Rio de Janeiro, August 2, 2023 – PRIO S.A. ("PRIO" or "Company") (B3: PRIO3) presents its results for the second quarter of 2023 ("2Q23"). The financial and operating information described below, unless otherwise stated, is presented on a consolidated basis and in US dollars (US\$), in accordance with International Financial Reporting Standards (IFRS), and includes the Company's direct subsidiaries: Petro Rio O&G Exploração e Produção de Petróleo Ltda., Petro Rio Internacional S.A., and their respective subsidiaries and branches.

### HIGHLIGHTS OF THE QUARTER

Record average production of 91,000 barrels of oil per day

Record Lifting cost of US\$ 7.4/barrel

Start of the ODP5 well, in Frade, allowing PRIO to reach daily production of 100 kbpd

ச

Net revenue of US\$ 532 million (41% increase over 2Q22)

8

Net income (ex-IFRS 16) of US\$ 185 million (32% increase over 2Q22)

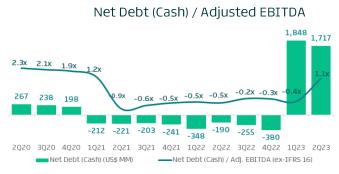

P Ad

Adjusted EBITDA (ex-IFRS 16) of US\$ 333 million (24% increase over 2Q22)

#### **MESSAGE FROM MANAGEMENT**

We are pleased to share the Company's second quarter 2023 results. We reached the new level of production of 100 thousand barrels per day (one of the objectives pursued since the beginning of our operations) with a lifting cost of US\$ 7.4 per barrel, always maintaining the highest standards of safety and respect for society and the environment, demonstrating the efficiency and commitment of our team.

Following the Frade Revitalization Plan, we consolidated the field's daily production at close to 60 thousand barrels per day with the completion, in early July, of another producing well, the ODP5 (F23P3), which added 8 kbpd to our production. We are proud of the results we've achieved. The success of the Frade Revitalization Plan is yet another confirmation of our strategic directive of generating value in mature fields through their revitalization.

During the second quarter, we also focused our efforts on stabilizing the Albacora Leste operations, which is currently producing above 25,000 barrels per day (PRIO's share). We have been striving to improve the condition and integrity of the Forte FPSO, implementing improvements aimed at raising efficiency levels. We can already see the first fruits of our efforts being harvested, with production showing higher levels of efficiency in recent months, although we still have some ways to go before we reach the levels of the Company's other assets.

In view of the significant increase in production in recent months, we are constantly seeking different alternatives to optimize our oil trading. Thus, we have further intensified the "delivered to client" modality, in which the delivery logistics are our responsibility, in order to expand our customer base and achieve better commercial conditions.

In PRIO, we believe that the best protection against the volatility of Brent prices is the improvement of our operating costs. In this sense, we reached an average lifting cost of US\$ 7.4/bbl, the lowest mark since the beginning of our operations. This reduction was driven by the increase in production in Frade, the normalization of production in the Polvo and TBMT Cluster and the stabilization of production and costs in Albacora Leste.

As part of our strategy to identify capital allocation opportunities, throughout the second quarter of 2023, we ramped up our share buybacks, totaling in 2023 the repurchase of approximately 12 million shares at an average price of R\$ 34.81. This initiative demonstrates our commitment to generating value for our shareholders, while maintaining a healthy capital structure, with low leverage, adequate cash position while being ready for future M&A opportunities.

PRIO believes in a strong alignment between carbon footprint reduction and increased efficiency, asset consolidation and lengthening the life of the fields, obtaining on 2Q23, a reduction in its emissions, with an average of 21 kgCO $_2$ e/boe while this average in 4Q22 was 22 kgCO $_2$ e/boe (and would have been 17 kgCO $_2$ e/boe excluding the effects of the Albacora Leste acquisition). We also continue to encourage and engage our employees on topics related to the environment, safety and social responsibility. For this reason, in the second quarter of 2023, we held a sustainability week to raise awareness among our employees about environmental and sustainable impacts, as well as the health and safety month, carrying out various dynamics to raise awareness about safety at work.

We also believe that the success of a company goes beyond financial results and that we must act in a sustainable way. As such, we have further strengthened our presence in sponsoring musicals, plays, social projects and the paralympic team, PRIO Environmental Education Project (PEA), Favela Brass, Instituto Todos na Luta, among others, in order to support and benefit the communities in which we operate.

Internally, we intensified our successful health and wellness program, offering several options of programs aimed at the personal care of our employees and we are starting a new and extensive training cycle, aimed at training new leaders within the PRIO corporate culture.

Finally, we thank again all our employees for their dedication and drive, our investors, and society in general for their continued support. We are confident that we will reach new milestones and continue to drive forward PRIO's success.

#### **OPERATING PERFORMANCE**

	2Q22	3	3Q22		4Q22	:	LQ23	2	2Q23	2Q23 X 2Q22	2Q23 X 1Q23

Total PRIO	33,304		45,766		47,621		61,039	9	91,094	173.5%	49.2%
			Lifti	ng	Cost (US	/bl	ol)				
PRIO	11.1		9.5		8.6		9.5		7.4	-33.8%	-22.7%

The main operational highlights of the quarter are: (i) The Company's average production, which exceeded 91 kbpd, an increase of 174% compared to the same quarter of last year; (ii) the volume of offtakes in the quarter, representing an increase of 114% compared to 2Q22; and (iii) the lifting cost presenting a reduction of approximately 23% and 34% when compared to 1Q23 and 2Q22, respectively.

The volume produced in **Frade** increased 244% over 2Q22 and 50% compared to the previous quarter. The increase is mainly explained by the stabilization of production at the MUP5 well which started production in March and the start of production at the N5P2 well, in April. Both wells are the result of the **Frade** Revitalization Plan.

In the **Polvo and TBMT** cluster, the volume produced in the quarter was 41% higher than recorded in the prior quarter, due to the maintenance shutdown of the cluster in March, which impacted the 1Q23 production.

In the quarter, PRIO sold 7.1 million barrels, of which 4.1 million from the **Frade** Field, 1.6 million from **Polvo and TBMT** cluster, and 1.4 million from **Albacora Leste** Field. The average gross sales price was US\$ 77.67, 28% lower than 2Q22, mainly due to the decrease in Brent Prices.

Since the beginning of the Company's operations, which consolidated its growth strategy through the acquisition and development of production assets, PRIO has been working to increase its production levels and rationalize its costs, always maintaining excellence levels in environmental responsibility, safety and operation efficiency. PRIO believes that the best protection against Brent volatility is the reduction of its lifting cost, and this will continue to be a pillar for current and future projects. The Company presents the evolution of its lifting cost since 2Q17 below.

## **Lifting Cost PRIO**

(US\$/bbl)

The consolidated lifting cost presented in 2Q23 represents the lowest since the beginning of the Company's operations. This reduction is due to: (i) increased production in the **Frade** field; (ii) normalization in the production of the **Polvo and TBMT** cluster, and (ii) stabilization of OPEX and production of the **Albacora Leste** field.

In 2Q23, the Company sold 7.1 million barrels, an increase of 114% compared to 2Q22.

Considering the significant increase in the Company's production, PRIO search, different alternatives to optimize oil trading and obtain better discount conditions. Thus, an increasing part of the sales were carried out in the "delivery to client" modality (5.0 million barrels), in which the delivery logistics is PRIO's responsibility, aimed at expanding the Company's customer base.

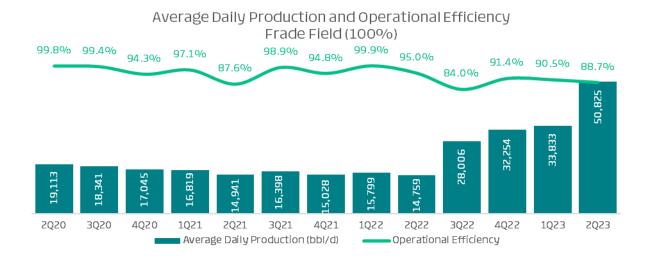

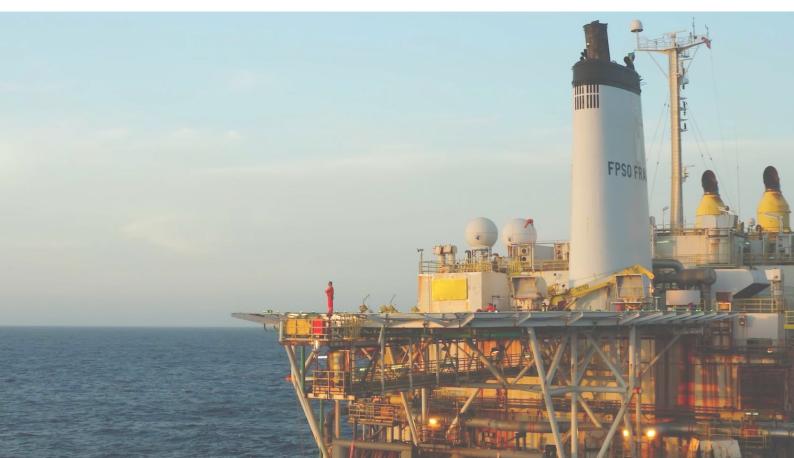

## FRADE FIELD

The field's average production in the quarter was 50.8 kbpd, an increase of about 50% over the previous quarter. This increase is due to the MUP5 well (F23P1) which started in March, adding 8 kbpd to the field's production and the start of the N5P2 well (F23P2), adding about 11 kbpd to field's production.

The asset's operational efficiency in the quarter was impacted by: (i) a 3-day scheduled maintenance shutdown in early May, and (ii) the MUP3A well, which started its workover and is undergoing necessary adjustments, which have not yet been concluded.

In addition, in July, the fifth producing well of The **Frade** Revitalization Plan was implemented, the ODP5 well (F23P3), with initial stabilized production of approximately of 8,000 barrels per day. The ODP5 is the first well of the third phase of **Frade's** Redevelopment Campaign and is positioned in the same reservoir as the ODP4 well, the first producing well of the Campaign.

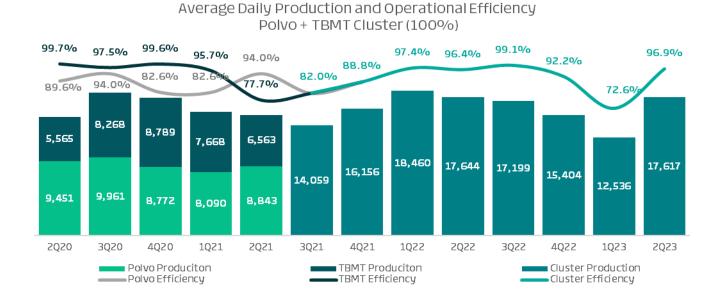

## POLVO AND TBMT CLUSTER

In 2Q23, the Polvo and TBMT cluster presented an average daily production 41% higher than in the previous quarter. This increase can be explained by: (i) the scheduled maintenance shutdown of 8 days in March, which affected the asset's production averages and operating efficiency on 1Q23, and (ii) the shutdowns in the TBMT-4H and TBMT-8H wells, which resumed production in March and April, respectively.

The operatiing efficiency of the cluster for the quarter was approximately 97%. The chart below illustrates field production and efficiency as of 2Q20:

In 1Q23, PRIO acquired Dommo Energia S.A. ("Dommo"), which was entitled to 5% of the revenue from the Polvo and **Tubarão Martelo** cluster. Thus, PRIO is now entitled to 100% of the cluster's revenue.

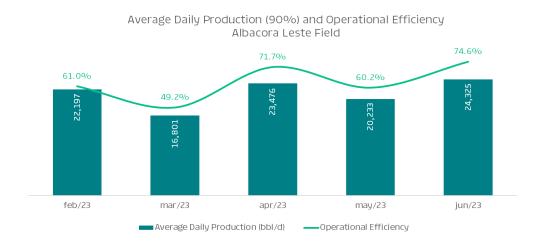

## **TOTAL**ALBACORA LESTE FIELD

In the quarter, **Albacora Leste** Field had an average daily production of about 23 thousand barrels per day (PRIO's share) and operational efficiency of 68.8% vs 54.8% in 1Q23, improving but still impacted by issues in the generation, gas compression and water injection systems, and by a scheduled shutdown in May for corrective maintenance in the FPSO's cooling and power generation systems.

PRIO is working on the corrective maintenance and replacement of several pieces of equipment in the operational unit that were faulty, focused on improving the reliability, integrity and operational efficiency of the asset.

## **WAHOO FIELD**

On June 17 and July 8, 2021, PRIO announced the closing of acquisitions of 35.7% and 28.6% interests in the **Wahoo** Field, respectively.

With the transactions, PRIO currently holds 64.3% of the Field, and aims to create a second production cluster through the tieback from **Wahoo** to **Frade**, thus continuing the strategy of operational optimization of its assets. The first **Wahoo** oil is planned for early 2024.

**Wahoo**, with oil discovery in 2008 and formation test performed in 2010, has the potential to produce approximately 126 million 1P barrels (100% of the field), according to the DeGolyer & MacNaughton ("D&M") Reserve Certification Report. The Company estimated an initial average productivity of approximately 10,000 barrels per day per well, and a total production that will reach 40,000 barrels per day, according to the results of the formation test performed in an exploratory well.

The **Wahoo** base project covers the drilling of four production wells and two injection wells, as well as the connection of these wells to the 35km tieback between the field and FPSO **Valente**. The initially estimated CAPEX for the whole project is broken down into US\$ 330 million for the tieback, US\$ 310 million for well drilling and completion, US\$ 150 million for subsea equipment and US\$ 40 million for adjustments to the **Valente** FPSO to receive the production of new field.

On December 22, 2021, PRIO filed the Declaration of Commerciality of the **Wahoo** discovery (located in Block C-M-101) and the Development Plan under an exclusive operation regime with the ANP, which on May 25, 2023, was approved.

Therefore, in the second quarter of 2023, PRIO kept focused on completing the acquisition of equipment necessary for the project, reinforcing the expediting of the manufacturing, import and delivery processes, in-depth technical reviews of the flow analysis and tieback specifications, as well as on establishing the project assumptions to the scopes of wells, topside and subsea, aiming to comply with the schedule of the first **Wahoo** oil in the first semester of 2024.

Finally, the next steps in **Wahoo's** development are as follows:

- 1) Approval of the environmental licensing for drilling and production in the **Wahoo** Field;
- 2) Beginning of the drilling campaign;
- 3) Beginning of preparation activities for subsea launching and construction;
- 4) Subsea construction of interconnection between the **Wahoo** field and the FPSO Valente;
- 5) 1st **Wahoo** oil.

## **ENVIROMENT AND SOCIAL**

PRIO believes in the alignment between the reduction of the carbon footprint and its operational strategy. Therefore, throughout 2023, it has been making efforts to obtain a significant reduction in its emissions<sup>1</sup>. PRIO's average relative emissions of 2Q23<sup>2</sup> was 21 kgCO<sub>2</sub>e/boe, while this average in 4Q22 was 22 kgCO<sub>2</sub>e/boe (and would have been 17 kgCO<sub>2</sub>e/boe excluding the effects of the Albacora Leste acquisition). This reduction is due to a series of improvements that the Company has been making to its assets in order to improve the efficiency of its facilities.

On the social front, in May, PRIO launched the TAC Frade <u>website</u>, where it is possible to access all the information, results, news and agendas of the more than 80 projects carried out under the responsibility of PRIO. During 2023, some achievements stand out, such as:

- The Arraial do Cabo Marine Extractive Reserve (RESEX Arraial), after 26 years, will have its own headquarters with a visitor center, accommodation and exhibition space, strengthening ICMBio's monitoring and presence in the municipality;
- Representatives of six initiatives of the Mangrove Conservation projects gathered at the 2nd Seminar of the Marine Research Project, strengthening partnerships and exchanging knowledge for the protection of this ecosystem that is so important for biodiversity and extractive communities;
- Start of projects to promote mariculture that will promote the sustainable development of this activity in the state of Rio de Janeiro, through regularization, diversification and development of technologies.

In 2023, the Annual Forum of the PEA Rede Observation (PRIO's Environmental Education Project) took place, which covers 11 municipalities in the Campos Basin and works with training processes with social groups of artisanal fishermen, shellfish gatherers, family farmers and quilombolas. The Forum had more than 200 participants.

PRIO believes that it has a great commitment to society, always seeking to contribute actively. In this way, the Company seeks to raise awareness and engage its employees in issues related to sustainability and safety. Therefore, in the second quarter of 2023, PRIO held a sustainability week aimed at making employees aware of the Company's and the sector's environmental data, as well as reinforcing the topics considered material for the Company. During the sustainability week, topics on food safety were also addressed, in line with what was proposed by the Hortas Project, and on conscious consumption and ways to reduce waste generation. Finally, the sustainability week also promoted a visit to Boto Cinza Project, where employees were able to observe the animal in its natural habitat and exchange experiences with the quilombolas of Ilha da Marambia.

<sup>&</sup>lt;sup>1</sup> Scope 1 and 2 emissions

<sup>&</sup>lt;sup>2</sup> The 2023 information refers to the partial inventory, which is not yet certified and may change slightly.

# **ENVIROMENT AND SOCIAL**

The Company believes that the safety of its employees is the highest priority in all activities. To foster employee engagement, PRIO promoted in April, the World Health and Safety Month, an immersion through activities, lectures and dynamics, to issues related to safety at work in order to raise awareness among onshore and offshore employees about the relevance of the theme.

PRIO stands out for its Health and Wellness program, offering a variety of activities and encouraging employee participation. Each quarter, even more options are offered, including running (Night Run), volleyball training and championships, PRIO Trekking (group hikes on the trails of Rio de Janeiro), PRIO Zen Outdoor (outdoor meditation), Canoa Havaiana (canoeing classes), stretching and physiotherapy sessions, meditation and yoga classes and shiatsu sessions. The company also values mental and nutritional health, providing telenutrition and online psychology services. All of this demonstrates PRIO's commitment to the integral well-being of its staff.

The company also supports projects through tax incentives or direct contributions. In 2Q23, PRIO invested in cultural sponsorships such as awards (PRIO do Humor), musicals and plays (Mamma Mia, Gargalhada Selvagem and O Astronauta) and conferences (Fronteiras do Pensamento). Additionally, the Company also invested in sports projects, sponsoring the Paralympic team and social projects such as Squashinhos and Zoé NGO.

#### **FINANCIAL PERFORMANCE**

PRIO presents the financial performance with and without the impact of the changes in IFRS 16 below, as well as representations of non-cash and non-recurring accounting entries and their impacts on the financial statements when presented in Dollars.

In 2Q23, PRIO reported net revenue of \$532 million, representing an increase of 41% vs 2Q22, and Adjusted EBITDA (ex-IFRS-16) of \$333 million, an increase of 24% when compared to 2Q22. This growth reflects the increase in production and sales, which grew 174% and 114%, respectively, compared to the same quarter of the previous year. However, approximately 2 million barrels that were produced in 2Q23, were sold in early July, impacting the revenue recorded in this quarter.

Analyzing the quarterly revenue, the **Frade** field accounted for 58.2% of total revenue, since it is currently the Company's largest producing field. The **Polvo + TBMT** cluster was responsible for 21.4% of revenues.

The **Albacora Leste** field, was responsible for 20.4% of revenues. The chart below shows the representativeness of each asset in the Company's total net revenue:

It is important to note that the quarter was affected by commercialization expenses, corresponding to freight, storage, and shuttle tanker costs, and export sales taxes, since 100% of sales in 2Q23 were impacted by the tax on oil exports.

The Cost of Goods Sold ("COGS") totaled \$54 million in the quarter, 14% below the amount registered in the same period of previous year, demonstrating the Company's commitment to operational efficiency and cost reduction.

The Company recognized an Operating Income (ex-IFRS 16) of \$350 million, 24% higher than that recorded in 2Q22, due to the higher revenues generated by higher production carried out in 2Q23 and costs reduction.

General and administrative expenses, including M&A expenses, personnel, projects, geology, and geophysics, totaled \$17 million in the period, 25% higher than that recorded in 2Q22, due to the increase of third-party services expenses and exchange rate variation, since a large part of the expenditure recorded is in Brazilian real.

Other operating income and expenses totaled negative US\$ 1.5 million in the quarter, impacted by arbitrage fees.

The Company recorded adjusted EBITDA (ex-IFRS 16) of US\$ 333 million, 24% higher than in 2Q22, driven by the significant growth in operating income. The EBITDA margin was 74%.

The Company's financial result (ex-IFRS 16) was negative US\$ 63 million vs. negative US\$ 35 million recorded in 2Q22, negatively impacted by interest on loans and financing considering the higher debt position in 2Q23, reduction in financial income as a result of the lower cash position and premium payments due to the contracting of Brent hedges.

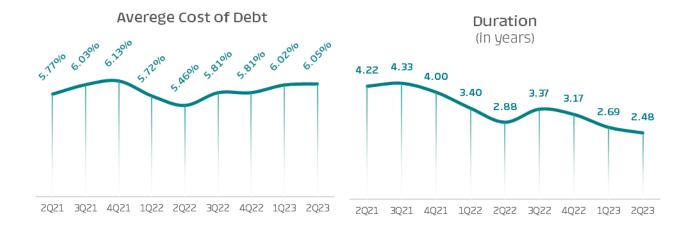

Net income (ex-IFRS 16) for the period was positive by US\$ 184 million, 32% higher than 2Q22, reflecting the increase in the Company's production and sales.

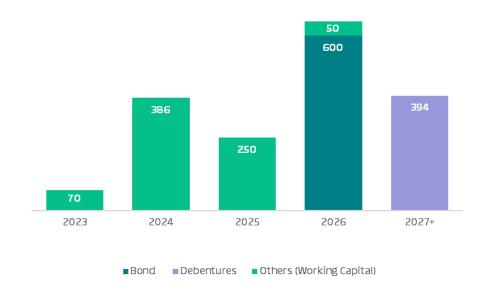

#### **CASH, DEBT AND FINANCING**

In the second quarter of 2023, the average cost of the Company's debt was 6.05% with a duration of 2.48 years. PRIO maintains the cost and duration of debt at levels considered appropriate by the Company and continues to monitor the domestic and international market seeking opportunities in order to maintain its robust capital structure.

### **Amortization schedule**

(US\$ million)

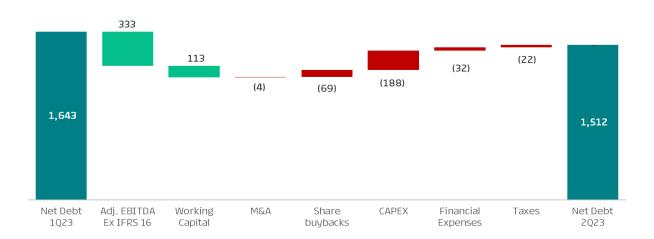

## CASH VARIATIONS

In the second quarter of 2023, PRIO's net debt decreased by approximately US\$ 131 million compared to 1Q23, explained by the following changes:

- Working Capital: working capital was impacted by cash inflows due to receivables at the end of 1Q23, and higher inventories at the end of 2Q23
- **CAPEX:** mostly disbursements for Wahoo's development, followed by drilling in Frade and Albacora Leste's integrity expenditures

### **Changes in Net Debt**

(US\$ MM)

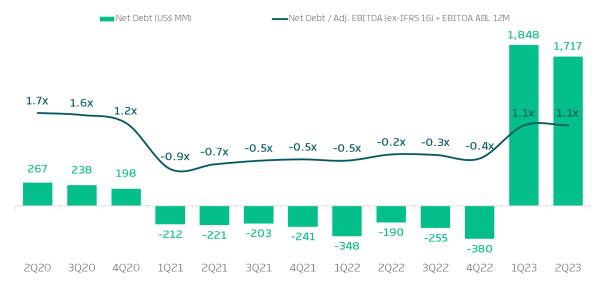

## LEVERAGE

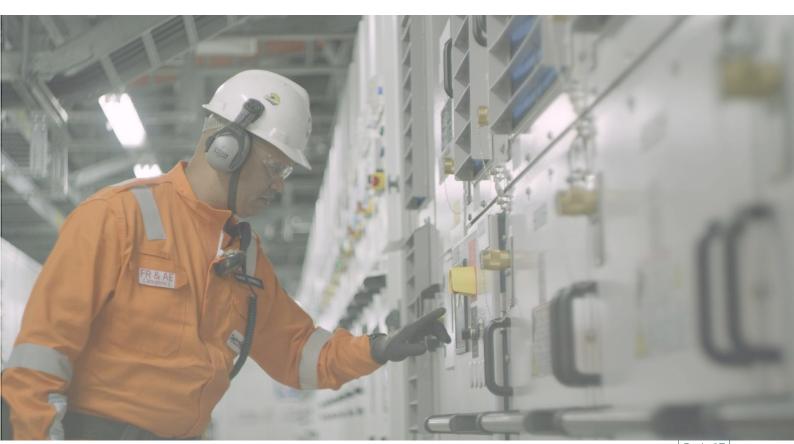

In 2Q23, the Company ramped up its share buybacks, aiming to add value to its shareholders. Thus, it paid approximately US\$ 69 million related to the acquisition of approximately 10 million shares. Capex also accelerated, mainly for the Wahoo and Albacora Leste fields. As a result, the Company ended the second quarter of 2023 in a net debt position, as shown in the chart below.

The leverage ratio was calculated in accordance with the covenants established in the bond and debentures issuances, and therefore possible earn-out payments related to the acquisition of **Albacora Leste** were considered, as well as an estimate of the adjusted EBITDA generated by the asset from July 1, 2022 to January 26, 2023,.

## Net Debt / Adjusted EBITDA (ex-IFRS 16)

Page 17

The Company incorporated the rule change provided for in IFRS 16 on January 1, 2019. The change unifies the treatment of operating and finance leases, significantly impacting the Company's balance sheet, mainly through the chartering of support vessels used in operations, which represents the largest lease agreement:

Right-of-use assets	Balance
Support Vessels	1,234,873
Helicopters	204,677
Buildings/Support Bases	119,304
Equipment	155,931
Total	1,714,785

As announced on February 2, 2020, the Company acquired the FPSO Bravo, which is used in the production system of the Polvo and Tubarão Martelo fields, in place of the FPSO that was chartered and used before the tieback project between the two fields was completed. The dollar-denominated contracts in force since the beginning were discounted at rates of 5.63% p.a., recalculated to 5.90% p.a. when the economic life of the Polvo Field was increased. The contracts in reais are discounted at the rate of 10% p.a.. In the vessel contract that entered in 2020, in dollars, the discount rate used was 8.95% p.a., and in two contracts that entered in the first quarter of 2022, the dollar portion used the rate of 4.45% p.a., and the real portion, CDI+2.05% p.a., average of the loans contracted in the period. Additionally, a new contract in dollars was included for aircraft chartering using the rate of 6.93% p.a.

#### **About PRIO**

PRIO is the largest independent oil and natural gas production company in Brazil. The Company's corporate culture seeks to increase production through the acquisition of new production assets, redevelopment, greater operational efficiency and reduction of production costs and corporate expenses. Its main objective is to create value for its shareholders by means of high financial discipline and preserving its liquidity, with full respect for safety and the environment. For more information, access the website: <a href="https://www.prio3.com.br">www.prio3.com.br</a>.

#### **Legal Notice**

All statements, except those relating to historical facts contained herein, are forward-looking statements, including, but not limited to, statements about drilling plans and seismic acquisitions, operating costs, equipment acquisition, expected oil discoveries, the quality of the oil we hope to produce and our other plans and objectives. Readers can identify many of said statements by reading words such as "estimates", "believes", "expects" and "will" and similar words or denials thereof. Although management believes that the expectations represented in such statements are reasonable, it cannot assure that such expectations will happen. By their nature, forward-looking statements require us to make assumptions and, as such, such statements are subject to inherent risks and uncertainties. Readers of this document are cautioned not to place undue reliance on our forward-looking statements considering that certain factors could cause results, conditions, actions or events that could materially differ from the plans, expectations, estimates or intentions expressed in the forward-looking statements and the assumptions that support them. The forward-looking statements herein are based on the assumption that our plans and operations will not be affected by such risks, but that if our plans and operations are affected by said risks, the forward-looking statements may become inaccurate. The forward-looking statements included herein are expressly fully qualified by this legal notice. Such statements were made as of the date of this document. We do not undertake to update such forward-looking statements, except as required by applicable securities laws.
