### Key:

- (1) At the Polvo and Tubarão Martelo cluster, the workover of TBMT-6H well was completed on September 15, and the well returned to production.
- (2) At the Albacora Leste field, production was impacted by a compressor failure, with normalization expected in October.
- (3) At the Peregrino field, production was temporarily affected by the FPSO shutdown following an ANP audit, as disclosed in the Material Fact dated August 18, 2025. PRIO, as a consortium partner and future operator, continues to support Equinor (the current operator of the field) in meeting the regulatory requirements, for the resumption of production in the coming days.
