03

COMPETITIVE DIFFERENTIALS

1

BUSINESS MODEL

Combination of broad addressable market, high level of loyalty, profitability and sustainability of recurring revenue (SaaS) combined with potential growth in transactional revenues

2

DISTRIBUTION PLATFORM

Local and digital presence, based on a highly capillary distribution model

3

SOLUTIONS PORTFOLIO

Beyond the ERP: B2B technologies ecosystem in 3 business dimensions: Management, Techfin and Business Performance

4

M&A & PARTNERSHIP STRATEGY

Main consolidator of Brazilian Tech Market: We believe acquisitions are a powerful tool to leverage our strategy of strengthening our core business and expanding into new market

5

ESG AGENDA

Executive Team engaged and experienced in the technology sector. Culture of operational excellence, transparency, efficiency, and high standards of excellence in governance, ethics and integrity and ESG

BUSINESS MODEL

3D ecosystem expanding our addressable market

9

TOTAL ADDRESSABLE MARKET (TAM) (R\$ Billions)

> **Current TAM grew in +7x**
through 3D ecosystem

Compelling set of growth drivers to further increase the potential TAM...

1. Potential of software market in Brazil
by considering an increase in the potential IT usage maturity of Brazilian companies to a level similar from OECD economies

2. Potential of B2B credit market in Brazil
when all companies in Brazil contract credit according to the average onerous indebtedness level of those that have already contracted today

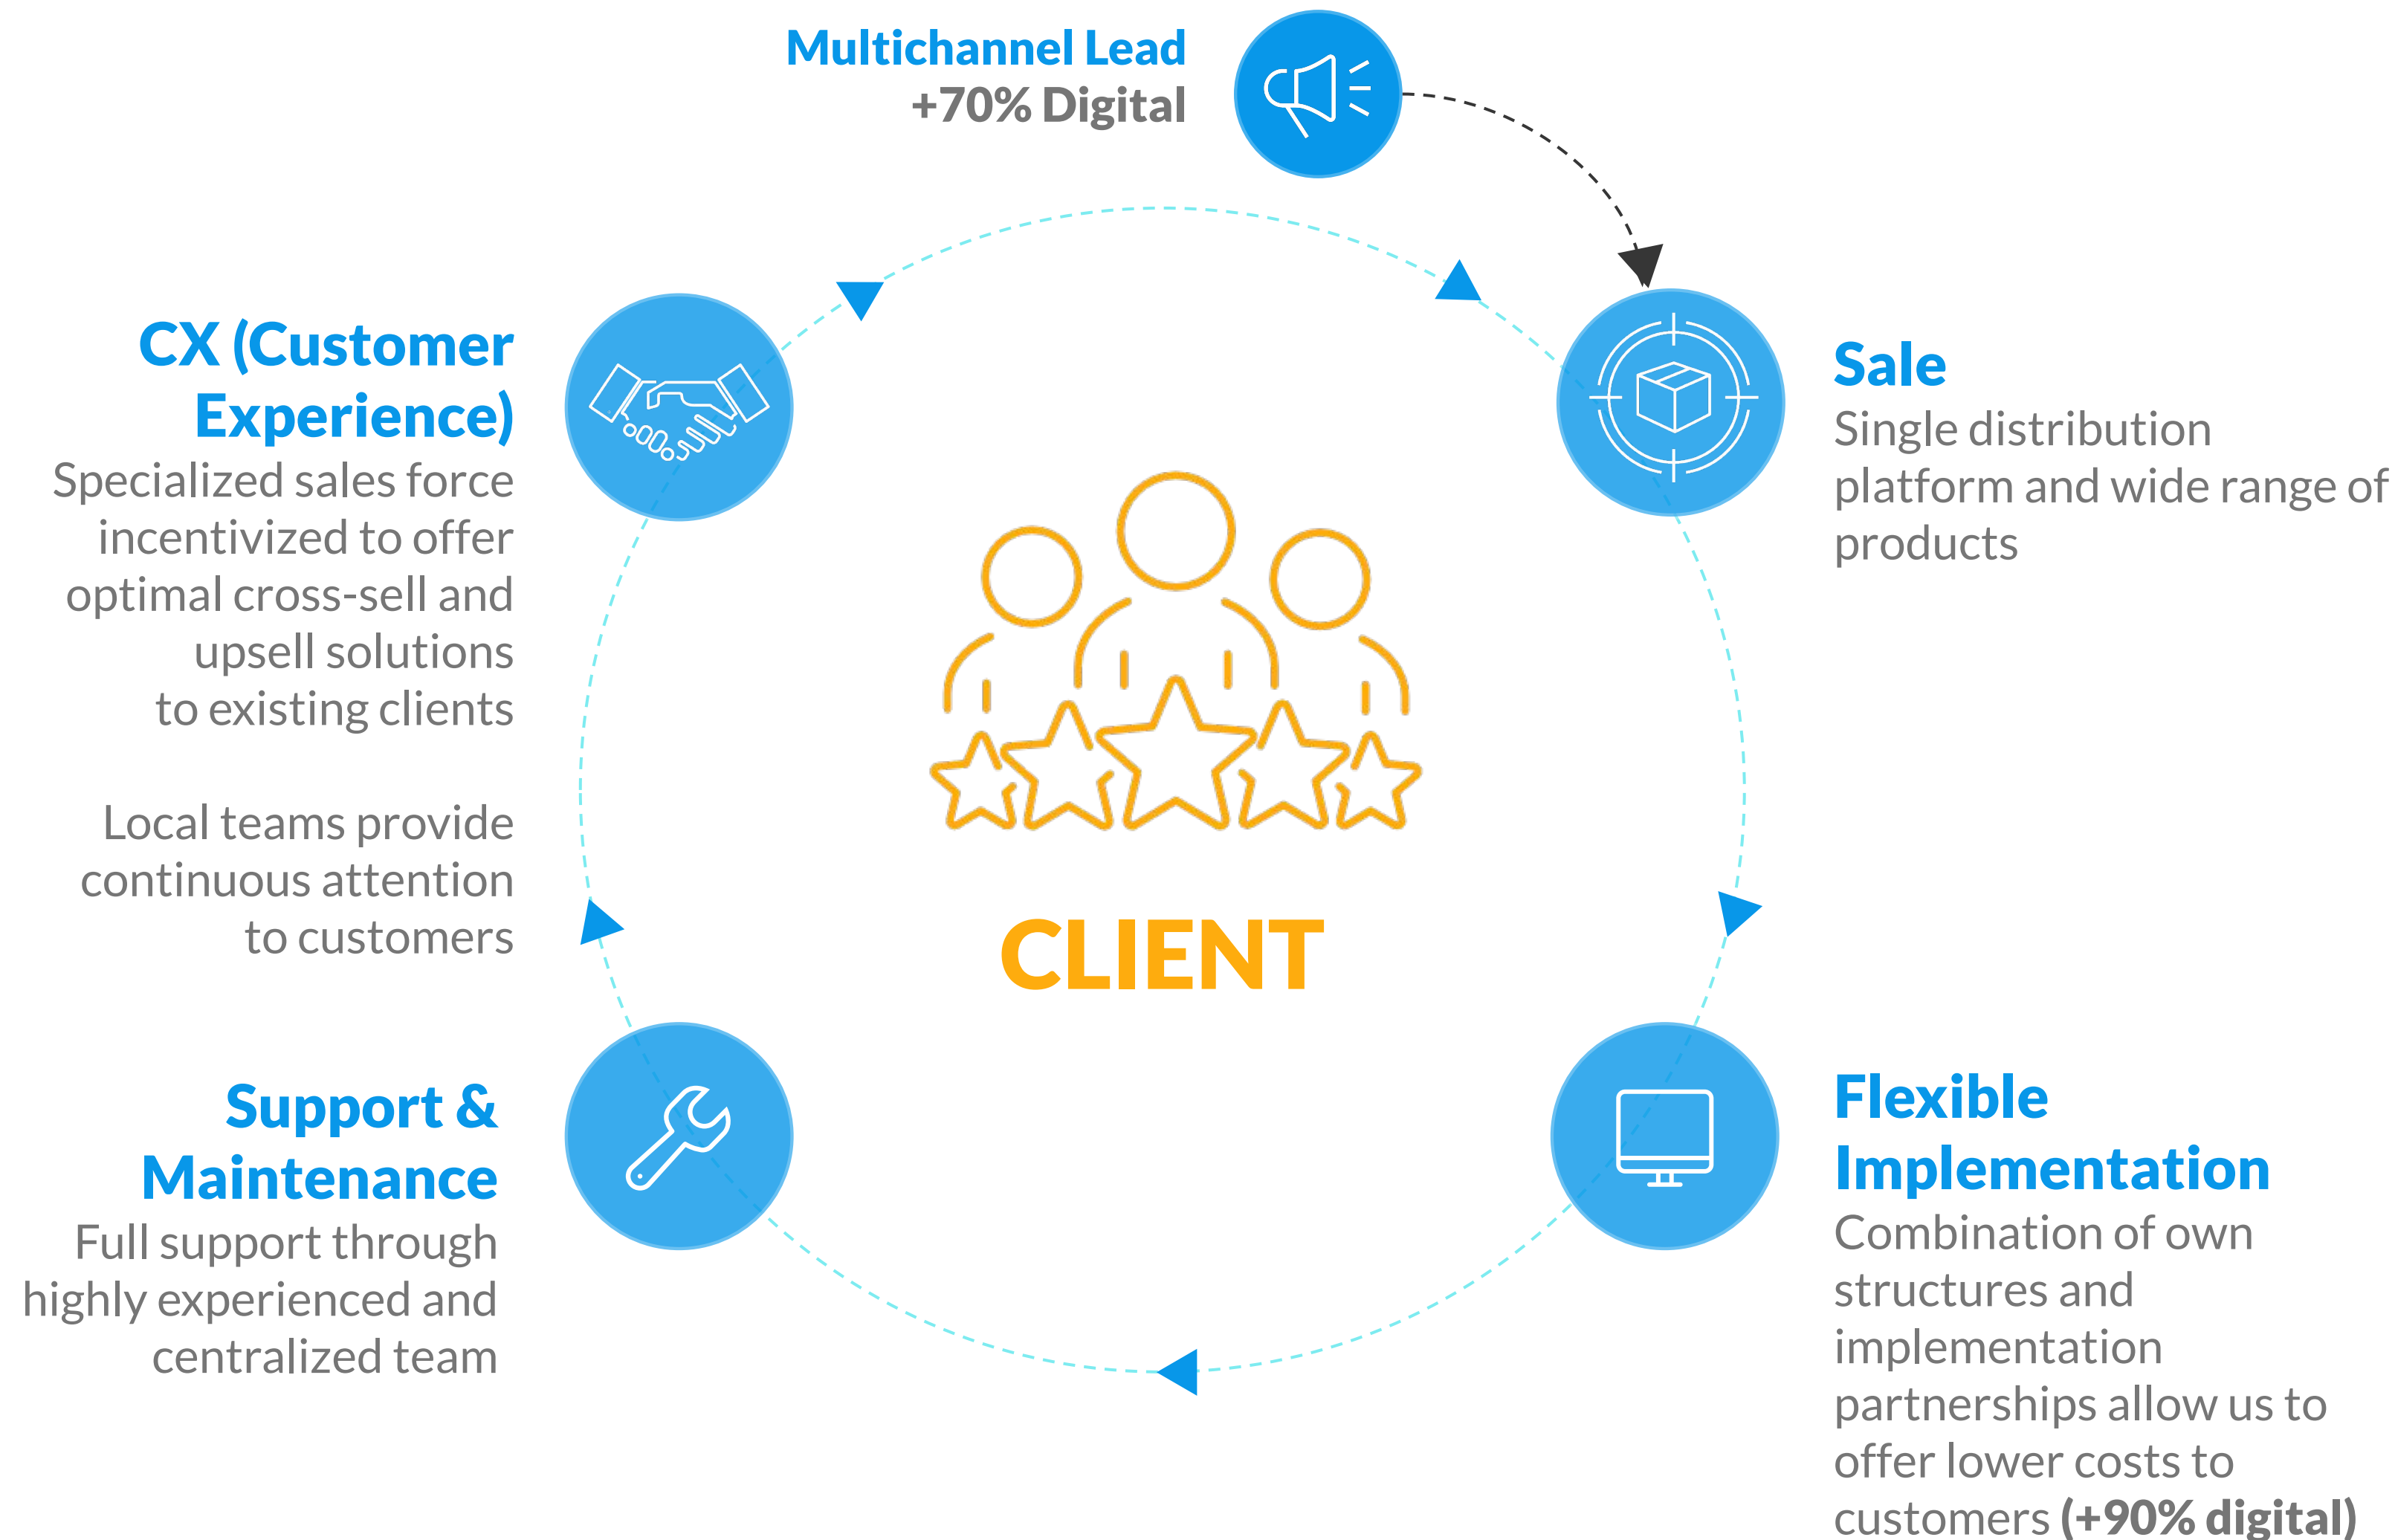

3. New markets (Techfin and Biz Performance)
the size of these new markets and their growth potential demonstrate that TOTVS does not need to be dominant in them for the growth coming from the new segments to be relevant

BUSINESS MODEL

Presence and partnership in all stages of the Customer Journey strengthen loyalty

Far Beyond ERP: 3D ecosystem

DISTRIBUTION PLATFORM

Local and digital presence, based on a highly capillary distribution model

DISTRIBUTION CHANNELS LOCAL AND DIGITAL

HOW WE RELATE WITH OUR CUSTOMERS

Management

Techfin

Biz Performance

Large Enterprise Division

- Own team with qualified and specialized staff by industry, offering personalized service and consulting support

Affiliates

- Credit distribution through our suppliers' affiliates

Partners

- Vibrant partner ecosystem in marketing automation

52 Franchised Territories and 5 Branches

- Franchised territories according to industry sector. Local knowledge for SMB customers

Franchises and Branches

- Sales specialists fully-integrated in franchises and branches, still at the beginning of our journey and with large room to grow

Digital Commerce

- Fully-integrated Digital Commerce and Omnichannel sales specialists present in franchises and branches

Multichannel

- Distribution model through partners from a multichannel base that provides TOTVS with unmatched penetration across all regions in Brazil

Cross-selling

- Cross-selling solutions through Management Dimension clients

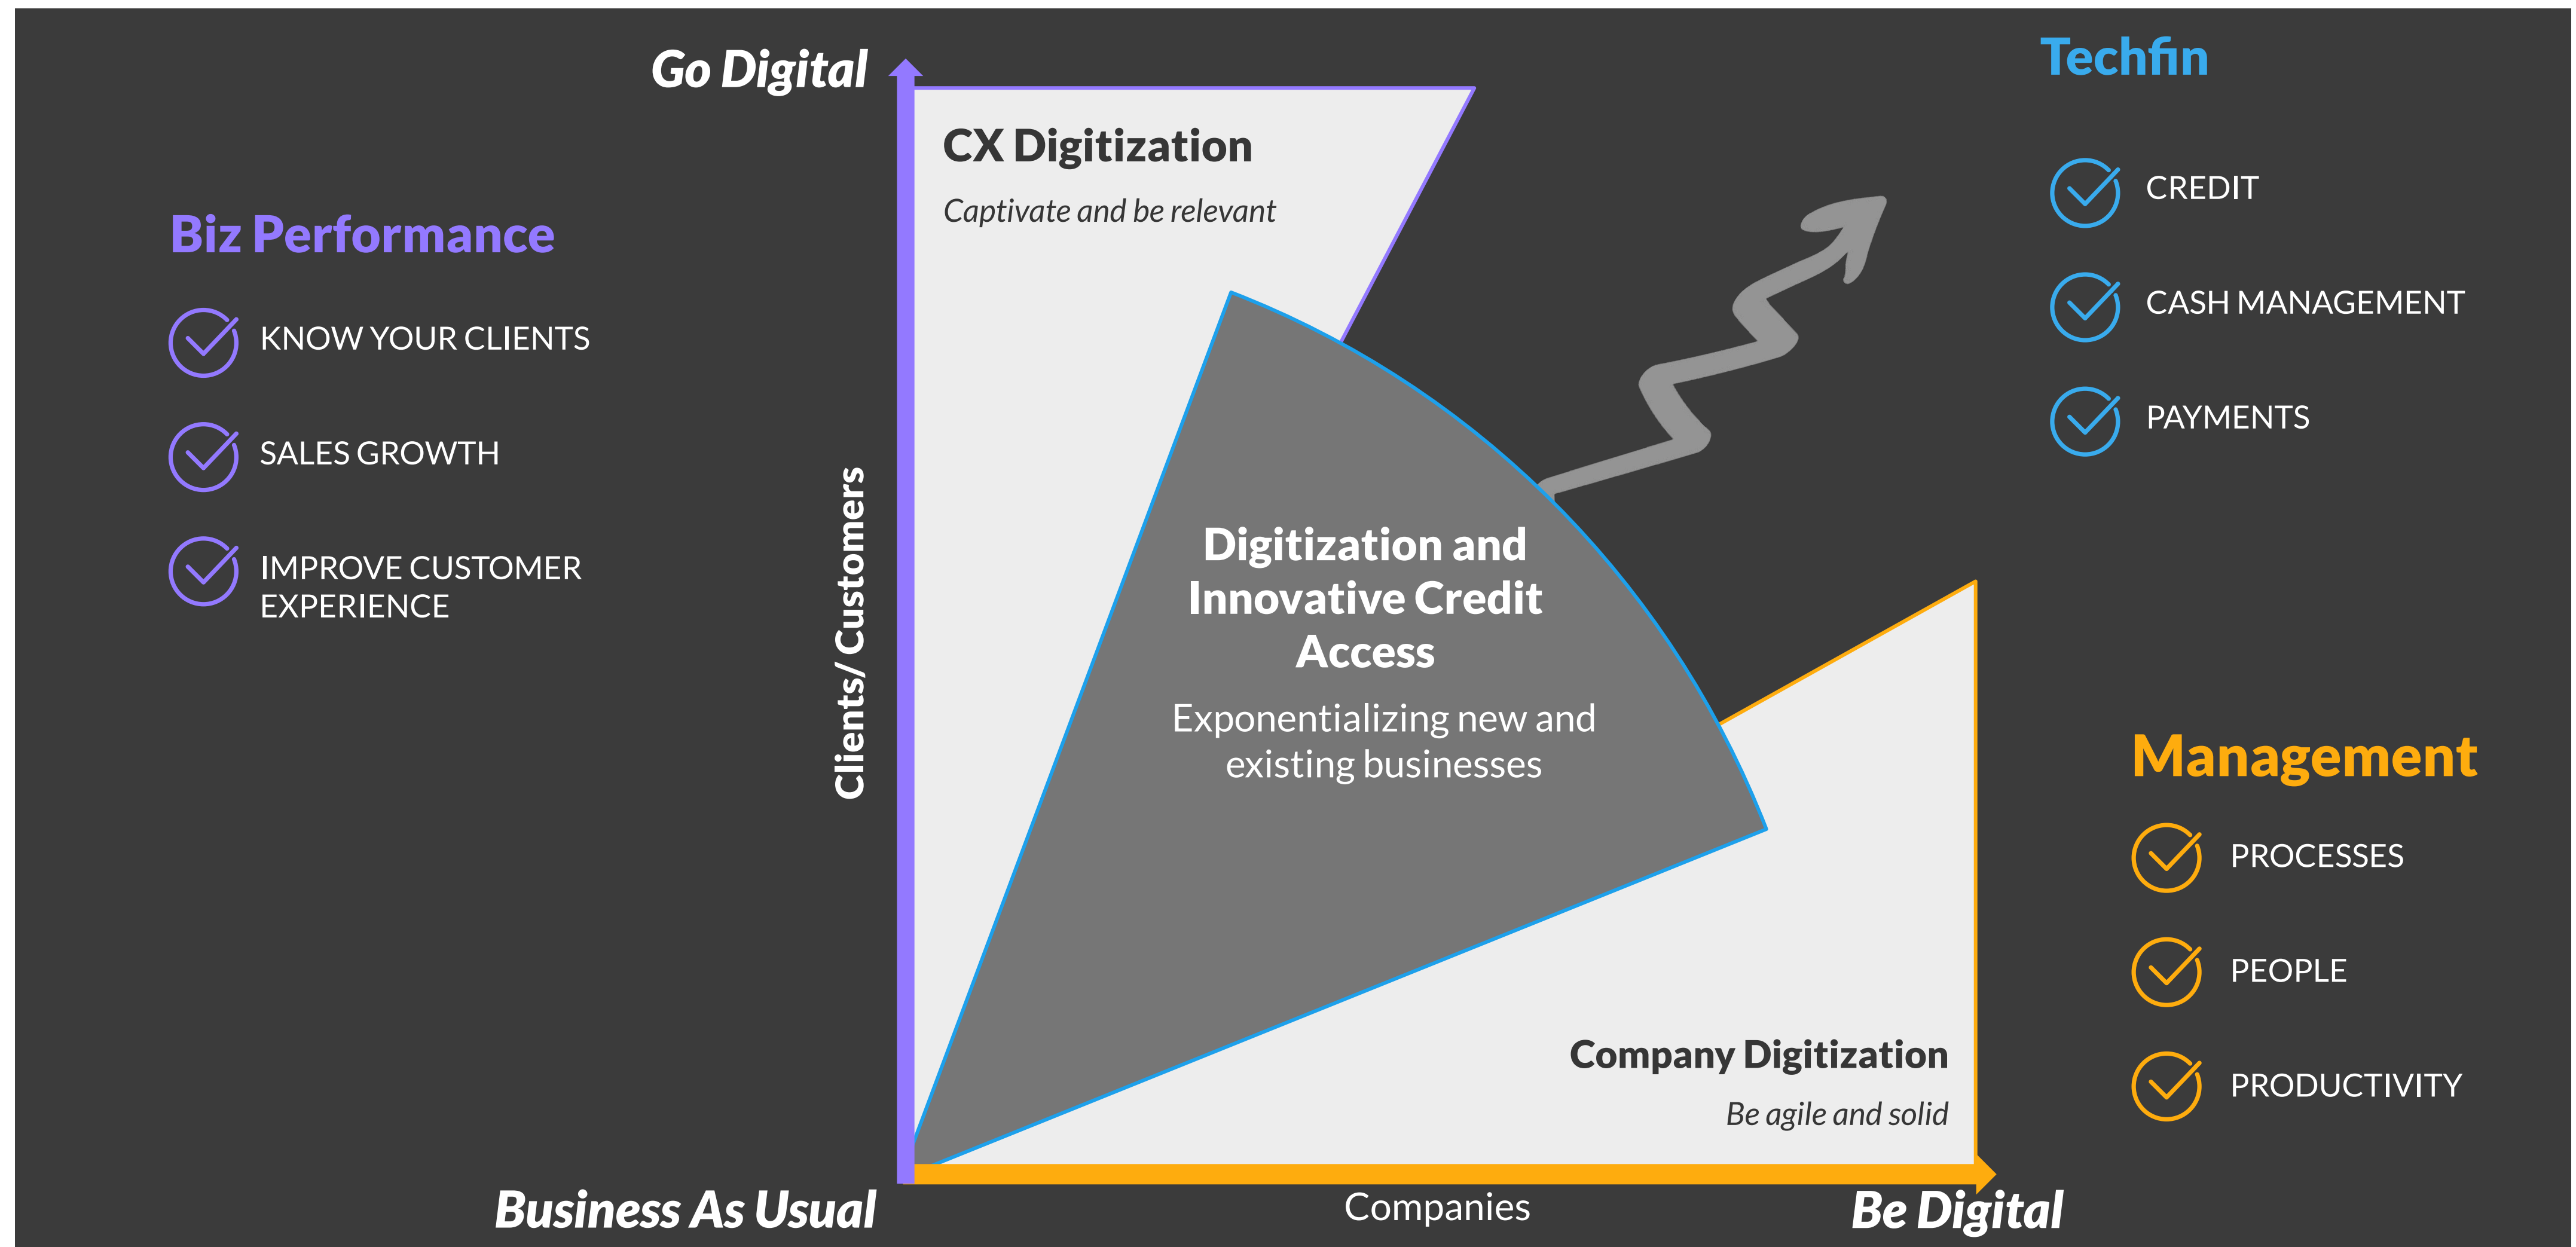

PLG (Product-Led Growth)

- Up-sell driven by PLG (Product Led Growth)

BUSINESS PORTFOLIO

Accelerating our clients' digital Journey through the 3D Ecosystem

BUSINESS PORTFOLIO

14

MANAGEMENT DIMENSION

ERP, HR solutions (from payroll to human capital management), and **vertical solutions** for 12 market segments

A market not yet mature, with **+30% of SaaS signings from New Names** and potential TAM to become 3.3x larger

The digitization Journey demands growing levels of corporate IT investments, boosting our core dimension

More than simple personnel department solutions, **SMB companies** are updating to the **ultimate platform** for human capital management

TECHFIN

CREDIT OPERATION:

ILLUSTRATIVE EXAMPLES OF RESULTS CONSOLIDATION

OVERVIEW - MAIN MODEL

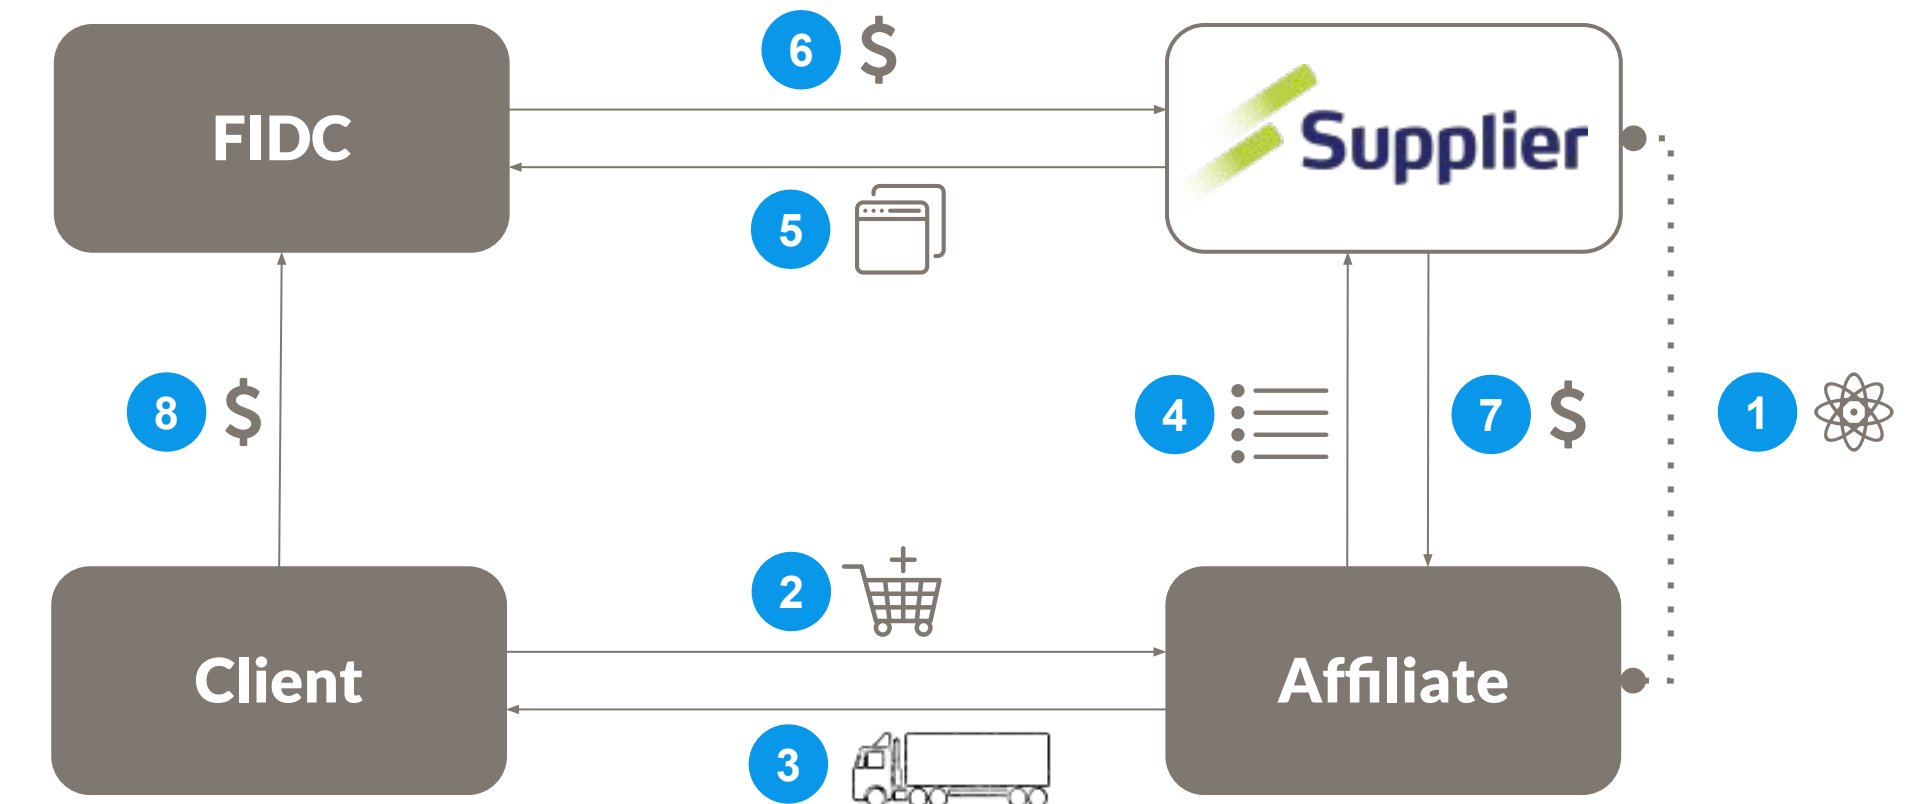

Supplier is a virtual B2B private label credit card administrator that has a business model based on partnerships with industries and distributors (called Affiliates), providing credit aimed at the relationship of these Affiliates with their SME customers, through a platform integrated with the ERP of the affiliate.

After this integration with the ERP, Supplier gains access to the Affiliate's historical transaction data with its Clients, which are used together with public information to establish the credit limit for these Clients.

When the Affiliate performs the sale to its client using this credit, Supplier pays the Affiliate the amount net of the agreed **fee** and the client settles the debt at receivable term.

Supplier may assign the credit card receivables to Supplier's exclusive Receivables Investment Fund (FIDC), which, in this case, carries the portfolio and credit risk.

- 1 Supplier integrates its platform with the Affiliate ERP and sets the pre-approved credit limit for each client in the credit card private label solution based on the transaction history between the parties.
- 2 Client places a forward purchase order using its limit of credit card provided by the Affiliate.
- 3 Affiliate delivers items purchased by Client.
- 4 Supplier records credit card receivables.
- 5 Supplier assigns credit card receivables to FIDC.
- 6 FIDC pays the amount net of its credits' assignment fee
- 7 Supplier pays the Affiliate the amount net of its fee, within the term agreed in the contract.
- 8 O Cliente liquida seus títulos junto ao FIDC no vencimento.

EXAMPLE 1: CREDIT OPERATION - Full Portfolio Assignment

27

Description of the Operation

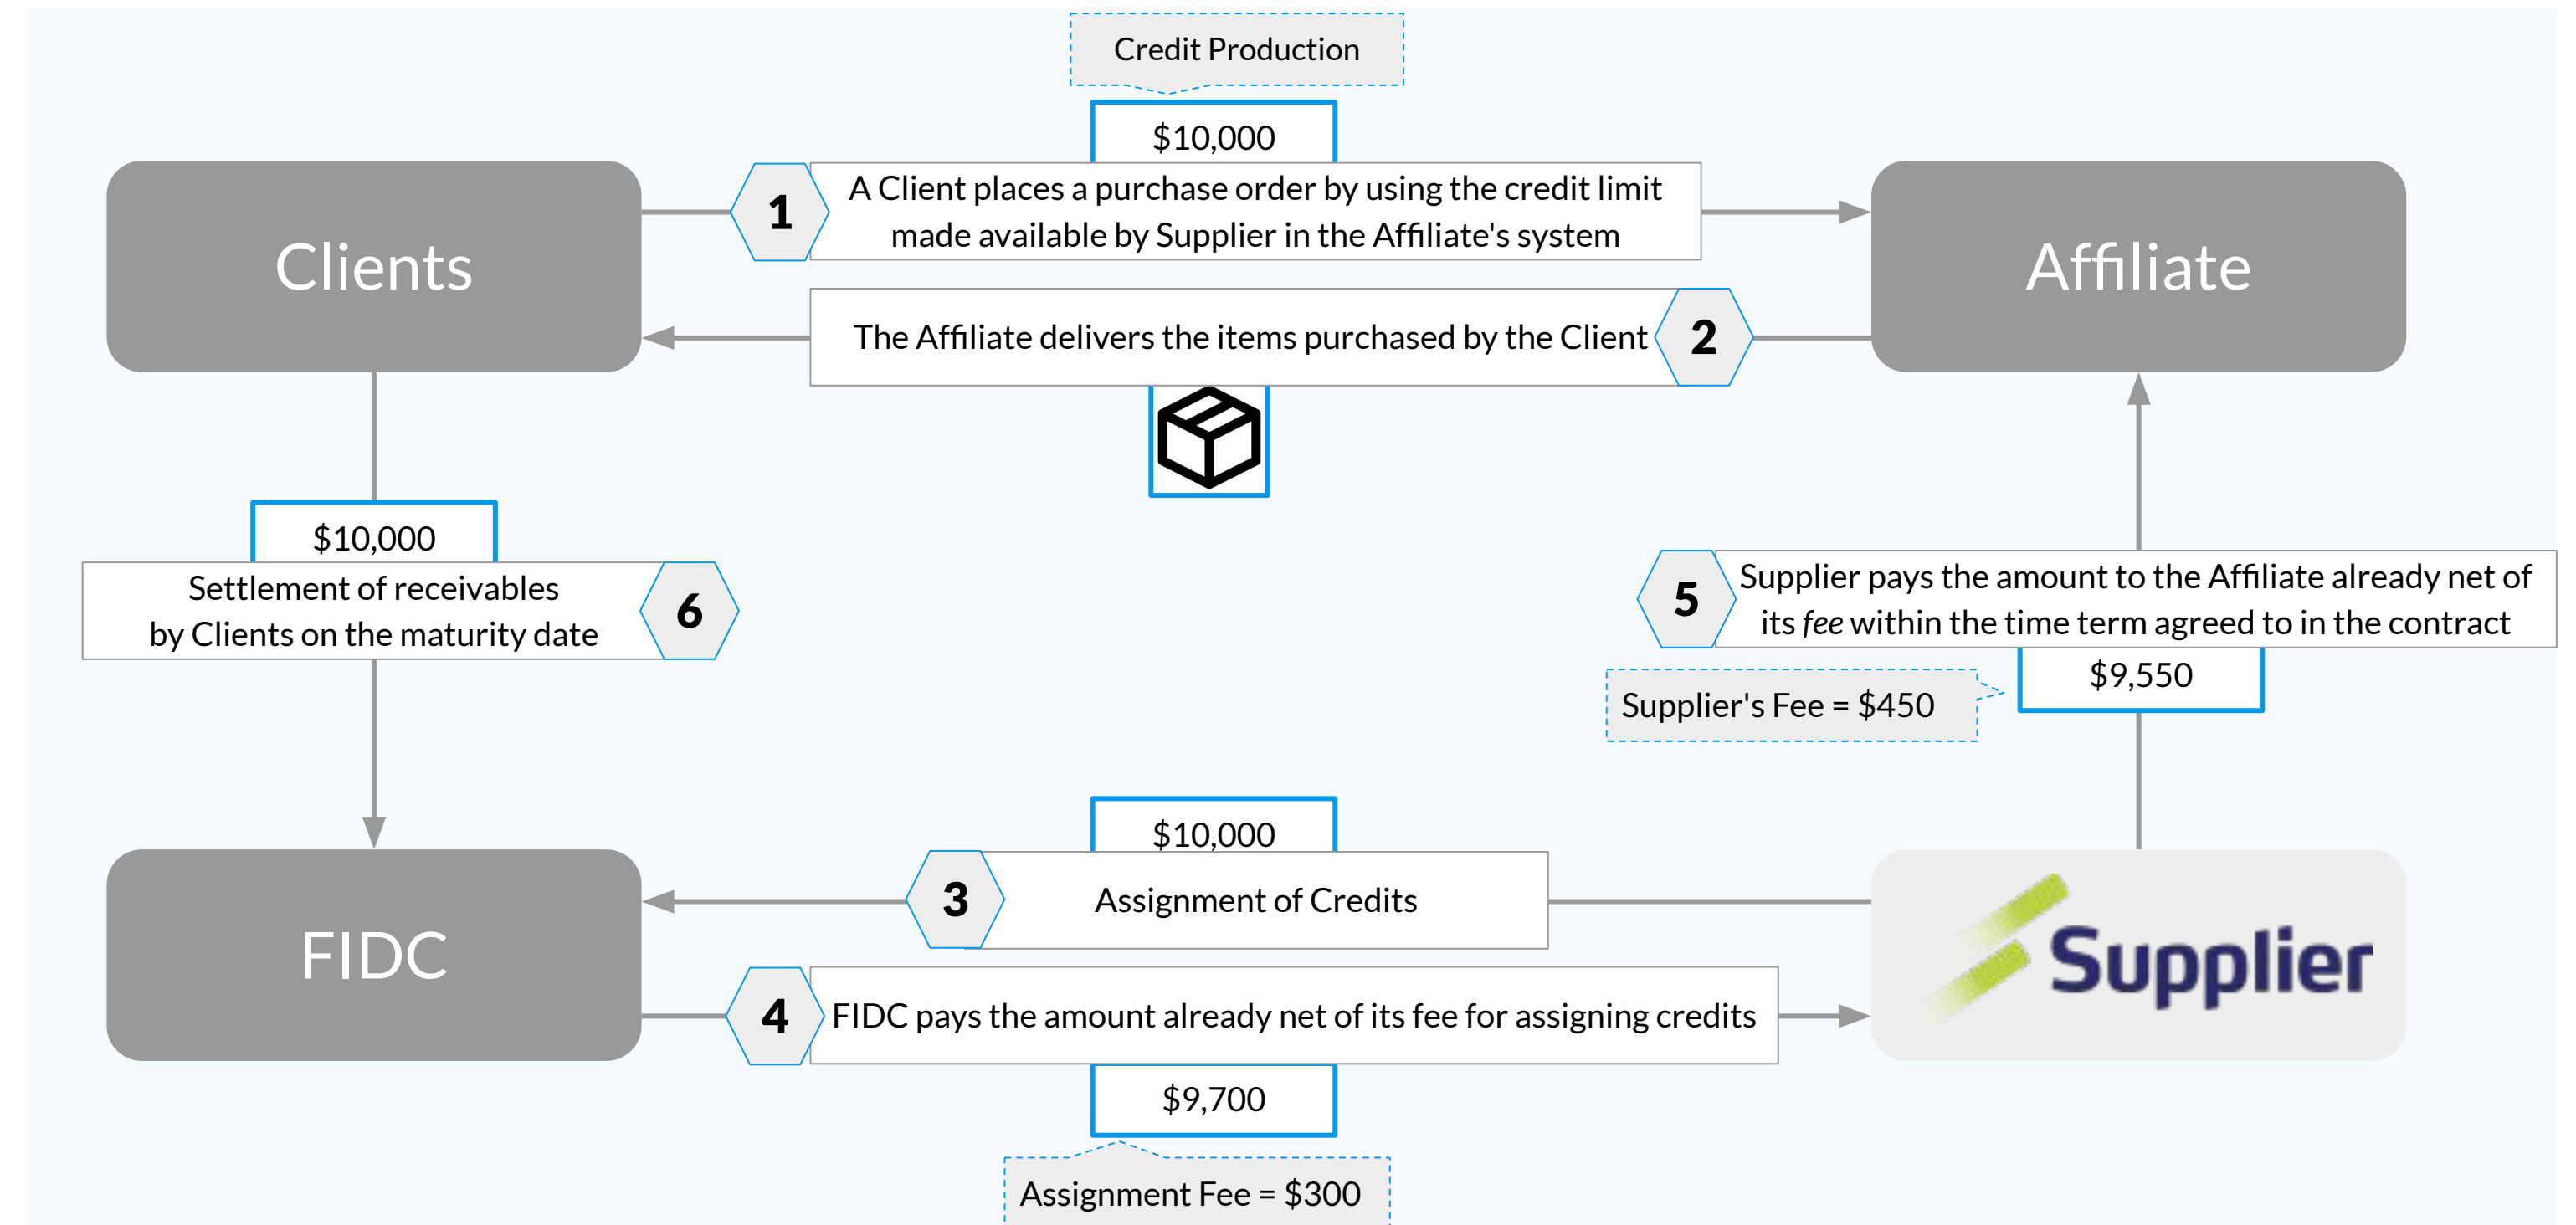

Example of a credit transaction originated by Supplier and fully assigned to the FIDC.

Most transactions of Supplier use this model on a default basis. Depending on the strategy and for greater efficiency, the percentage of transactions on this model can be changed, seeking to optimize the use of cash and, consequently, increase the profitability of the business.

Transaction Assumptions

- **Credit production:** \$\$10,000 (several receivables)
- **Supplier's Fee:** \$450
- **FIDC's Assignment Fee:** \$300
- **Average Production maturity term:** 60 days
- **FIDC's Deferred Revenue:** \$150
- **Funding cost:** \$50
- Every **Credit is performed**
- **Supplier consolidates** FIDC's results in accordance with **IFRS 10**

Portfolio fully assigned to FIDC (No use of Floating)

Techfin's Results	Month 1			Month 2			YTD		
	Consolidated	Supplier	FIDC	Consolidated	Supplier	FIDC	Consolidated	Supplier	FIDC
Revenue recognized	600	450	150	150	-	150	750	450	300
(-) Assignment	(300)	(300)	-	-	-	-	(300)	(300)	-
Techfin Revenue	300	150	150	150	-	150	450	150	300
(-) Funding Cost	(50)	-	(50)	(50)	-	(50)	(100)	-	(100)
Revenue Net of Funding	250	150	100	100	-	100	350	150	200

Note: The numbers used in this example are merely illustrative and randomly determined, without any real or projected basis, in order to facilitate the understanding of the examples provided.

EXAMPLE 2: CREDIT OPERATION SUPPLIER

28

Description of the Operation

Example of a credit operation originated by Supplier, not assigned to the FIDC, and using Supplier's floating.

Floating is the fund generated by Supplier due to the payment term to the Affiliate is longer than the payment term from FIDC to Supplier.

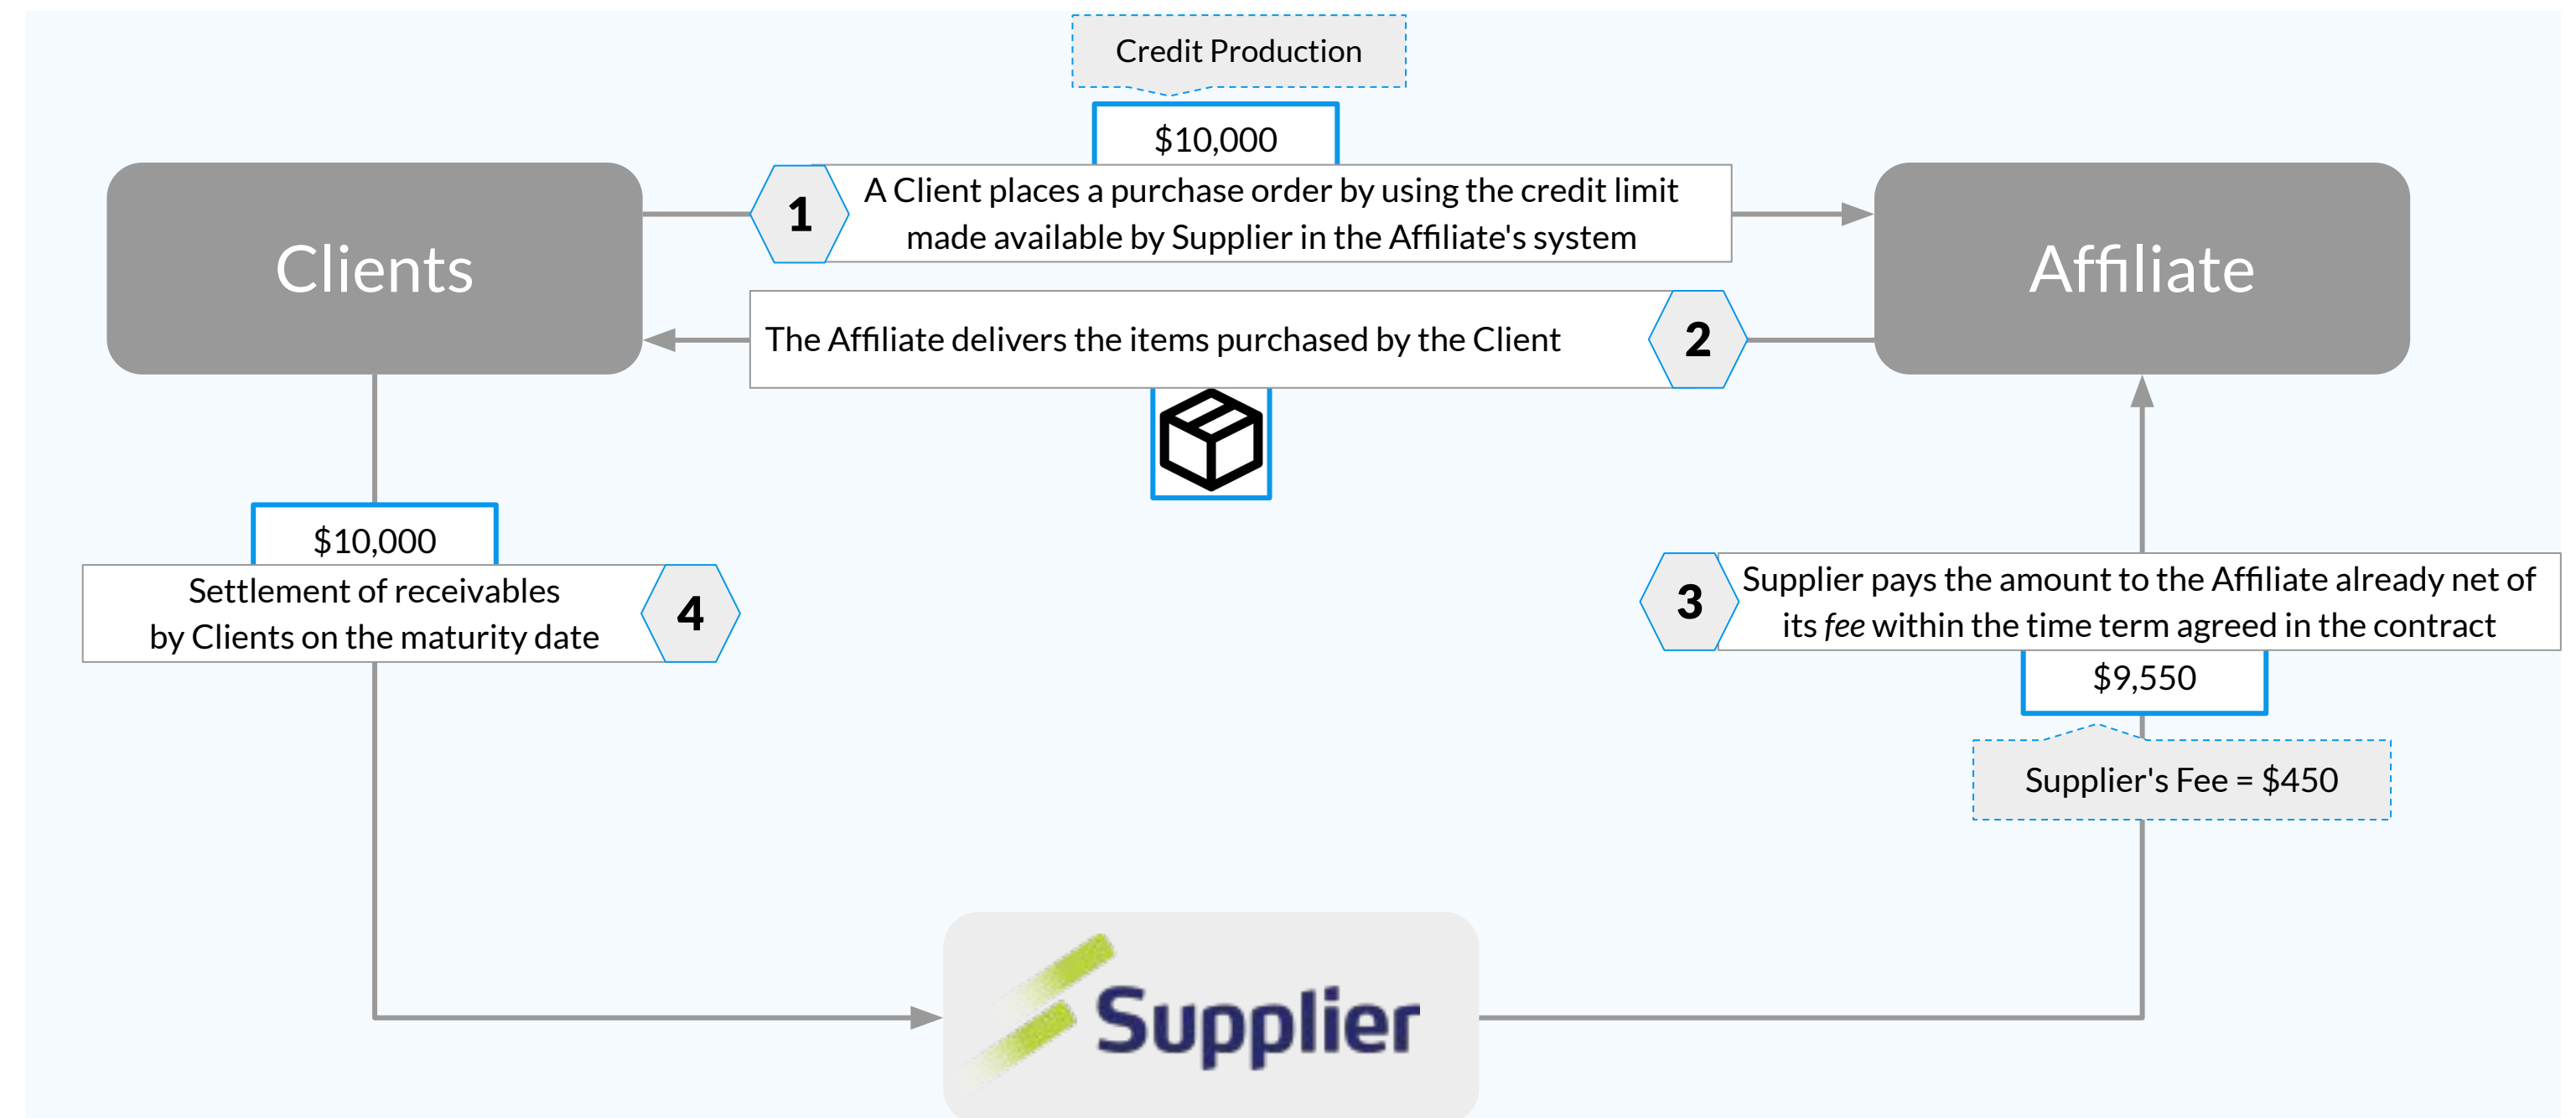

This is an operation model that has always been used by Supplier, seeking to: (i) improve the operation efficiency; (ii) optimize the use of FIDC; and (iii) meet credit demands that, at first, may not fit the FIDC's portfolio average maturity term.

In this kind of operation, the credit insurance coverage is higher to preserve Supplier's risk exposure, also counting on pre-approved bank loans in case an Affiliate may request to anticipate receivables.

Transaction Assumptions

- **Credit production:** \$10,000 (several receivables)
- **Supplier's Fee:** \$450
- Every **Credit is performed**
- **Supplier consolidates** FIDC's results in accordance with **IFRS 10**

No Portfolio is Assigned to the FIDC fund (by using Floating)

Techfin's Results	Month 1			Month 2			YTD		
	Consolidated	Supplier	FIDC	Consolidated	Supplier	FIDC	Consolidated	Supplier	FIDC
Revenue recognized	450	450	-	-	-	-	450	450	-
(-) Assignment	-	-	-	-	-	-	-	-	-
Techfin Revenue	450	450	-	-	-	-	450	450	-
(-) Funding Cost	-	-	-	-	-	-	-	-	-
Revenue Net of Funding	450	450	-	-	-	-	450	450	-

Note: The numbers used in this example are merely illustrative and randomly determined, without any real or projected basis, in order to facilitate the understanding of the examples provided.

EXAMPLE 3: CREDIT OPERATION - Partial Portfolio Assignment

29

Description of the Operation

Example of a credit operation with partial assignment to FIDC and using Supplier's floating.

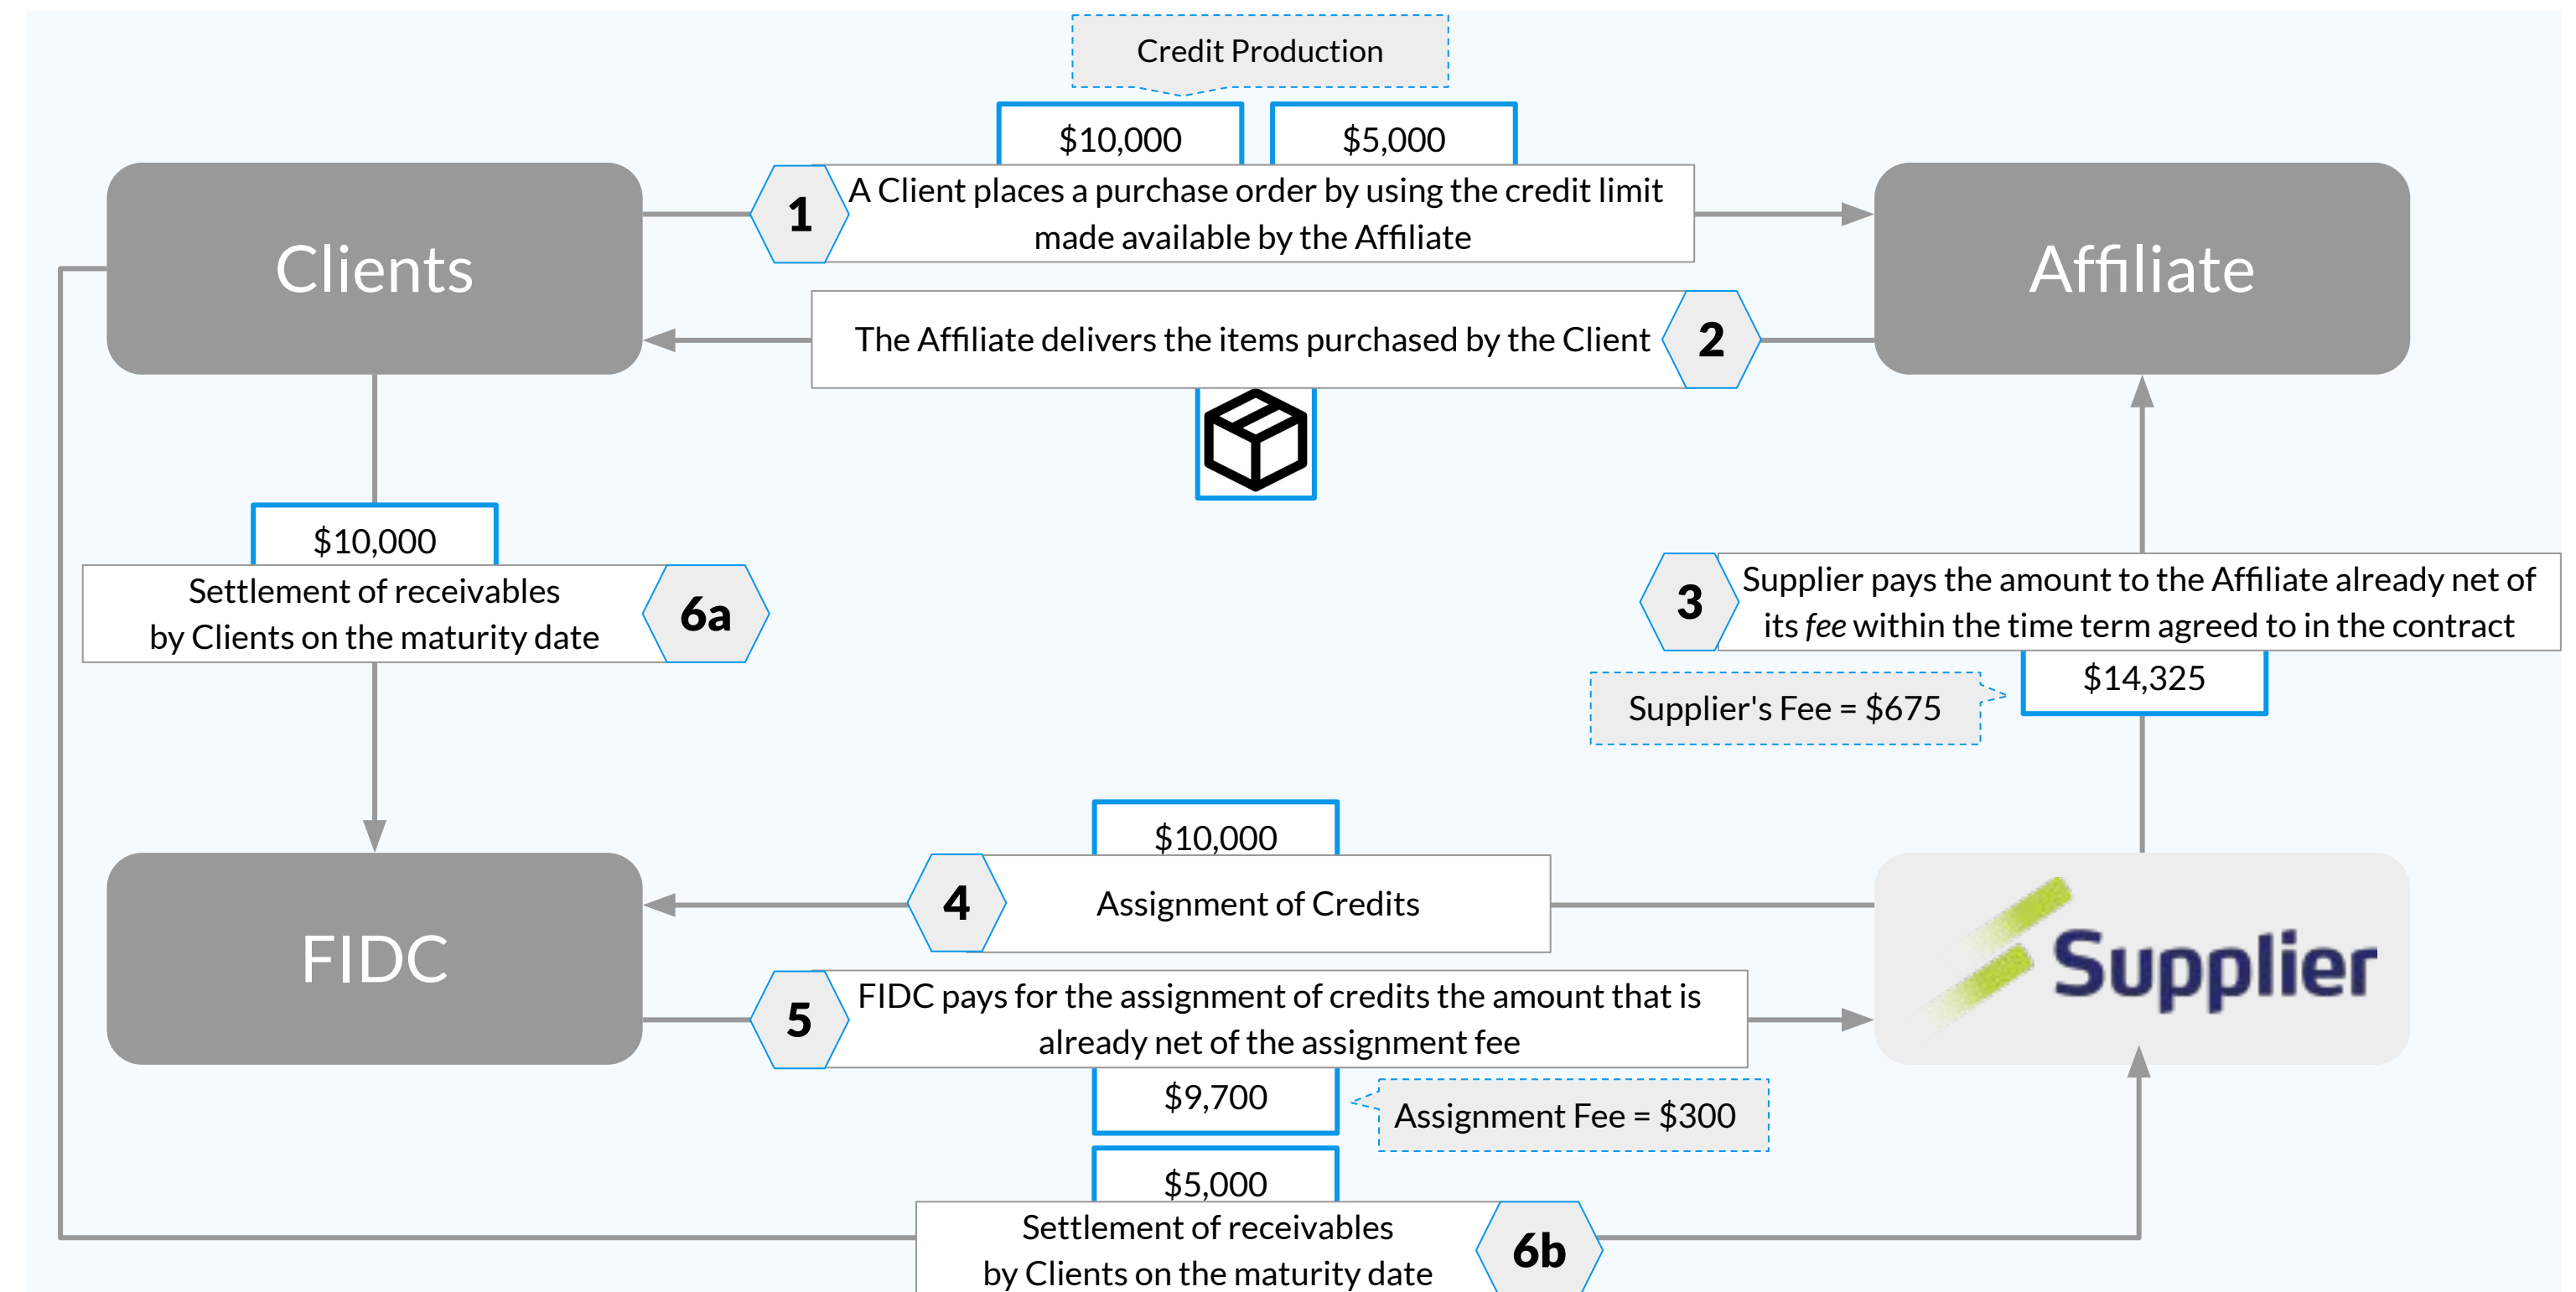

Supplier has always been using different transaction models, as consequence of the flexibility and the very characteristic of an operation that generates positive floating.

It is worth highlighting that none of such transaction models use any fund of TOTVS' software operation. Only funds of Supplier's balance sheet are used.

Transaction Assumptions

- **Credit production:** \$15,000 (several receivables)
- **Supplier's Fee:** \$675
- **Non-Assigned Production:** \$5,000
- **FIDC's Assignment Fee:** \$300
- **Average Production Maturity Term:** 60 days
- **FIDC's Deferred Revenue:** \$150
- **Funding Cost:** \$50
- **Every Credit is performed**
- **Supplier consolidates** FIDC's results in accordance with **IFRS 10**

Portfolio partially assigned to FIDC (by using Floating)

Techfin's Results	Month 1			Month 2			YTD		
	Consolidated	Supplier	FIDC	Consolidated	Supplier	FIDC	Consolidated	Supplier	FIDC
Revenue recognized	825	675	150	150	-	150	975	675	300
(-) Assignment	(300)	(300)	-	-	-	-	(300)	(300)	-
Techfin Revenue	525	375	150	150	-	150	675	375	300
(-) Funding Cost	(50)	-	(50)	(50)	-	(50)	(100)	-	(100)
Revenue Net of Funding	475	375	100	100	-	100	575	375	200

Note: The numbers used in this example are merely illustrative and randomly determined, without any real or projected basis, in order to facilitate the understanding of the examples provided.

EXAMPLE 4: CREDIT OPERATION - Portfolio Assigned in a Subsequent Period

30

Description of the Operation

Example of a credit transaction originated by Supplier and fully assigned to the FIDC in a different period.

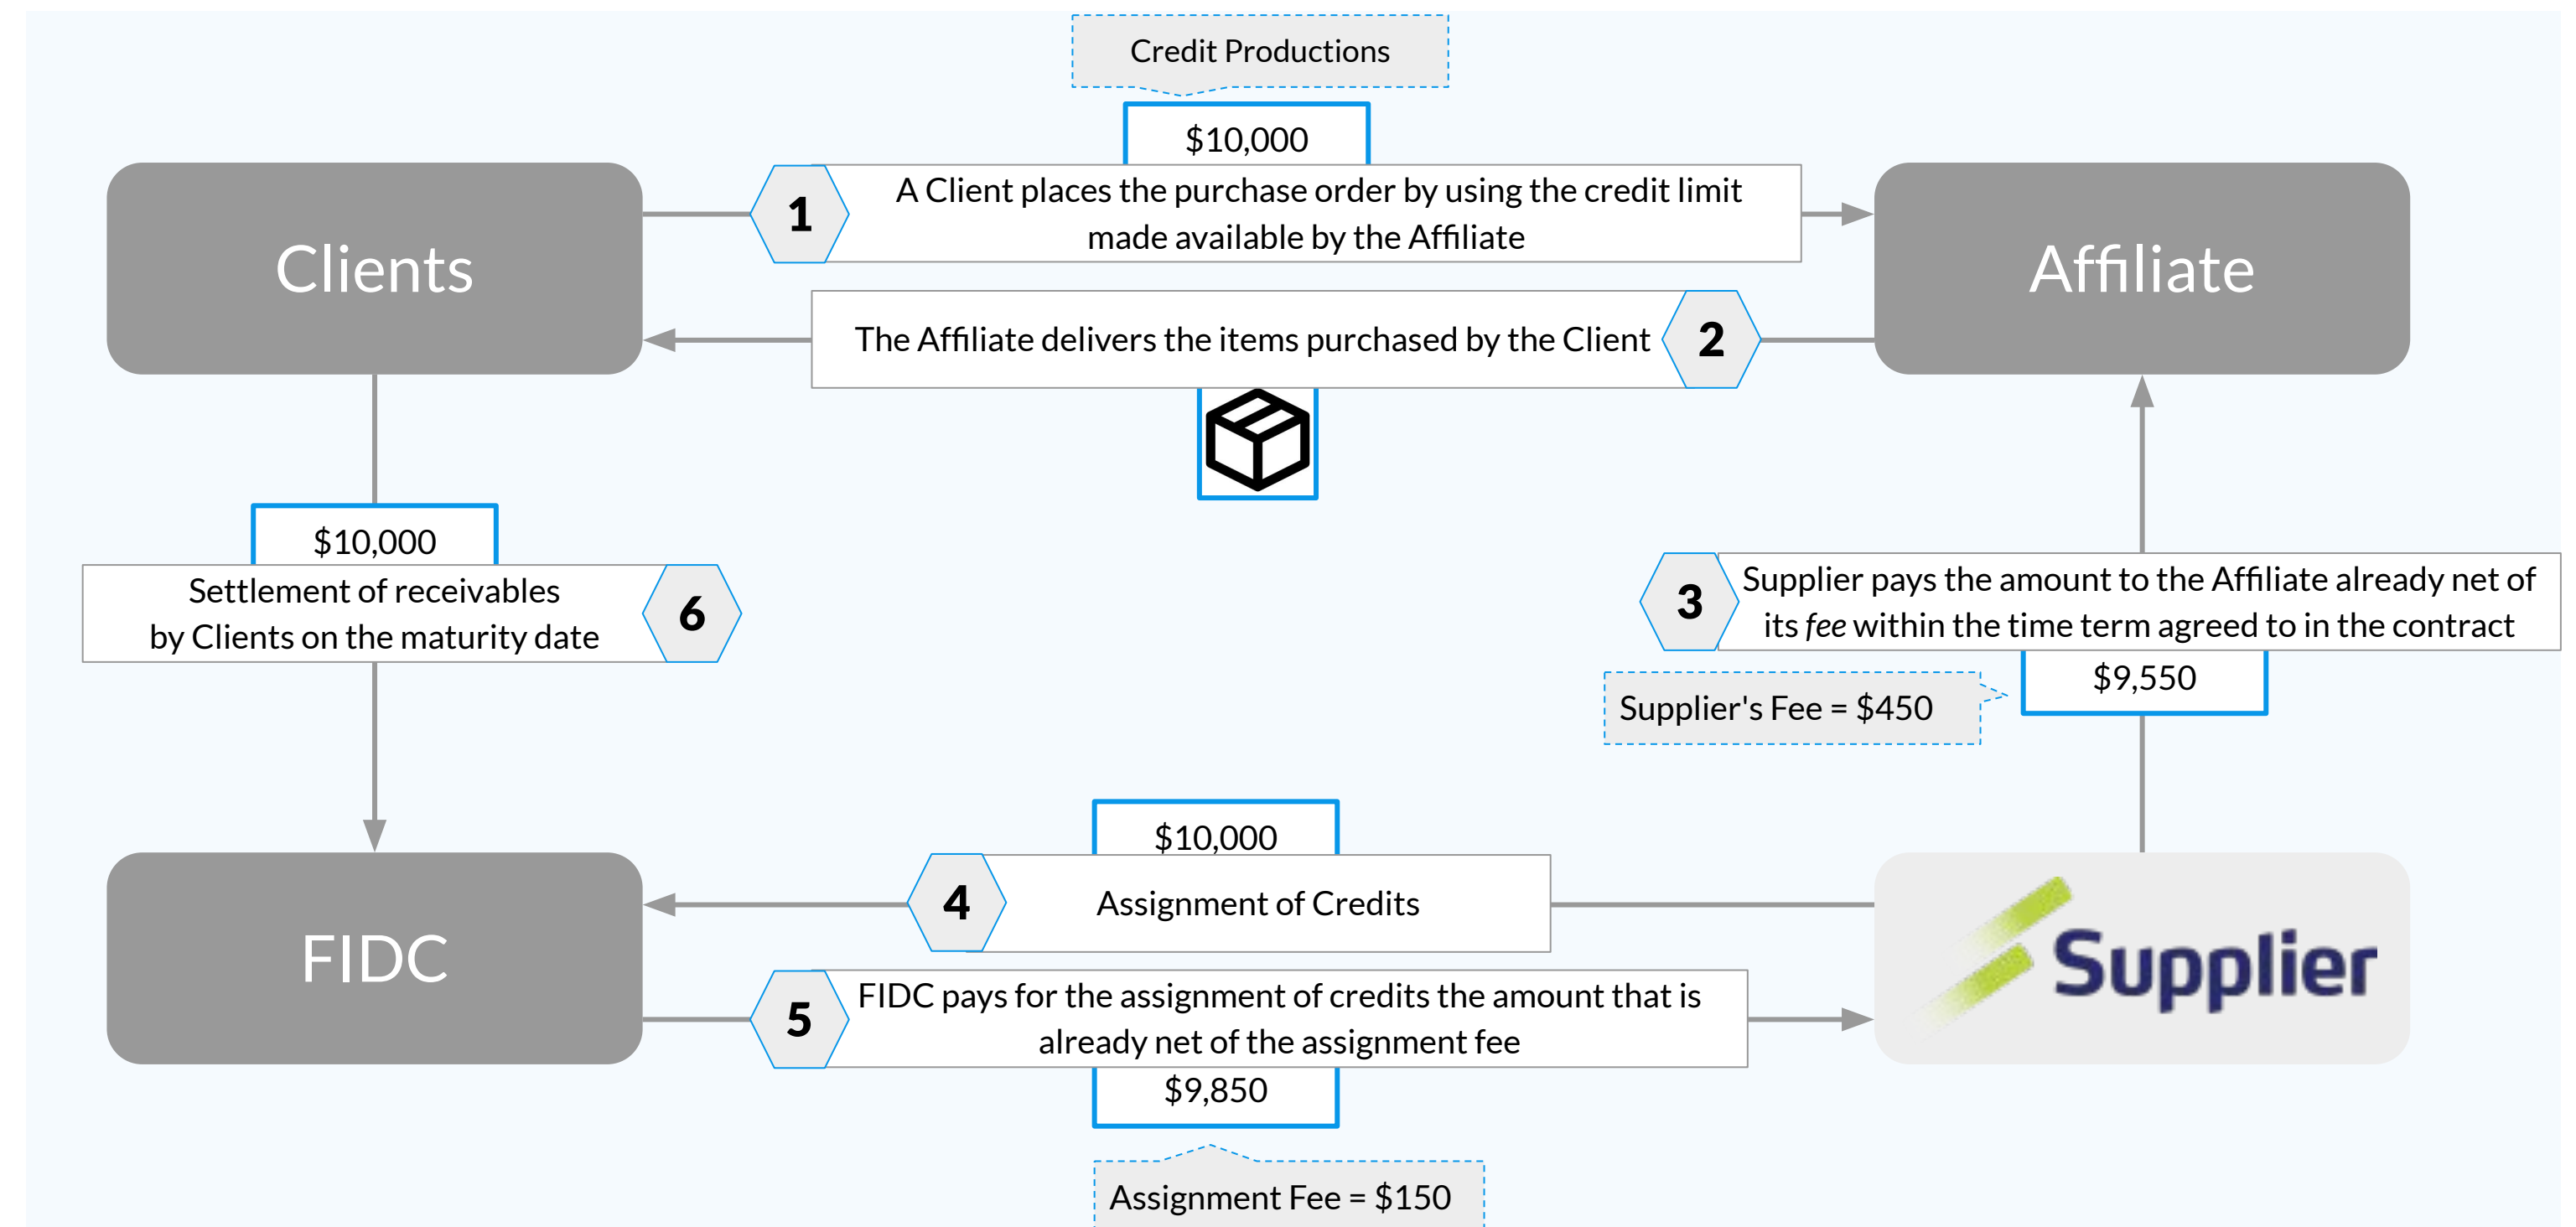

This model of operation is usual and meets the credit demands that, at first, do not fall within the FIDC.

Supplier, when carrying out the operation without assigning the credit portfolio to FIDC in the same period, carries the cost of assignment for the subsequent period. However, upon following up the consolidated Year to Date operation, the negative effect of the assignment is fully offset.

Transaction Assumptions

- **Credit production:** \$10,000 (several receivables)
- **Supplier's Fee:** \$450
- **FIDC's Assignment Fee:** \$150
- **Average Production Maturity Term:** 60 days
- **Funding Cost:** \$50
- **Every Credit is performed**
- **Supplier consolidates** FIDC's results in accordance with **IFRS 10**

Portfolio fully assigned to FIDC (by using Floating)

Techfin's Results	Month 1			Month 2			YTD		
	Consolidated	Supplier	FIDC	Consolidated	Supplier	FIDC	Consolidated	Supplier	FIDC
Revenue recognized	450	450	-	150	-	150	600	450	150
(-) Assignment	-	-	-	(150)	(150)	-	(150)	(150)	-
Techfin Revenue	450	450	-	-	(150)	150	450	300	150
(-) Funding Cost	-	-	-	(50)	-	(50)	(50)	-	(50)
Revenue Net of Funding	450	450	-	(50)	(150)	100	400	300	100

Note: The numbers used in this example are merely illustrative and randomly determined, without any real or projected basis, in order to facilitate the understanding of the examples provided.

EXAMPLE 5: CREDIT OPERATION - INCREASE IN THE ASSIGNMENT FEE

31

Description of the Operation

Example of a model with change in the FIDC's assignment fee.

The increase in the assignment fee may take place because of SELIC rate increase.

The effects of the increase in the assignment fee have an impact especially on “Revenue Recognized” and “Assignment” to FIDC. However, the effect of the increase in the assignment fee is neutralized when we follow up the Year to Date Consolidated view.

Transaction Assumptions

- **Credit production:** \$10,000 (several receivables)
- **Supplier's Fee:** from \$450 to \$540
- **FIDC's Assignment Fee:** from \$300 to \$360
- **Average Production Maturity Term:** 60 days
- **Funding Cost:** from \$50 to \$60
- Every **Credit is performed**
- **Supplier consolidates** FIDC's results in accordance with **IFRS 10**

Assignment Fee **\$300**

Techfin's Results	Month 1			Month 2			YTD		
	Consolidated	Supplier	FIDC	Consolidated	Supplier	FIDC	Consolidated	Supplier	FIDC
Revenue recognized	600	450	150	150	-	150	750	450	300

Note: The numbers used in this example are merely illustrative and randomly determined, without any real or projected basis, in order to facilitate the understanding of the examples provided.

EXAMPLE 6: CREDIT OPERATION - INCREASE IN PRODUCTION MATURITY TERM

×

Description of the Operation

Example of a model with change in the average maturity term of credit production.

The increase in the average portfolio term impacts the revenue recognized by the FIDC. The revenue is recognized on a pro rata basis; therefore, it is deferred over time.

The lengthening in the average production term increases the operation total revenue and deferred revenue of the FIDC.

Transaction Assumptions

- **Credit production:** \$10,000 (several receivables)
- **Supplier's Fee:** from \$450 to \$675
- **FIDC's Assignment Fee:** from \$300 to \$450
- **Average Production Maturity Term:** 60-90 days
- **Funding Cost:** \$50
- Every **Credit is performed**
- **Supplier consolidates** FIDC's results in accordance with **IFRS 10**

Financial & Operational 1Q22 Highlights

CONSOLIDATED RESULTS

Revenue net of Funding⁽¹⁾ **grew 34% vs 1Q21**, with emphasis on the growth of **26% Management Net Revenue**

NET REVENUE (Non-GAAP)⁽¹⁾

● Other Management ● SaaS Management ● Biz Performance ● Techfin

FINANCIAL & OPERATIONAL HIGHLIGHTS

Rule of 40

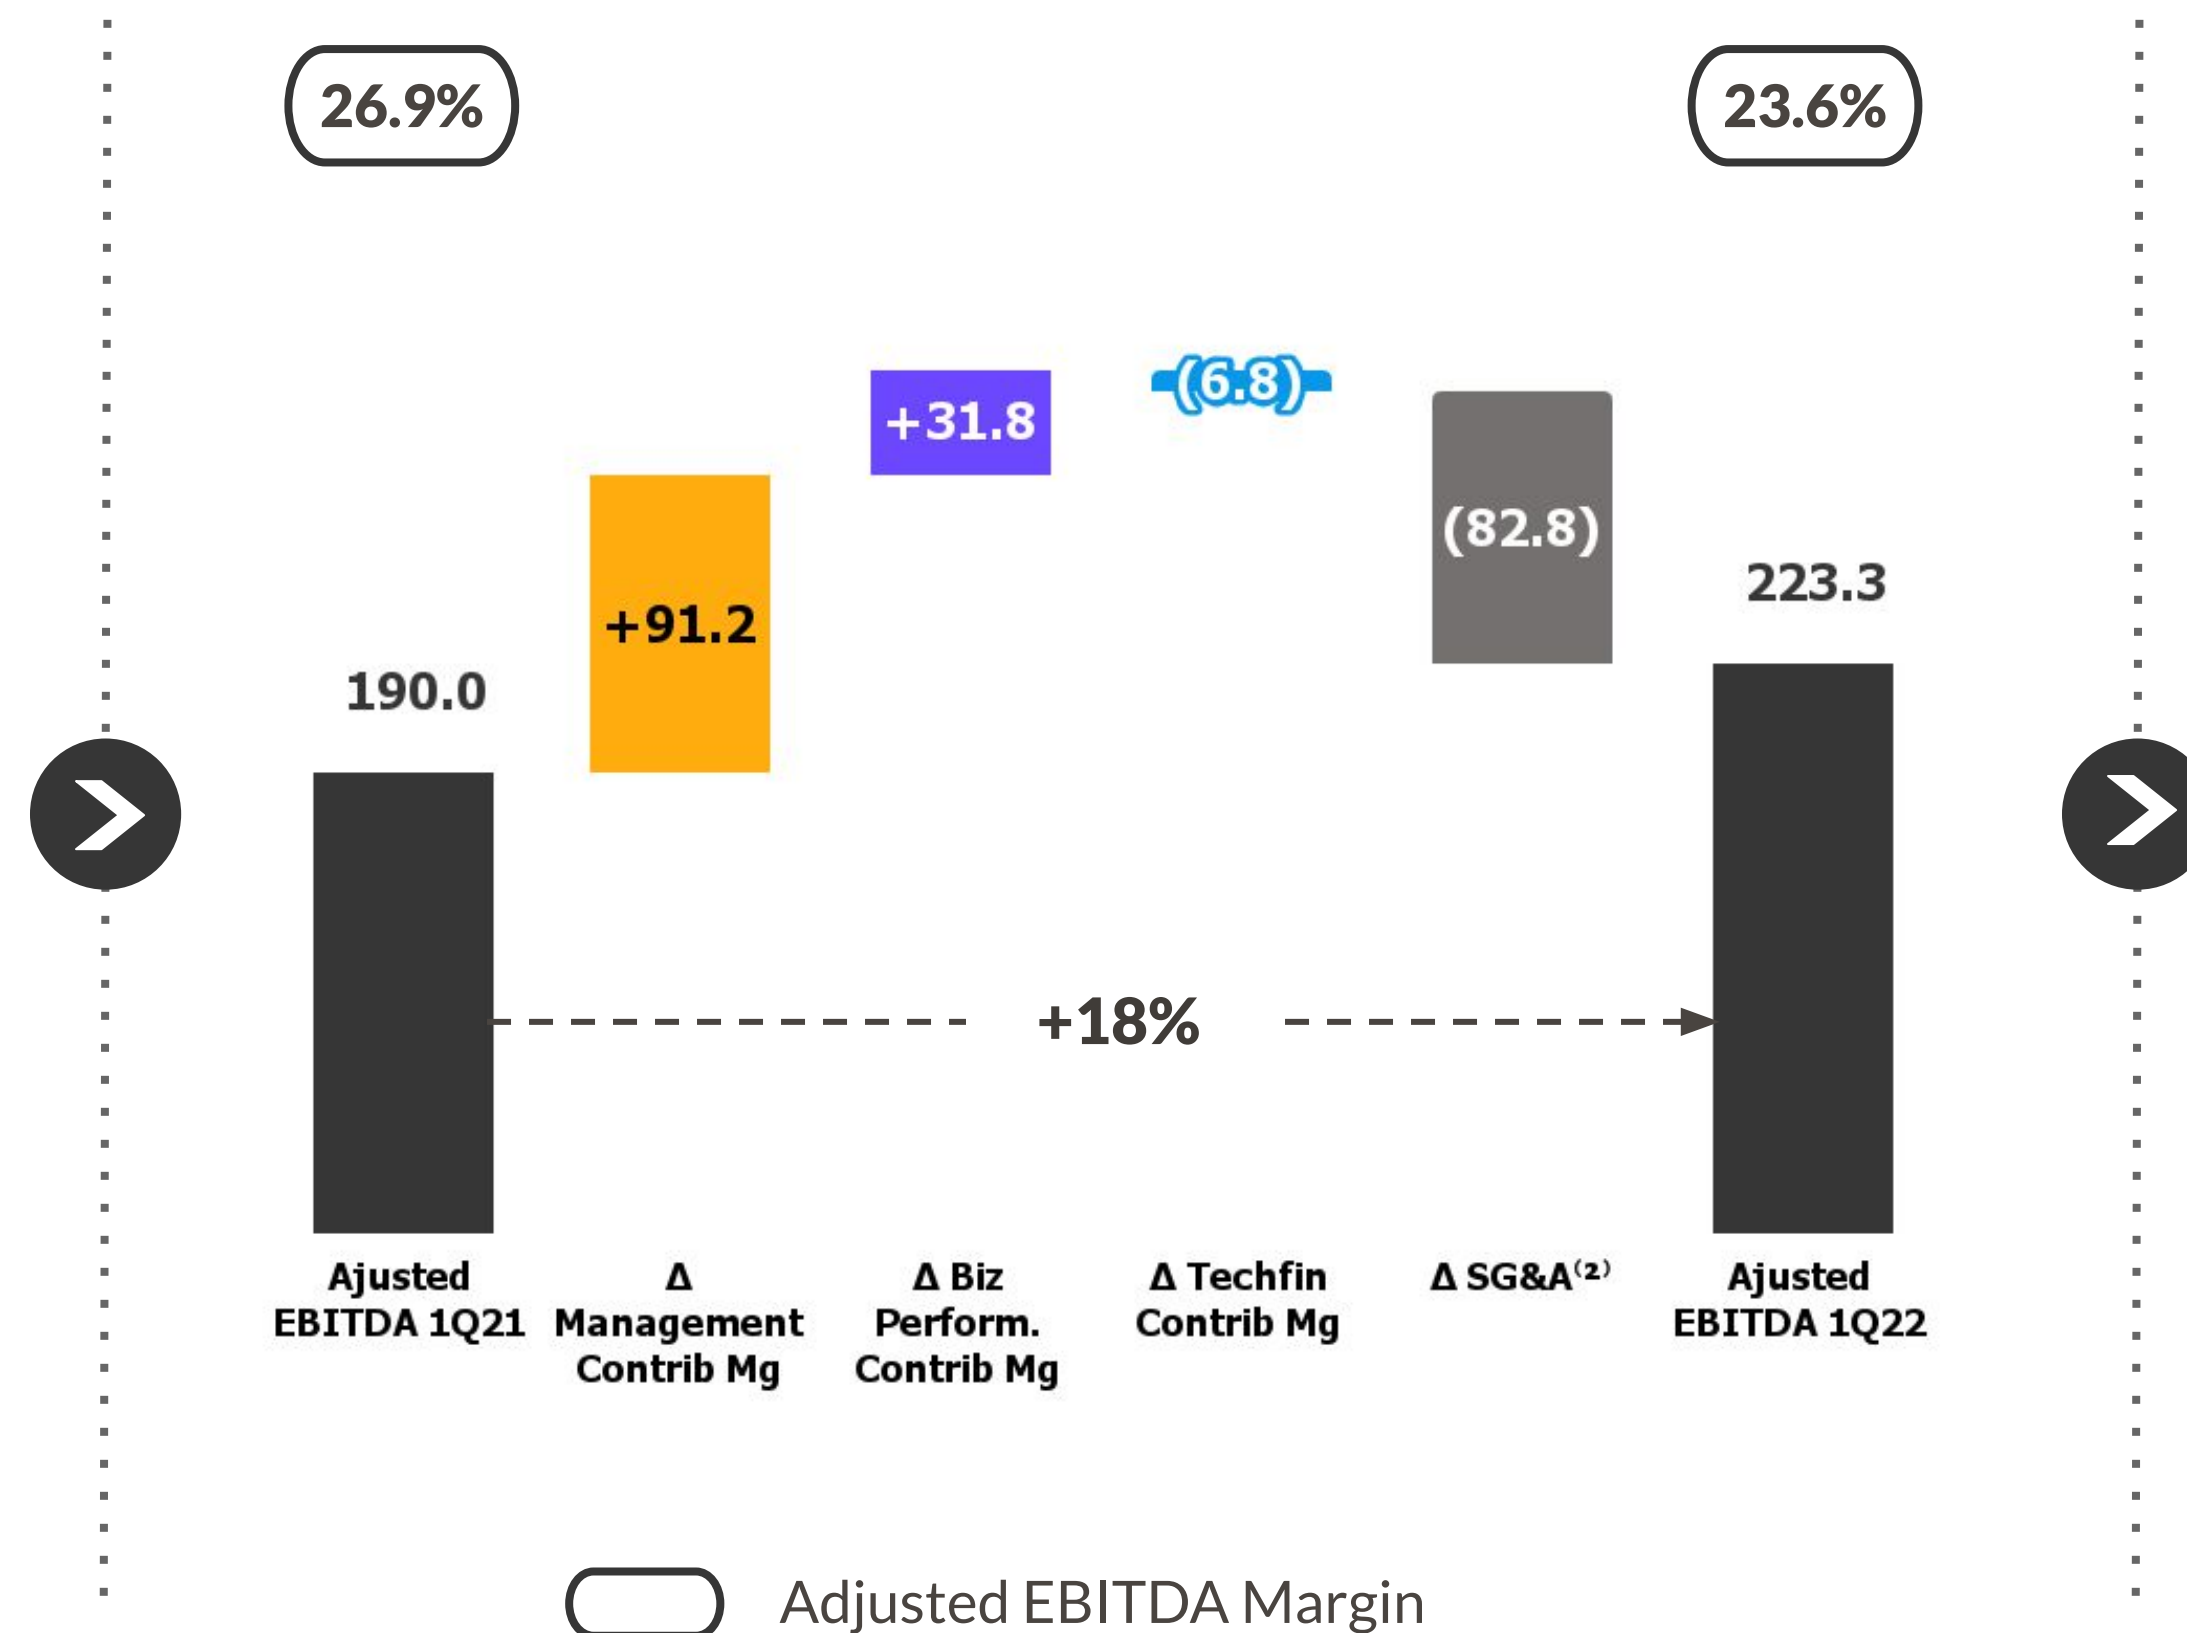

The acceleration of revenue growth, concentrated in recurring, transactional revenues, and the historical record of licenses from the Corporate Model, resulting in 13 p.p. increase in the Rule of 40

CONTRIBUTION MARGIN / NET REVENUE (1Q22)

Contribution Margin
(**Business Performance**+**Techfin**) / Total
11.3% (1Q22) vs 8.3% (1Q21)

ADJUSTED EBITDA 1Q22 vs. 1Q21 (R\$ million)

RULE OF 40

5.2

3-Dimensional Ecosystem

3-DIMENSIONAL ECOSYSTEM - MANAGEMENT

39

Management

Two important milestones achieved in this quarter: **organic growth of 26% in Recurring Revenue** and an increment of licenses in the Corporate Model of R\$37 million.

RECURRING REVENUE
R\$677 million (+27% YoY)

SaaS Signings: 77% of new signings in 1Q22

New clients: 30% of SaaS signings in 1Q22

% of Recurring Revenue vs. Management Revenue

ARR NET ADDITION RECORD
R\$247 million (+2.7x vs 1Q21)

33% YoY ARR Growth on 1Q21:

~69% **Volume** - new signings (boosted by the R\$51 million addition from Corporate Model)

~31% **Preço** - contractual readjustments (Pricing Power + business model resilience)

ARR Net Addition
 Inorganic Addition

Quarter Highlights

SaaS - Management (R\$ million)

CLOUD

- 29% increase of Cloud customers vs 1Q21
- 46% growth on Pure Cloud
- Adoption increase of the T-Cloud Platform
- Expanding Availability Zones

1Q22

EARNINGS PRESENTATION

CONTRIBUTION MARGIN

Increase of 130 basis points in the Contribution Margin in the quarter over quarter, exceeding the range of R\$450 million, even with an **increase of almost 2.3 times greater than cost inflation**, while the average revenue inflation remained at stable levels versus 2021, which demonstrates the solidity and scalability of the business model.

3-DIMENSIONAL ECOSYSTEM - BUSINESS PERFORMANCE

41

Business Performance

Net Revenue for the quarter grew 33% versus 1Q21, on the same comparison basis, driven by the 34% increase in Recurring Revenue

REVENUE (R\$ million)

RECURRING REVENUE 1Q22

 % of Recurring Revenue vs. Biz Performance Revenue

Quarter Highlights

ARR (R\$ million) organic +34% YoY

Digital Commerce

- GMV (Gross Merchandise Volume) reaching R\$300 million annualized, + 150% vs 1Q21
- +200 clients in production (generating GMV) 2.5x vs 1Q21
- New head for the Digital Commerce

Notas: (1) Considers the unaudited results of RD Station from Jan-Mar/21, for comparative purposes only

CONTRIBUTION MARGIN

The reduction of 240 basis points compared to 1Q21 was mainly due to the higher level of investments in R&D. The operation is profitable, with very positive economic units, which reinforces the dimension's high potential for generating value.

RD Station Premium
LTV / CAC

Notas: (1) Considers the unaudited results of RD Station from Jan-Mar/21 and Tail from Jan-Dez/21

3-DIMENSIONAL ECOSYSTEM - TECHFIN

43

Techfin

Credit Portfolio of R\$1.8 billion (highest historical level and +30% vs 1Q21). Creation of the **Techfin JV** with Itaú Unibanco.

Techfin Revenue (R\$ million)

Techfin Revenue - Net of Funding (R\$ million)

Credit Portfolio and Production (R\$ bn)

Delinquency (% above 90 days)

Quarter Highlights

TOTVS + ITAÚ JV combines complementary expertises that bring benefits related to funding, amplify our ambition and accelerate the roadmap to build the best Financial Services Platform for SMB in Brazil

Supplier's Pipeline "Mais Negócios" Product (%)

58%
Prospecting
Affiliates

56%
Affiliates in
Deployment

CONTRIBUTION MARGIN

Techfin's Contribution Margin was 45% lower than in 4Q21, explained by (i) the portfolio assignment to the FIDC; (ii) mismatch between the Selic effect in the cost of funding versus its effect in the credit portfolio; and (iii) the reduction in volume of Credit Production in the quarter, combined with the higher level of Provision for losses in 1Q22. To help in the Techfin accounting consolidation, consult Section 05 of this document.

Notas: (1) Seasonal effects (2) Provision for Expected Credit Losses

ESG

AEGM 2022

+71% attendance of the Company's voting capital and had all the proposed matters approved, among them: capital budget, annual management compensation, and Board of Directors composition for the next two years.

TOTVS rating raised by Fitch from AA to AA+

The increase reflects, among others: the company's cash generation capacity, the expectation of preserving margins and the diversification of business by adding the Techfin and Business Performance dimensions, combined with a high growth potential.

FINAL REMARKS

WE KEEP GOING ON OUR JOURNEY TO BECOME A "TRUSTED ADVISOR" TO OUR CUSTOMERS

Our business dimensions present different performances and have what we call "different moments and mandates". This expression incorporates an important concept: we must be careful not to demand the same things from businesses that do not face the same reality. We can confidently say that we are taking that care.

When most performance indicators are heading in the right direction, we are often asked: "What is missing?". The answer is simple: "convert the 3 dimensions, which are solid in an autonomous way, into a true integrated, interconnected and interdependent ecosystem".

We believe that: (i) the value proposition of helping companies to improve their performance is strong and solid; (ii) technology is the way; and (iii) our journey to build this ecosystem is in full swing. We will continue to seek to make TOTVS the "trusted advisor" to most Brazilian companies. Always believing in a Brazil that makes it happen!

MANAGEMENT

Arrival of Gesplan, an acquisition with a management rationale, but which also has very important secondary repercussions for the Techfin dimension, further strengthening the Management dimension, which has shown strong growth and successive record breaks.

BUSINESS PERFORMANCE

The arrival of a new head of Digital Commerce and the advances in the cross and upsell strategy of RD Station, strengthened by planning a portfolio synergy pilot between RD Station and TOTVS, are examples of our conviction in a dimension with high potential of value generation.

TECHFIN

TOTVS+Itaú JV will revolutionize the way of contracting and consuming financial services, benefiting the SMB and the entire production chain in Brazil as it seeks to expand, simplify and democratize access to a wide range of products in the B2B market.
