Key:

- (1) Production at the Albacora Leste field was impacted by a failure in the gas compression system, which lacks adequate redundancy, that is expected to be resolved in the first half of December with the arrival of long-lead items purchased abroad.
- (2) The figures refers to PRIO's 80% stake in Peregrino, considering production throughout the month. As the closing of the acquisition of the additional 40% and operation happened on November 11, 2025, the field contributed proportionally with 68,783 barrels per day in November.

About PRIO

PRIO is the largest independent oil and gas Company in Brazil. The Company seeks to increase production through the acquisition of new producing assets, redevelopment, increased operational efficiency and rationalization of operating costs and corporate expenses. PetroRio's main objective is to create value for its shareholders with growing financial discipline and preserving its liquidity, with full respect for safety and the environment.
