Eldorado do Sul, RS, May 14, 2025

A Dimed S.A. Distribuidora de Medicamentos (B3 S.A. - BRASIL, BOLSA, BALCÃO: PNVL3), one of Brazil's leading pharmaceutical retailers announces its results for the first quarter of 2025 (1Q25). The Company's financial statements are presented in Brazilian reais (R\$), prepared in accordance with Brazilian corporate law and International Financial Reporting Standards (IFRS). Comparisons of 1Q25 results are made against 1Q24, unless otherwise noted. For comparability purposes with previous periods, figures presented in this report comply with IAS 17/CPC 06. All financial figures mentioned herein are denominated in Brazilian reais (R\$).

Legal Disclaimer: The statements contained in this document regarding business outlook, projections of operational and financial results, and growth expectations for the Panvel Group are merely projections and, as such, are based exclusively on Management's expectations about the future of the business. These expectations depend substantially on market conditions, legislation, the performance of the Brazilian economy, the sector, and international markets, and are therefore subject to change without prior notice.

A MESSAGE FROM MANAGEMENT

After concluding a year marked by significant challenges, such as the floods in Rio Grande do Sul, but also by major achievements and historical record results, **we started 2025 with strength**, delivering robust performance fully aligned with the company's strategic expectations.

Retail sales once again showed remarkable growth, reaching Gross Revenue of R\$ 1.35 billion, an increase of 15.9% compared to the same period last year. Solid growth of 11.8% in Same Store Sales (SSS) and 9.8% in Mature Store Sales (MSSS) underscores operational consistency and the effectiveness of our productivity-focused initiatives.

Panvel's sales grew 15.9% in the first quarter of 2025, driven by strong performance in same-store and mature-store sales.

During 1Q25, our average monthly revenue per store reached R\$705 thousand, growing 9.9% compared to 1Q24. When considering only March 2025, average sales reached R\$751 thousand per store/month. Additionally, the expansion of our store network remains healthy and aligned with our annual plan. In the first quarter, we opened 8 new stores, **ending the period with 639 operational stores**. We recognize that strong growth in mature stores, combined with the performance of new openings, have been key drivers behind Panvel's productivity gains.

Digital maintains a strong growth pace in 1Q25 (+35.3% compared to 1Q24), reinforcing Panvel's position as a benchmark in pharmaceutical retail.

All the elements mentioned have consolidated our market position even further. In the quarter, we reached a 12.8% market share in the Southern Region, an increase of 0.5 p.p. compared to the same period last year, with consistent gains across all states.

Digital channels, one of Panvel's main competitive advantages, continues to demonstrate remarkable growth, accounting for 22.5% of total retail revenue, with impressive expansion of 35.3% compared to 1Q24. This channel remains a core pillar for customer loyalty and close relationship-building, reinforcing our leadership in omnichannel services and innovation. Featuring modern and personalized channels alongside rapid delivery, we maintain our focus on service excellence, convenience, and customer experience personalization. The digitalization of our customers and employees continues to evolve steadily, remaining one of the main pillars of our loyalty and recurrence strategy.

We also highlight the excellent performance of **Panvel's Private Label Products, our own brand, which grew an expressive 25.1% in the quarter**, reaching a 7.8% share of total Retail sales. This performance, despite all impacts caused by the floods in 2024, reinforces Panvel as the benchmark for Private Label in Brazil.

Panvel's Private Label achieved expressive growth of 25.1%. These products offer superior profitability and strengthen customer loyalty.

Growth in sales was also accompanied by improvement in profitability. Our Adjusted EBITDA reached R\$ 64.6 million in 1Q25, an increase of 7.2% compared to 1Q24, representing a margin of 4.8% of Gross Revenue (+0.2 p.p. vs. 1Q24). This expansion is the result of productivity gains at the store level (Retail EBITDA), which totaled R\$ 132.9 million, growing 18.6% compared to 2024. Adjusted Net Income for 1Q25 reached R\$ 27.8 million, equivalent to a Net Margin of 2.1% (+0.1 p.p. vs. 1Q24). It's important to highlight that this earnings growth was achieved against a particularly strong comparative base, as in 1Q24 we executed the sale of an asset from one of our controlled companies (Dimesul), which positively impacted the results in that period.

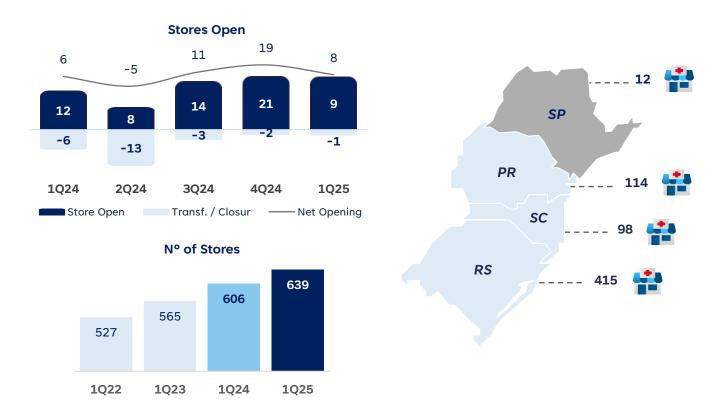

Finally, we were able to grow our sales, results, and investments in a sustainable manner, generating positive free cash flow of R\$14.4 million in the period. Historically, the first quarter is typically marked by cash consumption. Through our initiatives, we reversed this trend and delivered a solid balance sheet with a low level of leverage.

STORES PORTFOLIO

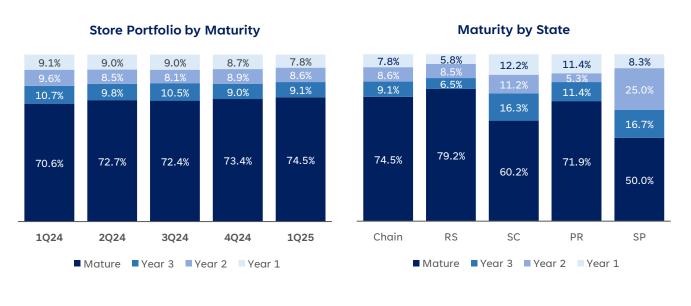

In 1Q25, we opened 9 new stores, 7 of which are located in Rio Grande do Sul and 2 in Paraná, reaching a total of 639 stores in operation. Over the past 12 months, we opened a total of 52 stores.

During the period, we relocated one mature store to a location with higher sales potential. Store relocation is a strategic tool that optimizes the use of our assets, freeing up resources and enhancing the returns on our investments.

The pace of expansion remains aligned with the company's strategy of increasing density in Brazil's Southern Region, particularly in areas outside capital cities, combined with enhanced service capacity through digital channels.

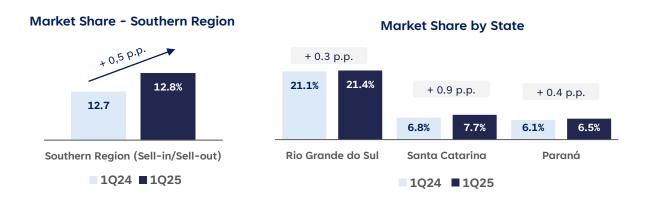

At the end of the period, the Company had 25.5% of stores undergoing maturation and 74.5% of mature stores.

MARKET SHARE

In 1Q25, Panvel outperformed the market, **reaching a market share of 12.8% in the Southern Region**, an increase of 0.5 p.p. compared to the same period last year, with gains across all states. The highlight was again the state of Santa Catarina, where we expanded our market share by +0.9 p.p. versus 1Q24, achieving a 7.7% share. In Paraná and Rio Grande do Sul, we recorded gains of +0.4 p.p. and +0.3 p.p., respectively.

Additionally, according to IQVIA, Panvel's sales performance significantly surpassed all competitor groups in the Southern region, as illustrated in the chart below:

In the product category analysis, the Medicines segment reached a market share of 11.8%, an increase of 0.5 p.p. compared to 1Q24, with growth across all states in the Southern region. The highlight was the Branded Medicines category, which gained 0.6 p.p. year over year, followed by Generics, with a 0.5 p.p. increase.

It is worth highlighting the market share gain in the Beauty and Personal Care category, which increased by 0.4 p.p., reaching 15.2% in the South Region. This performance reflects Panvel's strong results in the category, driven in part by the growth of Panvel's private label products.

E-COMMERCE AND DIGITAL INITIATIVES

Panvel's digital channels continued on a growth trajectory in 1Q25, reinforcing the strategic role of Digital within our operations and contributing to an increasingly integrated and customer-centric journey.

During the quarter, Digital channel sales accounted for 22.5% of total retail gross revenue, representing a 35.3% increase compared to 1Q24, maintaining the consistent growth trend observed in recent periods. This performance reflects the maturity of our digital ecosystem and the efficiency of our rapid delivery structure, one of the key pillars of our business model.

At Panvel, we offer a seamless and truly omnichannel experience across all our non-physical channels, such as the app, website, marketplace, phone service, and social commerce, reinforcing our commitment to innovation and excellence in customer experience.

In 2025, we continue to move forward with strategic initiatives focused on further enhancing the digital journey. Among the year's priorities are improvements to the shopping experience on the app and website, with enhancements in navigation and usability, as well as the expansion of customer service via WhatsApp — now supported by artificial intelligence features for order tracking, product availability inquiries, and automated pharmaceutical assistance, delivering an even more personalized experience. On the operational front, we remain committed to optimizing our last-mile structure, with initiatives aimed at reducing delivery times and expanding our distribution network's reach.

Still within the scope of our digital initiatives, the Panvel Ads platform is gaining traction as a value-generating driver. Already ranked among the Top 10 Retail Media platforms in Brazil, the solution operates on a self-service model and will be integrated with screens in at least 100 physical stores by the end of 2025, connecting the digital ecosystem with physical points of sale and expanding opportunities for brand and product activation throughout the customer journey.

Another highlight was the strong performance of the App channel, which grew 37.1% in 1Q25 compared to 1Q24. This robust growth not only accelerated customer acquisition and loyalty but also played a key role in maintaining our high market share in the online pharmaceutical retail segment. In 1Q25, Panvel reached a 28.3% market share in the South region in E-commerce Farma.

TECHNOLOGY AND INNOVATION

Panvel remains steadfast in its strategy of innovation and leadership in the pharmaceutical retail sector. Every day, the Company reaps more benefits from its investments in technology-driven solutions aimed at enhancing customer experience, increasing operational efficiency, and strengthening its ecosystem. In the first quarter of 2025, we achieved important milestones by optimizing processes and generating significant results through the intensive use of AI.

Sofia

Our virtual agent Sofia continues to evolve, standing out as a competitive advantage and expanding her role in strategic areas of the Company, delivering solid results: We expanded molecule coverage in targeted communications for customers undergoing continuous treatments.

- We successfully integrated Sofia directly into the point-of-sale (POS) systems across our stores.
- · We also automated internal support requests from stores with the help of our virtual assistant.
- In our logistics operations, we initiated the implementation of Sofia to guide the voice-picking process in our Distribution Centers. Following a successful pilot phase, we are preparing to scale this solution, which is expected to deliver significant operational gains and error reduction.

Panvellabs: Open Innovation and Strategic Partnerships

Panvellabs, our open innovation hub, continues to strengthen the Company's strategic pipeline and build on its successful track record:

- We scouted over 50 startups throughout the year for evaluation and potential strategic partnerships.
- Currently, five Proofs of Concept (PoCs) are underway across strategic fronts such as Human Resources, Exclusive Brands, Marketplace, and Deep Tech.

Awards

For the third time since 2018, Panvel has been recognized as one of the 100+ Most Innovative Companies in IT in Brazil, a prestigious national award organized by IT Mídia, the country's leading technology ecosystem. In 2025, the Company ranked 35th overall out of 362 submitted cases, and 3rd in the Retail segment.

The award-winning case featuring our AI agent Sofia outperformed major national and international companies, reinforcing our commitment to technological innovation.

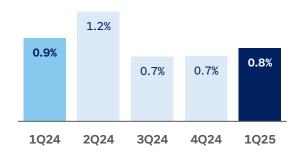

HEALTHCARE ECOSYSTEM

Panvel maintains its position as a reference in healthcare services in Southern Brazil, consolidating its presence with a substantial market share in services such as testing, vaccinations, and other essential offerings in our portfolio.

In 1Q25, the Services pillar accounted for 0.8% of Retail Gross Revenue, reaching a 20.8% market share in healthcare services in the South region, an increase of 0.6 p.p. compared to 1Q24. The slight 0.1 p.p. decline in the share of services over Retail Gross Revenue in 1Q25, when compared to the same period of the previous year, mainly reflects a strong comparison base. It is worth noting that 1Q24 was marked by a dengue epidemic in Brazil, accompanied by a new wave of Covid-19 cases.

Services (Share in Retail Gross Revenue)

We continue to strengthen customer perception of the pharmacy as a destination for vaccinations, testing, and other healthcare services, by expanding the number of stores equipped with Panvel Clinic structures for specialized care. This has increasingly led consumers to recognize Panvel stores as a trusted place to address and resolve a wide range of health-related needs. Through Panvel Clinic, the Company consolidates its position as a true Health Hub, upholding the highest standards of service and innovation in the delivery of healthcare solutions across the communities in which it operates.

Panvel Clinic	Vaccination Rooms	Services Provided
421 stores	101 salas	+ 119k
(+44 rooms vs 1Q24)	(+9 rooms vs 1Q24)	(1Q25)

Vaccinations remained the highlight of Panvel Clinic, accounting for 81.5% of service revenue, **a 24.7% increase in revenue in the first quarter of 2025** compared to the same period of the previous year. The Company also achieved **a significant 45.3% market share in vaccinations in Southern Brazil**, according to data from IQVIA.

Another key role of this business pillar has been driving customer recurrence. Clients who use any of our services visit our stores three times more often than those who do not. In addition, these customers also purchase a greater number of items per transaction, reinforcing the strategic role of services in pharmacies as a driver of recurrence and customer loyalty.

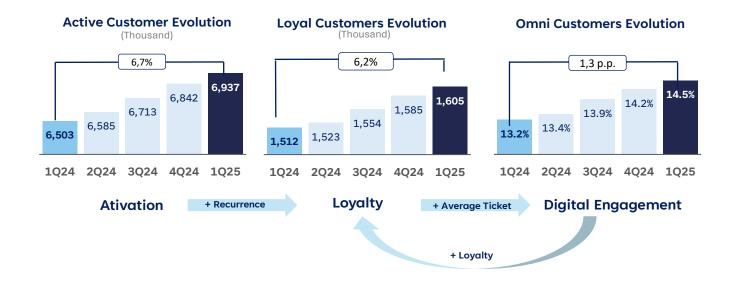

CUSTOMERS

In 1Q25, the Bem Panvel loyalty program remained focused on acquiring new customers, reaching a total of 25.7 million registered customers, an increase of approximately 500 thousand people in just three months. We closed the quarter with 6.9 million Active Customers*, up 6.7% compared to 1Q24, reflecting our strategy of strengthening loyalty and increasing recurrence, while also converting new customers and reactivating lapsed ones.

Within this base, the number of Loyal Customers* reached 1.6 million, a 6.2% increase versus 1Q24. This growth highlights the Company's competitive advantages in service quality, customer care, and product assortment, as well as in delivering a truly omnichannel and personalized experience.

One of the key tools driving customer loyalty, and consequently higher frequency and average ticket, is the digital engagement of our customer base. In this regard, we continue to monitor and **expand the share of Omni customers**, those who shop through both physical and digital channels. In 1Q25, Omni customers represented 14.5% of our active customer base, an increase of 1.3 p.p. over the previous year.

*Active Customer: A customer who made at least one purchase in the last 12 months; Loyal Customer: A customer who shops at Panvel at least once every 15 days;

We are also strengthening our omnichannel personalization strategy through the integration of notifications across the App and physical stores, and by offering product recommendations aligned with each customer's consumption profile.

The notifications center is gaining new functionalities, including smart reminders for prescription refills and price drop alerts, while the coupon wallet is now segmented by themes and categories — increasing the relevance of promotional offers.

Lastly, we continue to advance in loyalty strategies focused on customers who use chronic and continuous-use medications. These customers are five times more valuable than average, with a store visit frequency four times higher and a 1.3x greater spend per visit. The Company expects this growth lever to increasingly contribute to store productivity, especially in terms of average sales per store.

QUALITY OF SERVICE

Panvel continues to provide its customers with a unique journey of satisfaction, quality, and experience, regardless of the channel through which the purchase occurs. For this reason, Panvel is recognized by consumers for delivering the best experience in pharmaceutical retail, as evidenced by the indicators below:

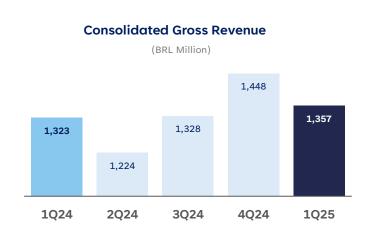

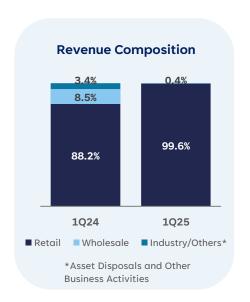

Panvel's Net Promoter Score (NPS) remained high in 1Q25, reaching 78 points, based on the Bain & Company methodology. The Company continues to stand out in the Brazilian pharmaceutical retail sector due to its strong digital presence, fastest delivery, and outstanding customer satisfaction levels.

CONSOLIDATED GROSS REVENUE

Consolidated gross revenue (which includes all of the Company's business units) totaled R\$ 1,357 million in 1Q25, representing a 2.6% growth compared to the same period of the previous year. It is worth noting that the 1Q24 comparison base included revenue from the Wholesale operation, which has since been divested, as well as a non-recurring gain of R\$ 39.0 million from the sale of a plot of land owned by the subsidiary Dimesul.

Excluding the extraordinary impact from the land sale, the Group's adjusted gross revenue in 1Q25 would have grown 5.7% versus 1Q24, driven by a 15.9% increase in retail revenue, which will be detailed in the following sections.

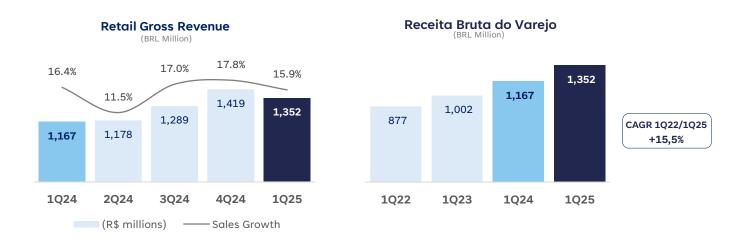

RETAIL

In 1Q25, Panvel recorded a 15.9% increase in sales compared to the same period of the previous year, reaching Gross Revenue of R\$ 1,351.7 million. This performance is even more noteworthy given the challenging comparison base in 1Q24, which was impacted by one-off factors such as the calendar effect (2024 being a leap year, with one extra day in February) and a severe dengue outbreak across the country.

Analyzing the compound annual growth rate (CAGR) from 1Q22 to 1Q25, we observe an average growth rate of 15.5% over the period, a robust figure that reinforces the consistency of Panvel's operations. This performance is directly linked to the Company's strategic focus on the sale of pharmaceuticals, particularly chronic and continuous-use medications, as well as CRM, Digital, and Services initiatives, all of which are key tools for competitive differentiation and customer loyalty.

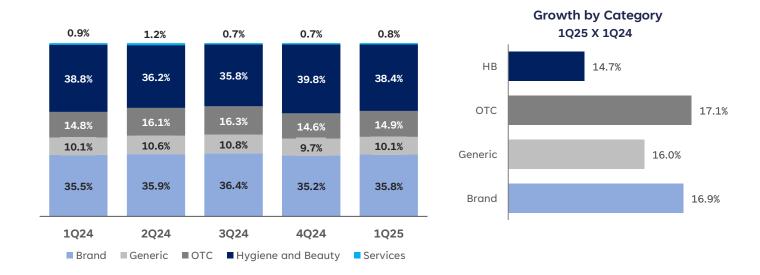

Same Store Sales (SSS) grew by 11.8% in 1Q25 compared to 1Q24. In the same direction, Mature Same Store Sales (MSSS) recorded strong growth of 9.8% versus 1Q24, a rate well above the inflation for the period (5.48%, based on the accumulated IPCA).

Throughout 1Q25, we reached an average sales volume of R\$ 705 thousand per store, representing a 9.9% increase compared to 1Q24. It is worth noting that in March, we achieved an average of R\$ 751 thousand per store. This performance was driven by the strong results from mature stores and the rapid ramp-up of newly opened units.

RETAIL'S SALES MIX

Reinforcing the Company's commercial strategy, 1Q25 was marked by another quarter in which pharmaceutical products led revenue growth, with the category growing 16.8% compared to 1Q24.

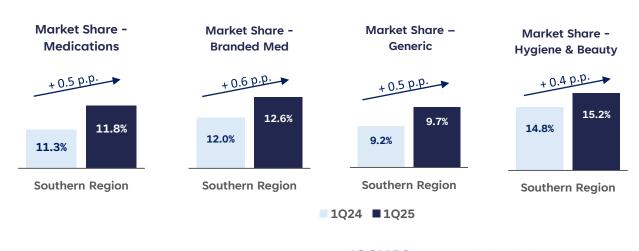

The **Prescription Medication (RX)** category were among the key highlights of the period, posting growth of 16.9% versus 1Q24 and gaining 0.3 p.p. in the sales mix. This performance is aligned with the Company's strategy of increasingly addressing the needs of customers using chronic and continuous medications.

The **OTC (Over-the-Counter)** category recorded the highest revenue growth in the quarter, advancing 17.1% and increasing its share by 0.1 p.p. compared to 1Q24, mainly driven by strong performance in the Vitamins and Supplements (+31.4%), Diabetes (+29.5%), and Skin and Mucous Membranes (+25.8%) segments.

The **Generic Medications** category grew 16.0% year over year, maintaining a stable share in the sales mix in 1Q25. This category plays a key role in attracting more customers to our stores and remains a fundamental lever for sustaining healthy gross margins.

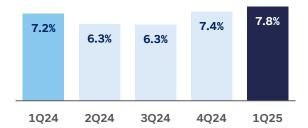

The **Hygiene & Beauty (H&B)** category posted growth of 14.7% versus 1Q24, with a 0.4 p.p. decline in its mix share — a movement aligned with the current commercial strategy. It is important to highlight that this category continues to hold a strong and healthy share of total sales.

The commercial strategy and the solid performance achieved during the quarter also contributed to strengthening Panvel's competitive position in the market. As previously mentioned, we observed consistent market share gains in both pharmaceuticals and personal care & beauty.

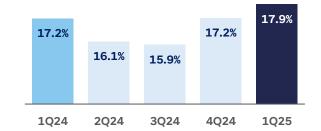

PRIVATE LABEL - PANVEL PRODUCTS

% PP's share in Retail Sales

% PPs share in HB

In 1Q25, Panvel-branded products continued their recovery trajectory, posting significant growth of 25.1% compared to 1Q24. These products accounted for 7.8% of total Retail sales, representing a gain of 0.4 p.p. over 4Q24 and 0.6 p.p. over 1Q24. In the Beauty and Personal Care (BPC) category, their share reached 17.9%, a 19.4% increase versus 1Q24.

During the same period, sales of Private Label products and other Exclusive Brands accounted for 8.1% of Retail revenue.

This performance reinforces the positioning of Panvelbranded products as a benchmark in the pharmaceutical retail sector, especially within the Beauty and Personal Care category.

Portfolio expansion initiatives, curated based on consumer preferences, continue to support consistent results. As of the end of March, the Company offered 1,043 active SKUs of Panvel-branded products, with sales highlights in the Body Care, Baby Care, Makeup, and Facial Treatment categories.

In addition to assortment advancements, Panvel-branded products have shown strong digital presence and engagement on social media. On Instagram, the brand reached 541.5 thousand accounts organically, a 21.8% increase compared to 1Q24, and gained 17.1 thousand new followers (+42.3% vs. 1Q24). On TikTok, the brand reached 19.5 million accounts (+2,386% vs. 1Q24), reflecting the success of its content strategies targeted at younger audiences. In total, social media actions generated over 223 thousand interactions, further driving the brand's digital conversion.

This combination of factors—including the continuous portfolio expansion, operational recovery, and strengthened digital presence—reinforces Panvel's leadership in the Private Label segment within pharmaceutical retail in the South Region, where it **reached a 34.2% market share in the period**. These pillars also provide a solid foundation for sustained growth throughout 2025.

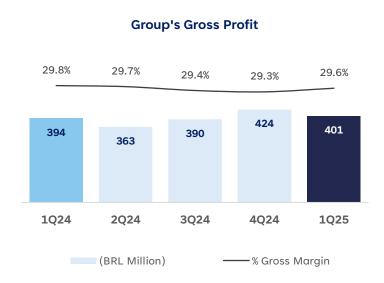

GROSS PROFIT

The Company reported Consolidated Gross Profit (including retail operations and other business units) of R\$401.1 million in 1Q25, representing 29.6% of Gross Revenue for the period. It is worth noting that the 1Q24 base included a non-recurring asset sale, which positively impacted the margin in the first quarter of last year.

When excluding the non-recurring effect of the asset sale in 1Q24, the Group's Gross Margin would have expanded by 1.7 p.p. compared to the adjusted base (equivalent to 27.9% of 1Q24 Gross Revenue). This improvement in Gross Margin is directly linked to a lower share of Wholesale sales in the Company's overall revenue mix (mix effect).

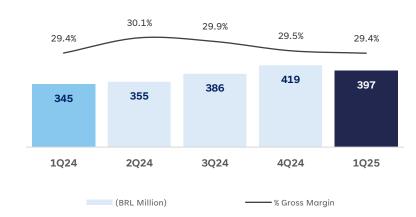

Retail's Gross Profit

Retail Gross Profit totaled R\$396.8 million in 1Q25, representing 29.4% of Gross Revenue, a growth of 15.2%. The Retail Gross Margin remained in line with 1Q24, despite the increase in sales of prescription drugs during the period. This performance was made possible by a balanced pricing strategy, higher penetration of OTC products and Panvelbranded items, as well as commercial negotiations with suppliers.

Retail's Gross Profit

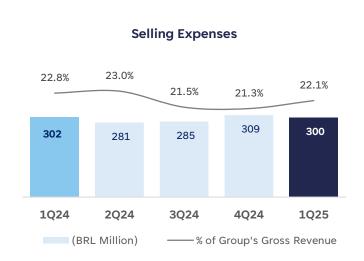

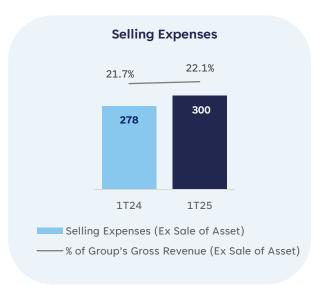

EXPENSES

In 1Q25, expense dilution continued to be impacted by the discontinuation of the Wholesale operations, which temporarily reduced operating leverage. This movement affected the ratio of expenses to revenue. However, as shown below, both selling and administrative expenses grew at a slower pace than Retail sales in 1Q25. Additionally, the Group's Gross Margin expansion, as previously mentioned, more than offset this mix effect between business units.

Selling Expenses

In 1Q25, Selling Expenses totaled R\$299.9 million, a nominal decrease of 0.6% compared to the same period last year. This variation is mainly explained by the comparison base in 1Q24, which was impacted by non-recurring expenses associated with the sale of an asset, as previously mentioned. When excluding the effects of this transaction, Selling Expenses increased by 7.8%, a rate significantly below the 15.8% growth in Retail sales over the same period. In this way, the selling expenses growth of 0.4 p.p it's a reflection of the operational leverage caused by the closure of the Wholesale operation.

General and Administrative Expenses

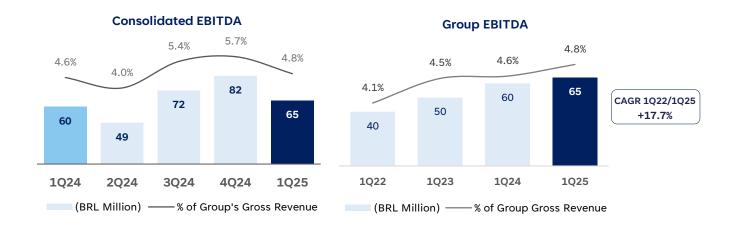

General and Administrative Expenses totaled R\$ 36.3 million in 1Q25, accounting for 2.7% of Gross Revenue for the period, a 0.3 p.p. increase compared to 1Q24. This increase is directly related to the lower operating leverage resulting from the shutdown of the Wholesale operations. Excluding this effect, there would have been a dilution in the expense-to-sales ratio, as administrative expenses grew by 13.6% in the period, while Retail sales increased by 15.8%.

General and Administrative Expenses

EBITDA

In 1Q25, we reported Adjusted EBITDA of R\$ 64.6 million, representing growth of 7.2% compared to 1Q24, with a margin equivalent to 4.8% of Gross Revenue (+0.2 p.p. vs 1Q24). It is worth highlighting that this margin expansion reflects productivity gains at store level, and we have adjusted the 1Q24 results to exclude the one-off positive impact from the sale of a land parcel, as detailed in the table below.

When comparing first-quarter performance over the past four years, we observe a clear trend of improving operational profitability. Between 1Q22 and 1Q25, Adjusted EBITDA posted a robust Compound Annual Growth Rate (CAGR) of 17.7%, outpacing the Retail Gross Revenue CAGR of 15.5%. EBITDA margin rose from 4.1% in 2022 to the current level of 4.8%.

Adjusted EBITDA Reconciliation

EBITDA Reconciliation	1Q24	1Q25	Var. %
(R\$ million)			
Net Income	35.2	26.9	(23.6%)
(+) Income Tax	(3.6)	4.5	(226.0%)
(+) Financial Result	7.9	7.2	(8.6%)
EBIT	39.5	38.6	(2.2%)
(+) Depreciation and Amortization	19.1	22.0	15.2%
EBITDA	58.6	60.6	3.5%
Profit Sharing/Bonuses	3.8	3.0	(21.1%)
Asset Sale Effect (Land)	(25.6)	-	-
Asset Write-offs	0.8	0.2	(79.1%)
Other Adjustments	1.7	0.8	(52.9%)
Non-recurring provisions	17.5	-	-
PCLD	3.4	-	-
Adjusted EBITDA	60.3	64.6	7.2%
Adjusted EBITDA Margin	4.6%	4.8%	0.2 p.p.

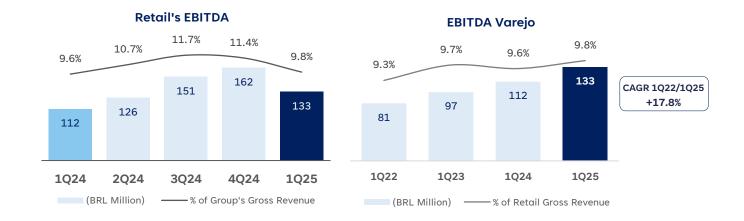

RETAIL EBITDA

Gross Retail Revenue (-) COGS/Taxes/Discounts/Returns = Retail Gross Margin (-) Store Operating Expenses (+) Store Depreciation = Retail EBITDA

In 1Q25, Retail EBITDA reached R\$ 132.9 million, a solid increase of 18.6% compared to the same period last year, leading to a 0.2 p.p. margin expansion versus 1Q24. This strong performance aligns with the Company's expectations of continued improvement in the productivity of mature stores and maintaining a strong ramp-up pace for new store cohorts.

The Retail EBITDA Compound Annual Growth Rate (CAGR) now stands at 17.8%, outpacing the Retail Gross Revenue CAGR of 15.5%.

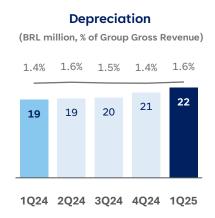

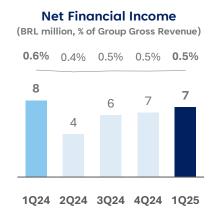

DEPRECIATION, NET FINANCIAL RESULT, INCOME TAX AND SOCIAL CONTRIBUTION

Depreciation increased by 0.2 p.p. in the quarterly comparison, a natural outcome of investments made in store openings and technology.

Net Financial Expenses were diluted by 0.1 p.p. year over year, accounting for 0.5% of the Group's Gross Revenue. This dilution reflects the Company's access to special low-cost credit lines (such as FINEP and BNDES), along with the maintenance of a low financial leverage profile.

Income Tax and Social Contribution (IR/CSLL) had a negative impact of 0.6 p.p. in the quarterly comparison, due to a non-recurring deferred tax gain recorded in the 1Q24 base, stemming from the sale of a land asset.

NET PROFIT

Adjusted Net Income in 1Q25 reached R\$ 27.8 million, corresponding to a net margin of 2.1%. Despite the increase in Income Tax and Social Contribution expenses, as previously mentioned, the net margin grew by 0.1 p.p. compared to the same period last year. It is important to note that 1Q24 results were positively impacted by the sale of a land asset, which has been adjusted in the table below:

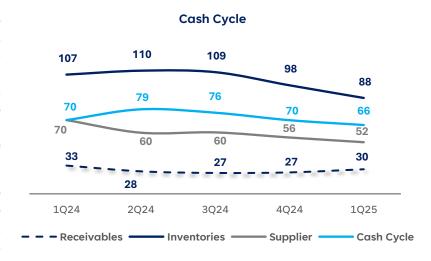

Net Income Reconciliation	1Q24	1Q25	Var. %
(R\$ millions)			
Income Before Tax (LAIR)	31.6	31.4	(0.6%)

Adjusted Net Margin	2.0%	2.1%	0.1 p.p.

CASH CYCLE

The Company's Cash Cycle in 1Q25 totaled 66 days,* representing an improvement of 4 days both sequentially and year over year. In line with the inventory level normalization trend observed since 4Q24, following the impacts from floods and the discontinuation of the Wholesale segment, inventory days decreased by 10 days compared to year-end and by 19 days versus 1Q24.

This inventory reduction also impacted the accounts payable position. As a result, the average supplier payment term ended 1Q25 at 52 days, representing a pressure of 4 days sequentially and 18 days versus 1Q24.

It is worth highlighting that, as a consequence of the Wholesale business phase-out, there was a consistent improvement in the average receivables term, which ended the quarter at 30 days, a reduction of 3 days year over year.

CASH FLOW

The Company reported a positive Free Cash Flow of R\$ 14.4 million in 1Q25, a strong improvement compared to 1Q24. It is worth noting that, thanks to solid performance in managing the financial cycle, the Company was able to generate cash in a quarter that is historically marked by cash consumption, while simultaneously accelerating sales and maintaining the pace of investments.

Cash Flow	4T23	4T24	Variação (%)

Cost: CDI+	1.3%	1.3%	0.3%	(0.5%)	(1.1%)

In 1Q25, Panvel's net debt to EBITDA ratio remained at 1.2x, in line with the previous period. We maintained a balanced and healthy capital structure, supported by strong cash generation and strict financial discipline. It is worth highlighting that, throughout 2024, the Company gained access to subsidized credit lines such as FINEP and BNDES Emergencial (for working capital and reconstruction). These financings improved both the Company's WACC, given their significantly lower cost compared to the CDI, and the average payment term. As a result, the average debt cost decreased from CDI +1.30% in 1Q24 to CDI -1.11% in 1Q25.

■ Short-Term Debt ■ Long-Term Debt

INVESTMENTS

In 1Q25, we invested a total of R\$31.6 million, representing a 28.3% increase compared to the same period last year.

IFRS 16: IMPACTS

The IFRS 16 / CPC 06 (R2) standard introduced new procedures for the accounting treatment of certain lease agreements. For contracts that fall under this new standard, accounting entries are made to recognize the corresponding amounts in the Company's Assets (right-of-use assets) and Liabilities (future lease obligations), resulting in changes in the classification of expenses between rent, depreciation, and interest.

To maintain historical comparability, the figures presented below follow the previous methodology (IAS 17). Financial statements and disclosures in accordance with IFRS 16 are available on the Company's and CVM's websites.
