%	6M25	6M24	%

Selling, general, and administrative expenses (SG&A) in 2Q'25 were reduced by 2.9%, despite revenue growth and inflation during the period, improving by 210 bps. relative to net revenue (22.8%). The lower expenses in the quarter are mainly explained by a 3.2% reduction in selling expenses and a 1.4% reduction in administrative expenses, with a notable improvement and savings in labor-related costs.

Adjusted EBITDA

In 2Q'25, net financial result was R\$1.1 billion. We believe this is not comparable to 2Q'24, due to the positive impact of R\$637 million related to the debt modification in 2Q'24 and the negative impact of R\$(142) million in 2Q'25. The average CDI rate rose from 10.5% in 2Q'24 to 14.5% in 2Q'25, a 400-bps. increase, being a relevant cause of the variation in financial expenses during the period. It's worth noting that although the interest in debenture financial debt was accounted for in the results, the Company did not disburse cash for interest during the period, due to grace periods provided for in its financial instruments.

EBT was R\$ (864) million in the quarter, not comparable yoy due to the financial result in 2Q'24 being impacted by the debt modification effect. During the period, despite the revenue recovery and gradual improvement in the Company's profitability, the high-interest rate environment led to a net loss of R\$ (555) million, with a net margin of (8.1%) for the quarter.

If we exclude non-recurring factors such as (i) debt modification and (ii) monetary restatements—from the financial result, the net loss in the first half of 2025 would be R\$ (769) million, stable year-over-year, despite the increase in the average CDI rate from 11% to 14% during the period.

¹ Covenant of the 10th Issuance: Net Debt / Adjusted EBITDA up to (3.0x):

"Consolidated Net Debt" refers to the total debt of the Issuer (short- and long-term loans and financing, including debentures, promissory notes, balances of CDCI operations or instruments that may replace them — including, without limitation, credit rights investment funds and securitizations), excluding balances of leasing contract operations, minus the value of cash availability, accounts receivable amounts from credit card sales with a 1.15% discount (including balances of CDCI operations or replacement instruments, if applicable, recorded under Accounts Receivable), and an amount equivalent to the subordinated quotas of the FIDC issuance eventually subscribed by the Issuer. For clarity, supplier risk operations will not be considered debt for the purpose of this Consolidated Net Debt calculation.

(ii) "Consolidated Adjusted EBITDA" is the gross profit, less general, administrative, and selling operating expenses, excluding depreciation and amortization, and including other operational income over the last 4 (four) quarters.

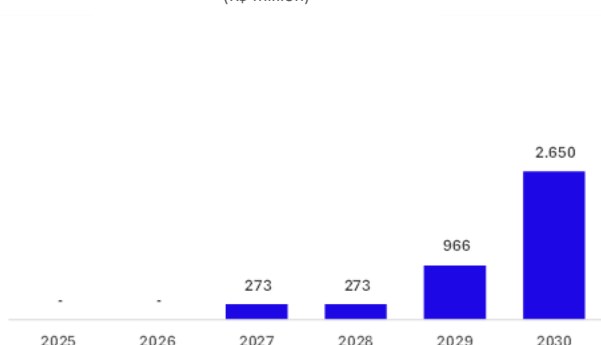

After conversion, gross debt was R\$3.3 billion (excl. CDCI and supplier agreement liabilities), with 78% classified as long-term. In the capital structure, the CDCI liability has a corresponding asset in CDCI and FIDC accounts receivable, both presented in the table above and in the Financial Statements under notes 7 and 15.

After conversion, the Company reported an adjusted net debt of R\$ (290) million, a reduction of R\$ 1.6 billion compared to 1Q'25, and equity of R\$ 3.1 billion. In 2Q'25, cash including undisbursed receivables totaled R\$ 3.0 billion. The financial leverage ratio, measured by net debt/adjusted EBITDA over the last 12 months, stood at (0.1x). According to the methodology of the 10th issuance, it was (0.4x) and remains comfortable compared to the financial covenants required in the debenture of (3.0x). Considering the balance of supplier agreements and CDCI liabilities, the same ratio was (1.1x), with a net debt reduction of approximately R\$ 1 billion vs. 1Q'25, In other words, a 40% reduction.

2Q'25 – Quarter: Free cash flow of +R\$173 million.

The change in working capital, consisting of suppliers and inventory, resulted in a consumption of R\$(200) million in 2Q'25, an impact due to higher supplier payments despite the reduction in inventory.

In Legal Claims, there was a 34% improvement compared to 2Q'24. Focusing solely on labor claims, the savings reached 35%, or R\$ 70 million less.

As a result, we closed 2Q'25 with free cash flow generation for the company of R\$ 173 million. The cash variation was +R\$ 500 million in 2Q'25, explained by improved profitability, working capital movements, and funding activities.

12MTD (last 12 months): Free cash flow of +R\$910 million.

We closed the last 12 months with free cash flow for the company of R\$910 million, compared to R\$871 million in 2Q24 for the last 12 months (the best result in recent years). This mainly reflects the recovery in sales, profitability, operational improvements in losses, labor claims, tax monetization, and improvements from debt restructuring and new financing.
