

1. OPERATIONAL CONTEXT

Cia de Ferro Ligas da Bahia - FERBASA ("Ferbasa" or "Company") is a publicly-held company, headquartered in Pojuca - BA, registered with the Brazilian Securities and Exchange Commission (**CVM** – Comissão de Valores Mobiliários) and has shares traded on the São Paulo Stock Exchange (B3 S.A. – Brasil, Bolsa, Balcão). Ferbasa started its activities 63 years ago, on February 23, 1961, and operates sustainably in the areas of chromite mining, metallurgy in the production of ferroalloys, renewable forest resources and wind energy generation, all in the State of Bahia. Its parent company is the José Carvalho Foundation, a non-profit entity with an indefinite duration, whose primary objective is to provide quality education to children and young people in need.

This interim accounting information, both individual and consolidated, contained in the Quarterly Information Form – ITR (Portuguese acronym that stands for *Formulário de Informações Trimestrais*) for the semester ended June 30, 2024, was approved by the Company's Board of Directors on August 9, 2024.

1.1 Effects of the Russia-Ukraine conflict, and Israel-Hamas conflicts

In addition to the relief from tensions resulting from the pandemic, which led to a drop in commodity prices, more recently, the intensification of protectionist actions in many countries and the conflicts between Russia and Ukraine, and between Israel and Hamas, have brought new challenges to international trade. More specifically, protectionism has been generating a pent-up trade of products in some regions and an oversupply in others, while the bottleneck of maritime traffic in the Suez Canal and in many important commercial logistics circuits is hampering the availability and attendance of ships and containers.

The national scenario reflects a difficult time for the steel industry, which has already signaled discomfort with the growth in steel imports, especially those of Chinese origin. In the case of exports, the international panorama has been significantly impacted by the protectionist actions recently intensified by the United States. This set of factors affected the Company's sales pace in the semester.

1.2 Accounting impacts related to climate change and ESG agenda

**FERBASA** has historically prioritized actions in its corporate agenda that contribute to the evolution of the ESG agenda. As a result of the first diagnosis focused on the topic, a roadmap was drawn up that aims to accelerate progress related to sustainability. As one of the outcomes of this work, we incorporated a specific topic called "ESG Agenda" into the Management Report, which aims to inform and disclose the main updates related to the matter to our Stakeholders.

As of June 30, 2024, the Company does not have: (i) loans or financing linked to green targets or commitments; (ii) insurance related to ESG aspects; (iii) carbon credit transactions; (iv) ESG risk linked to inventories or impact on the useful or residual life of its assets; (v) provisions or contingent liabilities constituted related to ESG, in addition to the environmental provision already disclosed by the Company; and (vi) risk of discontinuity of its operations.

The Company understands that there is no significant impact on the individual and consolidated interim accounting information resulting from the ESG or climate change issue as of June 30, 2024.

1.3 Consumption Tax Reform

On December 20, 2023, Constitutional Amendment (EC – Portuguese acronym that stands for

*Emenda Constitucional*) No. 132 was enacted, establishing the Tax Reform ("Reform") on consumption. Several issues, including the rates of the new taxes, are still pending regulation by Complementary Laws (LC – Portuguese acronym that stands for *Leis Complementares*), which must be forwarded for evaluation by the National Congress within 180 days. The Reform model is based on VAT divided ("dual VAT") into two jurisdictions, one federal (Contribution on Goods and Services - CBS – Portuguese acronym that stands for *Contribuições sobre Bens e Serviços*) and one subnational (Tax on Goods and Services – IBS – Portuguese acronym that stands for *Imposto sobre Bens e Serviços*), which will replace the PIS, COFINS, ICMS and ISS taxes. A Selective Tax (IS – Portuguese acronym that stands for *Imposto Seletivo*) was also created - under federal jurisdiction, which will be levied on the production, extraction, marketing or import of goods and services that are harmful to health and the environment, under the terms of the LC. On July 10, 2024, the regulation of the Tax Reform was approved by the Chamber of Deputies and the text will now be analyzed by the Federal Senate.

There will be a transition period from 2025 to 2033, during which the two tax systems - old and new - will coexist. The impacts of the Reform on the calculation of the aforementioned taxes, from the beginning of the transition period, will only be fully known when the process of regulating the pending issues by LC is completed. Consequently, there is no effect of the Reform on the individual and consolidated interim accounting information, as of June 30, 2024.

## 2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

### 2.1. Basis of Preparation

This interim accounting information should be read along with the Company's audited financial statements from December 31, 2023, which were prepared and presented in accordance with accounting practices adopted in Brazil, including the pronouncements issued by the Accounting Pronouncements Committee - CPC and in accordance with International Financial Reporting Standards - IFRS, issued by the International Accounting Standards Board - IASB, currently referred to by the IFRS Foundation as "IFRS® Accounting Standards", including the interpretations issued by the IFRS Interpretations Committee (IFRIC® Interpretations) or by its predecessor agency, Standing Interpretations Committee (SIC® Interpretations), evidencing all relevant information specific to the financial statements, and only such information, which is consistent with that used by Management.

(i) Adoption of new and/or revised accounting pronouncements, guidelines and interpretations. As disclosed in note 7 to the financial statements from December 31, 2023, the Company analyzed the new pronouncements and found that there were no significant changes to those disclosed for this individual and consolidated interim financial information, due to their adoption.

(ii) Interim financial information

The Company's individual and consolidated interim accounting information was prepared and is being presented in accordance with technical pronouncement CPC 21 (R1) - Interim Financial Statements and international standard IAS 34 - "Interim Financial Reporting", which aim to establish the minimum content of an interim financial statement.

The preparation of the interim financial information requires the use of certain critical accounting estimates, as well as the exercise of judgment by the Company's Management regarding the process of applying its accounting practices. There were no significant changes in the assumptions and judgments adopted by the Company's Management regarding the

Management's Explanatory Notes to Intermediate, Individual, and Consolidated Accounting Information  
 Three-month and six-month period ending June 30, 2024  
 In thousands of dollars, unless otherwise indicated

use of estimates to prepare this interim financial information, in relation to those used in the financial statements from December 31, 2023.

The material accounting policies applied in the preparation of this quarterly interim financial information are consistent with those disclosed in note No. 6 to the Company's financial statements from December 31, 2023, filed with the CVM on March 6, 2024 and, therefore, should be read in conjunction with this interim financial information.

### 3. FINANCIAL INSTRUMENTS

#### 3.1. Classification of financial instruments and fair value hierarchy

The main financial instruments assets and liabilities are shown below:

| Accounting Measurement                 | Parent                            |            | Consolidated |            |         |
|--|-----------------------------------|------------|--------------|------------|---------|
|  | 06/30/2024                        | 12/31/2023 | 06/30/2024   | 12/31/2023 |         |
| <u>Assets</u>                          |                                   |            |              |            |         |
| Cash and cash equivalents              | Amortized cost                    | 280,696    | 215,629      | 388,908    | 341,787 |
| Current financial applications         | Fair value through profit or loss | 366,703    | 463,299      | 366,703    | 463,299 |
| Non-current financial investments      | Fair value through profit or loss | 238,573    | 314,566      | 291,374    | 367,541 |
| Accounts receivable from Costmers      | Amortized cost                    | 163,776    | 187,035      | 175,475    | 197,566 |
| Judicial deposits                      | Amortized cost                    | 8,773      | 8,970        | 9,323      | 9,520   |
| <u>Liabilities</u>                     |                                   |            |              |            |         |
| Suppliers                              | Amortized cost                    | 118,175    | 141,966      | 124,279    | 147,832 |
| Advance payment of Costmers            | Amortized cost                    | 12,024     | 29,419       | 12,024     | 29,419  |

| Current loans and financing            | Amortized cost                    | 46,417     | 46,058       | 72,379     | 72,676  |
| Funding cost                           | Amortized cost                    | -          | -            | (455)      | (455)   |
| Current loans and financing            |                                   | 106,550    | 46,058       | 132,057    | 72,221  |
| Non-current loans and financing        | Amortized cost                    | 1,043      | 15,052       | 176,190    | 202,296 |
| Funding cost                           | Amortized cost                    | -          | -            | (2,904)    | (3,132) |
| Non-current loans and financing        | Amortized cost                    | 1,043      | 15,052       | 173,286    | 199,164 |
| Current CCEE reimbursement account     | Amortized cost                    | -          | -            | 22,466     | 64,841  |
| Non-current CCEE reimbursement account | Amortized cost                    | -          | -            | 42,653     | 2,254   |
| Current rents payable                  | Amortized cost                    | 57,000     | 44,010       | 57,628     | 44,634  |
| Non-current rents payable              | Amortized cost                    | 18,876     | 19,584       | 25,549     | 26,452  |

#### 3.2. Risk Management

The Company's activities expose it to various financial risks, such as: (i) exchange rate risk, (ii) interest rate risk, (iii) credit risk, (iv) liquidity risk, (v) concentration risk, (vi) commodity price risk and (vii) other non-financial risk factors.

Risk management focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

##### 3.2.1. Currency Risk

Exchange rate risk arises from the mismatch between the functional currency (Real) and transactions in foreign currency (US Dollar), including Accounts receivable from Costmers, Advances on Exchange Contracts (ACC – Portuguese acronym that stands for *Adiantamentos sobre Contratos de Câmbio*) and export exchange rate lock contracts.

For sensitivity analysis purposes, the Company adopted as scenario I (probable) the expected average exchange rate for the year 2024, as per the Focus Report of July 15, 2024.

| Due date                       | 06/30/2024 |     | Scenario I |                     |
|--------------------------------|------------|-----|------------|---------------------|
|                                | US\$       | R\$ | Rate       | Gain/ (Loss)<br>R\$ |
| <u>Parent and Consolidated</u> |            |     |            |                     |

Management's Explanatory Notes to Intermediate, Individual, and Consolidated Accounting Information  
 Three-month and six-month period ending June 30, 2024  
 In thousands of dollars, unless otherwise indicated

|  |            |        |        |        |         |
|--|------------|--------|--------|--------|---------|
| Accounts receivable from clients (net PECLD) | -          | 10,000 | 55,583 | 5.2200 | (3,383) |
| Advance Exchange Contract (ACC)              | 2Q of 2025 | 10,770 | 59,869 | 5.2200 | 3,650   |

For sensitivity analysis purposes, the Company adopted as scenario I (probable) the expected average exchange rate for the year 2024, as per the Focus Report of July 15, 2024.

|                                | Due date   | 06/30/2024 - Contracted |        |                             | Scenario I |                  |
|--------------------------------|------------|-------------------------|--------|-----------------------------|------------|------------------|
|                                |            | US\$                    | R\$    | Weighted average rate (R\$) | Rate US\$  | Gain/ (Loss) R\$ |
| <u>Parent and Consolidated</u> |            |                         |        |                             |            |                  |
| Export hedges                  | 3Q of 2024 | 2,656                   | 14,099 | 5.3084                      | 5.2200     | 235              |

### 3.2.2. Interest rate risk

Interest rate risk arises from the possibility, due to changes in the financial market, of changing the values of securities acquired in the portfolio of financial investments arising from their mark-to-market, the choice of indexes and the option for fixed or post-fixed rates, as well as the present value and cost of loans and financing.

For the balance applied on June 30, 2024, the Company and its subsidiaries consider as scenario I (probable) the basic interest rate for the end of 2024 of 10.50% per year, as per Focus Report of July 15, 2024.

| Interest Rate Risks                              | Closing rate<br>06/30/2024 – p.a. | Scenario I<br>Probable |
|--|-----------------------------------|------------------------|
| Average basic interest rate – (% p.a.)           | 10.50%                            | 10.50%                 |
| <u>Parent</u>                                    |                                   |                        |
| Balance of Financial Investments (Notes 4 and 5) | 877,796                           | 926,088                |
| Net Effect                                       |                                   | 48,292                 |
| <u>Consolidated</u>                              |                                   |                        |
| Balance of Financial Investments (Notes 4 and 5) | 1,033,082                         | 1,089,584              |
| Net Effect                                       |                                   | 56,502                 |

For the balance of loans and financing on June 30, 2024, the Company and its subsidiaries consider as scenario I (probable) the TJLP for the end of the year of 6.91% per year, and for the CDI (Interbank Deposit Certificate) of 10.40% per year.

| Interest rate risks (note 16)          | Closing Rate<br>06/30/2024 - p.a. | Scenario I<br>Probable |
|--|-----------------------------------|------------------------|
| <u>Interest rate - TJLP - (% p.a.)</u> | 6.67%                             | 6.91%                  |
| Parent:                                |                                   |                        |
| Balance of loans and financing         | 7,309                             | 7,556                  |
| Net Effect                             |                                   | (247)                  |
| <u>Interest rate - TJLP - (% p.a.)</u> |                                   |                        |
| Consolidated:                          |                                   |                        |
| Balance of loans and financing         | 208,418                           | 215,498                |
| Net Effect                             |                                   | (7,080)                |

Management's Explanatory Notes to Intermediate, Individual, and Consolidated Accounting Information

Accounts receivable from foreign markets are denominated in US dollars (US\$), converted to reais on the date of preparation of the interim financial information. On June 30, 2024 and December 31, 2023, the Company did not have any transactions that would generate a significant effect of adjustment to present value.

The Company had a provision for expected loss on doubtful accounts, in the amount of R\$222, on June 30, 2024 and December 31, 2023, considered sufficient to cover possible losses on accounts receivable, according to an internal analysis carried out by Management.

Accounts receivable by maturity date are shown below:

|                              | Parent         |                | Consolidated   |                |

## 9. CURRENT AND DEFERRED INCOME TAX AND SOCIAL CONTRIBUTION

Deferred income tax and social contribution are calculated on temporary differences between the tax calculation bases and the book values of Assets and Liabilities in the financial statements. The rates of these taxes, for determining deferred taxes, are 25% for IRPJ and 9% for CSLL.

|  | Parent           |                  | Consolidated     |                  |

(i) Due to the industrial enterprise installed in the area covered by the Superintendence of Development of the Northeast (SUDENE), the Company seizes the tax benefit of reducing income tax, with a percentage reduction of 75% on income tax and non-refundable surcharges, revenue incident:

- From the manufacture of ferroalloys and their by-products, from January 1<sup>st</sup>, 2015 to December 31<sup>st</sup>, 2024, according to Constitutive Report of No. 0200/2015.
- From the exploration and processing of Chromium ore and its by-products, from January 1<sup>st</sup>, 2016 to December 31<sup>st</sup>, 2025, according to Constitutive Report No. 0131/2016.
- From the generation of electricity, from January 1<sup>st</sup>, 2018 to December 31<sup>st</sup>, 2027, according to Constitutive Reports of No. 487, 488, 489, 490, 491, 492 and 428/2018, replaced by the 291, 292, 293, 300, 301, 302, and 303/2019 ones.
- Arising from the manufacture of crushed quicklime and crushed lime, in the period from January 1, 2023 to December 31, 2032, according to Constitutive Report No. 0021/2023.

Management's Explanatory Notes to Intermediate, Individual, and Consolidated Accounting Information  
 Three-month and six-month period ending June 30, 2024  
 In thousands of dollars, unless otherwise indicated

The portion corresponding to income tax reduction incentives is recognized in income and at the end of each fiscal year is transferred from retained earnings to the profit reserve (tax incentive), and cannot be distributed to shareholders.

The movement of deferred taxes during the first halves of 2024 and 2023 are presented below:

|   | <u>Parent</u>   | <u>Consolidated</u> |
|---|-----------------|---------------------|
| Balances on 31/12/2022 – Deferred Taxes Asset     | 17,845          | 16,823              |
| Recognized in the result                          | <u>(20,347)</u> | <u>(20,468)</u>     |
| Balances on 30/06/2023 – Deferred Tax Liabilities | <u>(2,502)</u>  | <u>(3,645)</u>      |
| Balances on 12/31/2023 – Deferred Tax Liabilities | (3,091)         | (4,321)             |
| Recognized in the result                          | <u>(23,059)</u> | <u>(23,133)</u>     |
| Balances on 06/30/2024 – Deferred Tax Liabilities | <u>(26,150)</u> | <u>(27,454)</u>     |

#### 10. JUDICIAL DEPOSITS

|         | <u>Parent</u>     |                   | <u>Consolidated</u> |                   |

- (ii) Refers to the full payment of the share capital of the subsidiary Ferbasa & CO and advance payment for the purchase of land for investment, in the amounts of R\$2,651 and R\$7,500, respectively..
- (iii) On February 9, 2024, the Company signed the closing term of the share purchase and sale agreement, for the acquisition of a 45% interest in *Sociedade NK 232 Empreendimentos e Participações S.A.* (a company of the Auren Energia S.A group). The total acquisition price was R\$37,822, the amount of which was initially recognized as fair value and subsequently measured at amortized cost using the effective rate, with a value updated on June 30, 2024 at R\$39,127, classified as other interests. This company's objective is to operate the *Ventos de São Ciro* (located in the Brazilian state of Piauí) and *Ventos de São Bernardo* (located in the Brazilian state of Pernambuco) wind farms, and will enable **FERBASA** to consume, under the self-production by equalization (APE – Portuguese acronym that stands for *Autoprodução por Equiparação*) regime, the electricity generated in said farms. Additionally, we simultaneously signed the Power Purchase and Sale Agreements (PPA) with the aforementioned Wind Farms, which will provide **FERBASA** with the supply of an average of 35MW of electricity for 20 years, with supply starting in 2025. There is an option to repurchase the aforementioned asset at the end of the contractual term.

13. BIOLOGICAL ASSETS (PARENT AND CONSOLIDATED)

Information regarding biological assets was presented in the Company's financial statements from December 31, 2023, in note 18.

Biological assets are represented by established and developing forests, intended to supply wood for the production of bio-reducer, which in turn is a raw material in the manufacture of silicon ferroalloys. The forests are located in Bahia. The movement in the balance of biological assets and the net effect of the change in fair value on profit or loss are shown below:

|  | 06/30/2024     | 12/31/2023     |
|--|----------------|----------------|
| At the beginning of the financial year | 348,553        | 276,279        |
| Plantings and maintenance              | 36,070         | 71,726         |
| Depletion                              | (17,235)       | (71,180)       |
| Write-off (i)                          | (1,024)        | -              |
| Fair value variation                   | -              | 71,728         |
| At the end of the financial year       | <u>366,364</u> | <u>348,553</u> |

(i) Loss of 62.11/ha (around 153.5 acres) of forests up to 1.7 years old, caused by damage caused by intense rain/winds.

## CIA DE FERRO LIGAS DA BAHIA – FERBASA AND SUBSIDIARIES

Management's Explanatory Notes to Intermediate, Individual, and Consolidated Accounting Information  
Three-month and six-month period ending June 30, 2024

---

On December 31, 2023, the net result of the change in biological assets was R\$39,237, due to the positive effect of R\$71,728 related to the change in fair value and the negative effect of R\$32,491 related to the consumption and sale of timber.

Forests in formation that are less than 2 (two) years old are maintained at historical cost due to Management's understanding that during this period the historical cost of the forest in formation approaches fair value.

To determine the fair value of biological assets, the discounted cash flow model was used, whose projections are based on a single projective scenario, with productivity and eucalyptus planting area for a cutting cycle of approximately 7 (seven) years. The period of cash flows was projected according to the productivity cycle of forestry projects. The volume of eucalyptus "standing timber" production to be harvested was estimated considering the average productivity per m3 of wood from each orchard at the harvesting age.

The fair values of biological assets were considered as level 3 in the fair value hierarchy defined by IFRS 13 / CPC 46 (information for assets or liabilities that are not based on data observable by the market, i.e., unobservable assumptions).

The Company has 5,222 hectares (around 12,904 acres) of biological assets pledged as collateral for financing with the National Bank for Economic and Social Development (BNDES – Portuguese acronym that stands for *Banco Nacional de Desenvolvimento Econômico e Social*).

The Company assesses the fair value of biological assets annually.

|   | 107,593    | 61,110     | 305,343      | 271,385    |

- (i) Long-term third-party capital for investment in the forestry area and for the acquisition of machinery and equipment allocated to metallurgy and mining.
- (ii) Financing from the National Bank for Economic and Social Development (BNDES), obtained on October 6, 2015, for the construction of wind farms. The guarantees offered for payment of the debt were: pledge of BW Guirapá shares, pledge of credit rights (O&M contract), pledge of emerging rights (independent producer authorization), pledge of machinery and equipment (wind turbines), fiduciary assignment of credit rights (revenue from energy sales and CER, and creation of reserve accounts) and bank guarantee.

The table below shows the main characteristics of the debts of the Company and its subsidiaries.:

| Modality | Salaries | Charges (annual) | Amortization | Guarantees                                 | Parent  | Consolidated |

Restrictive contractual clauses - "covenants"

The Company has financing agreements that include restrictive clauses requiring compliance with annual performance indexes, subject to early maturity of the debt in the event of non-compliance with the covenants.

On June 30, 2024 and December 31, 2023, Ferbasa met the index required in the financing agreements (Finame) in which the ratio between net financial debt and EBTIDA, Consolidateds, must be less than or equal to 2.5x throughout the term of the agreements.

Specifically, BW Guirapá and the Wind Farms are required to maintain, throughout the term of the BNDES financing agreement, the annual Consolidated debt service coverage ratio (ICSD – Portuguese acronym that stands for *Índice de Cobertura do Serviço da Dívida*) equal to or greater than 1.30, which was met on June 30, 2024 and December 31, 2023. In addition, they have as relevant obligations, compliance with deadlines to start and execute the commercial operation; presentation to BNDES of the respective operating licenses; maintain good standing with environmental agencies, CCEE, ANEEL, MME, the National Electric System Operator (ONS – Portuguese acronym that stands for *Operador Nacional do Sistema Elétrico*) and/or any other agencies and entities that are part of the Direct or Indirect Public Administration; as well as adopt measures and actions aimed at preventing or correcting damage to the environment, safety and occupational health. These clauses were met on June 30, 2024 and December 31, 2023.

---

who have worked at the Company for at least 10 (ten) uninterrupted years. This is a single payment to the employee at the end of their employment relationship.

- **FGTS fine:** The Company set up a post-employment benefit provision related to the FGTS fine upon retirement for employees exposed to harmful risks (special retirement), opting for the FGTS (*Service Time Guarantee Fund*), terminated at their request, and not remaining on the occasion of their termination. These special retirees will be entitled to the benefit as if they were terminated, as long as the length of service exceeds 5 or 8 years, depending on the location where they work.
- **Health care:** Employees who join the Company after the changes made in fiscal year 2022 will not be entitled to remain in the plan when retired or terminated. Employees with more than 30 years of uninterrupted employment, when terminated due to retirement and provided they assume the full cost of the plan, will be entitled to remain in the plan. Employees who were active before the changes, when terminated as retirees or not retired, will have the respective time limits (1 year for each year of contribution limited to 9 years and 1/3 of the contribution time with a minimum of 6 months and a maximum of 2 years, respectively) to remain in the plan provided that the legal requirements established for this purpose are met and assuming the full cost of the health care plan.

Information regarding labor and actuarial obligations was presented in the Company's financial statements as of December 31, 2023, in note 23.

20. DERIVATIVE AND NON-DERIVATIVE FINANCIAL INSTRUMENTS (PARENT AND CONSOLIDATED)

Funding raised through an advance on foreign exchange contracts (ACC) in the amount of R\$56.5 million, at an average discount of 6.4% per year, with monthly maturities in 2Q25, an average exchange rate of R\$/US\$5.25, with the aim of financing the growth of ferroalloy inventories and taking advantage of the favorable exchange rate level at the moment.

In addition, we inform that the Company has US\$2.7 million in export restraints, at an average exchange rate of R\$/US\$5.31 and with maturities of up to 120 days from the respective contracting.

Information on operations as of June 30, 2024 is shown in the table below:

| Salaries   | Financial instruments |               | Hedge object  |  |
|------------|-----------------------|---------------|---------------|--|
|            | Operation             | US\$          | R\$           | Operation  |
| 3Q of 2024 | Export Hedges         | 2,656         | 14,099        | Future sales<br>Advance on export<br>exchange contract |
| 2Q of 2025 | ACC                   | <u>10,770</u> | <u>60,133</u> |  |
|            |                       | <u>13,426</u> | <u>74,232</u> |  |

21. PROVISION FOR ENVIRONMENTAL LIABILITIES

The Company uses judgments and assumptions when measuring its obligations related to the provision for the closure of mines and wind farms, as well as the decommissioning of assets linked to its operations. The amount provisioned does not deduct costs potentially covered by insurance or compensation, because their recovery is considered uncertain.

The decommissioning costs were measured based on information available for the costs of dismantling equipment and civil works, inflated and discounted at the average cost of capital rate for each project. Therefore, the Company applied the technical interpretation ICPC 12 – Changes in Liabilities due to Decommissioning, Restoration and Other Similar Liabilities, recording the provision determined based on its best estimate of the costs to be incurred in dismantling this equipment at the end of the authorization, discounted to present value considering a long-term direct treasury rate discounted by inflation measured according to the IPCA.

The movements of these provisions are shown below:

|                                     | Parent        |               | Consolidated  |               |
|-------------------------------------|---------------|---------------|---------------|---------------|

The reduction in the balance mainly refers to the payment of the employer's social security contribution on the variable compensation of directors, thus generating in 2Q24, the reversal of the provision constituted in 4Q23.

The description of the Company's main contingent liabilities, including those that were considered as having a possible probability of loss by management and its legal advisors, was presented in the financial statements from December 31, 2023, in note 27 and there were no significant changes in its possible contingencies in this period.

Under an authorization regime, the BW Guirapá Wind Complex has all its production contracted for a period of twenty years with the Electric Energy Trading Chamber ("CCEE"), within the scope of the Reserve Auction - 2011 ("LER 2011") in the regulated environment. The reimbursement accounts (CCEE) refer to the differences between the contracted amount and the amount of electricity actually generated. The calculation criteria are contractually defined, through a tolerance limit between the energy actually generated and the contracted energy, as follows:

CIA DE FERRO LIGAS DA BAHIA – FERBASA AND SUBSIDIARIES

Management's Explanatory Notes to Intermediate, Individual, and Consolidated Accounting Information  
 Three-month and six-month period ending June 30, 2024  
 In thousands of dollars, unless otherwise indicated

- The contractual limit accepted, without the incidence of penalties or bonuses, is equivalent to the supply of 90% to 130% of the contracted energy for one year, calculated at the end of each quadrennium. In these cases, the positive or negative deviation between the energy supplied and the contracted energy is recognized in the assets or liabilities, respectively, by applying the updated contractual price on the MWh calculated. Any differences between the supply of electricity and the contracted energy will be compensated for each contractual quadrennium, with the first quadrennium ending on June 30, 2018, the second quadrennium ending on June 30, 2022, and the third quadrennium beginning in July 2022.
- If the energy supplied is less than 90% of the contracted energy, the due reimbursement will occur with the application of 115% of the current contractual price on the amount in MWh that is less than the contracted 90%. If the energy supplied is greater than 130% of the contracted energy, the Companies will receive 70% of the contracted price on the amount in MWh that exceeds the contracted 130%. In both cases, the financial settlement takes place from July of the current year until June of the following year.

Additionally, as of June 2023, the CCEE began recalculating the calculations of the reimbursements, considering the energy not supplied by *constrained off* wind farms. The effects were calculated for CCEARs and CERs, with the end of the contractual year until September 2021. For the period from October 2021, the reassessment schedule has not yet been disclosed, since the ANEEL Public Consultation No. 22/2022 process has not been concluded. The Company reflected in the segregation between current and non-current the schedule already disclosed.

| Social security charges | 4,790         | 1,678         | 5,198         | 2,011         |
|                         | <u>23,520</u> | <u>19,205</u> | <u>25,965</u> | <u>21,194</u> |

- (i) In the first half of 2024, R\$2,975 was recorded in relation to social security charges on variable remuneration, paid in April 2024.

The Company and its subsidiaries do not have key personnel other than those who are statutory employees, nor do they have share-based compensation plans or other long-term benefits, other than those disclosed in explanatory note 29 of the 2023 Financial Statements.

## 25. EQUITY

### 25.1. Share Capital

At the Board of Directors meeting held on August 28, 2023, the increase in share capital from R\$1,225,444 to R\$1,470,396 was approved, through the capitalization of part of the profit reserves in the amount of R\$244,952. This capitalization was carried out without the issuance of new shares. The subscribed and paid-in capital in shares is distributed as follows:

| Treasury shares          | 160,000            | 12,733,200         | 40,000            | 3,183,300         |
|                          | <u>117,760,000</u> | <u>235,520,000</u> | <u>29,440,000</u> | <u>58,880,000</u> |

- (i) At the Extraordinary General Meeting held on December 20, 2023, the stock split was approved, in the proportion of 01 (one) share for (four) shares, without any change in the value of the share capital. The shares began to be traded “ex-split” as of January 24, 2024 and the shares resulting from the split were credited to the shareholders on January 25, 2024.

The objective was to make its shares more accessible to investors and, consequently, to favor the increase in liquidity.

At the same EGM, the increase in the limit of the authorized share capital of the Company from R\$ 1,500,000 to R\$ 3,000,000 was approved.

The Company may, by resolution at the General Meeting, promote the increase of the various existing types and classes, without keeping proportion with the others or create a new class of preferred shares, observing the limit of 2/3 of the total shares issued for preferred shares without voting rights, or subject to restrictions regarding such right.

## 25.2. Treasury shares

The Company has shares acquired through a share buyback program. The shares acquired under the program will remain in treasury, and the decision on the sale and/or cancellation of these shares will be made at an appropriate time and will be duly communicated to the market. The volume of treasury shares and their respective market values, considering the closing price of the listing on B3, are as follows:

|                                       | 06/30/2024 (i) |         | 12/31/2023 |        |
|---------------------------------------|----------------|---------|------------|--------|
|                                       | PN             | ON      | PN         | ON     |
| Number of treasury shares (note 25.1) | 12,733,200     | 160,000 | 3,183,300  | 40,000 |
| Quotation on B3 - BRL/share           | 8.07           | 14.02   | 46.49      | 62.25  |
| Average acquisition cost - BRL/share  | 2.02           | 0.02    | 8.07       | 0.06   |

Preferred shares do not have voting rights and are guaranteed by statute the payment of dividends 10% higher than those paid to holders of common shares and priority in the repayment of capital.

25.3. Profit Reserves

- The legal reserve is constituted with an increase in the capital stock and the allocation of 5% of the profit for the year, up to 20% of the capital stock, and its use is restricted to the compensation of losses, after the balances of retained earnings and other profit reserves have been absorbed.
- The SUDENE tax incentive profit reserves, related to income tax, refers to the portion of the tax incentive from the income tax arising from the operating profit, and the ICMS DESENVOLVE related to the gain from the tax incentive on the balance due from the tax on the circulation of goods. These reserves are constituted by transferring the portion of the tax incentive that affected the income tax and ICMS expenses for the year and cannot be distributed to shareholders. The reserve for SUDENE also includes the amount of income tax reinvestment.
- The profits, after the appropriation of the legal reserve, profit reserve (tax incentive) and attribution of dividends to be distributed to shareholders, are transferred to the profit retention reserve account for investments, to be carried out in accordance with the Company's capital budget and strategic planning. In fiscal year 2023, the prescribed dividends in the amount of R\$ 677 were reverted to the profit reserve account, in accordance with Law No. 6,404/76.

25.4. Other Comprehensive Income and Equity Valuation Adjustment

Other comprehensive income comprises income and expense items (including reclassification adjustments), which are not recognized in the income statement as required or permitted by the pronouncements, interpretations and guidance issued by the CPC. Created by Law No. 11,638/07, the group of "Equity Valuation Adjustments" maintained in the Company's shareholders' equity includes valuation adjustments with increases and decreases in assets and liabilities, when applicable, while not computed in the results of the year, until their effective realization.

25.5. Unrealized profit reserve

In the calendar year of 2018, the Company constituted a reserve for unrealized profits arising from the gain from the advantageous purchase of the acquisition of the BW Guirapá complex in the amount of R\$ 49,595.

25.6. Dividends and interest on equity

The Company grants its shareholders the right to receive, each fiscal year, a mandatory minimum dividend of 25% of annual adjusted net income. Interest in equity is considered as a distribution of profits for the purpose of determining the minimum mandatory dividend. The preferred share has dividends ten percent (10%) higher than that attributed to the common share.

As resolved by the Company's Board of Directors at a meeting held on May 28, 2024, interest on equity, gross of Income Tax Withheld at Source (IRRF – Portuguese acronym that stands for *Imposto de Renda Retido na Fonte*), was approved in the amounts of R\$5,675 for common shares and R\$11,825 for preferred shares. These amounts will be charged as an advance on the mandatory dividend amount for the 2024 fiscal year, "ad referendum" of the 2025 Annual General Meeting.

 In thousands of dollars, unless otherwise indicated

26. EARNINGS PER SHARE

As defined by technical pronouncement CPC 41 - Earnings per Share, the basic calculation of earnings per share is made by dividing the net income for the six-month period attributable to the holders of the Company's common and preferred shares by the weighted average number of common and preferred shares available during the period. In the case of the Company, diluted earnings per share are equal to basic earnings per share, as it does not have potentially dilutive common or preferred shares.

|   | <u>06/30/2024</u> | <u>30/06/2023</u> |
|---|-------------------|-------------------|
| Profit from operations attributable to shareholders of the parent company | 97,815            | 253,221           |
| Reconciliation of distributable income, by class (numerator):             |                   |                   |
| Attributable profit from operations:                                      |                   |                   |

31. LONG-TERM COMMITMENTS

On June 30, 2024, the Company has long-term commitments with suppliers on a take-or-pay basis for rail transportation and power reserve and energy transmission contracts. The contracts provide for termination and suspension of supply clauses due to non-compliance with essential obligations. There are no liabilities recorded beyond the amount that was recognized monthly. Long-term commitments total R\$113,425 in Parent and R\$123,592 in Consolidated, per year.

32. INSURANCE COVERAGE

The Company and its subsidiaries have insurance coverage against fire of equipment, explosions, electrical damage, vehicles, international transportation, import, civil liability, corporate liability, surety bond and operational risks of wind power generation, on June 30, 2024 in the amount of R\$ 249,809 (R\$ 229,654 on December 31, 2023) in Parent and R\$ 1,135,368 (R\$ 1,219,679 on December 31, 2023) in Consolidated.

33. TRANSACTIONS THAT DID NOT AFFECT CASH

During the first half of 2024 and at the end of the fiscal year 2023, the Company carried out the following transactions that did not involve cash, therefore these are not reflected in the cash flow statements.

| Description   | Note | Parent     |            | Consolidated |            |
|---|------|------------|------------|--------------|------------|

Cia de Ferro Ligas da Bahia – **FERBASA** (B3: FESA3 and FESA4), Brazil’s main supplier of ferroalloys and the only producer of Ferrochrome in the Americas, discloses the results related to **the financial performance of the second quarter of 2024**, whose individual and consolidated quarterly interim information was prepared in accordance with accounting practices adopted in Brazil, based on the “Lei das Sociedades por Ações” (a Model Business Corporation Act – MBCA-like law), in the rules and pronouncements of the Brazilian Securities and Exchange Commission (henceforth **CVM**), of the Accounting Pronouncements Committee (henceforth **CPC**) and IAS 34 – Interim Financial Reporting, issued by the International Accounting Standards Board (IASB). This document contains forward-looking statements and information regarding **FERBASA**, based on assumptions and expectations that may or may not materialize, and are therefore not a guarantee of the Company's future performance. Although **FERBASA** believes that the assumptions and expectations used are reasonable, we caution investors that such information is and will, as the case may be, subject to risks and other factors related to the Company's operations and business environments, so that actual results may differ from the projections, express or implied, contained in this material. Thus, **FERBASA** expressly disclaims the duty to update the statements, prospects and expectations contained in this document.

## 1. HIGHLIGHTS OF CONSOLIDATED RESULTS

The table below shows the highlights of the quarterly and half-yearly results, using the 2Q24 as a reference and the accumulated in 1H24:

| Highlights (R\$ million)    | 2Q24  | 1Q24  | Δ%    | 2Q23  | Δ%     | 1H24    | 1H23    | Δ%     |
|-----------------------------|-------|-------|-------|-------|--------|---------|---------|--------|
| Average US dollar practiced | 5.14  | 4.94  | 4.0%  | 5.02  | 2.4%   | 5.04    | 5.10    | -1.2%  |
| Net Revenue                 | 522.0 | 509.5 | 2.5%  | 626.1 | -16.6% | 1,031.5 | 1,342.5 | -23.2% |
| Cost of Goods Sold          | 402.8 | 412.0 | -2.2% | 459.6 | -12.4% | 814.8   | 955.5   | -14.7% |
| <i>Cost over revenue</i>    | 77.2% | 80.9% |       | 73.4% |        | 79.0%   | 71.2%   |        |
| Adjusted EBITDA             | 99.5  | 78.4  | 26.9% | 144.4 | -31.1% | 177.9   | 331.7   | -46.4% |
| <i>EBITDA Margin</i>        | 19.1% | 15.4% |       | 23.1% |        | 17.2%   | 24.7%   |        |
| Net Income                  | 56.8  | 41.1  | 38.2% | 121.7 | -53.3% | 97.9    | 253.3   | -61.4% |
| <i>Profit margin</i>        | 10.9% | 8.1%  |       | 19.4% |        | 9.5%    | 18.9%   |        |

**PRODUCTION** – In 2Q24, 74.8 thousand tons of ferroalloys were produced, a decrease of 2.7% compared to 1Q24, due to the reductions of 2.4% in chromium alloys and 3.2% in silicon alloys. In the comparison between 1H23 and 1H24, there was a total increase of 5.0%. Highlighting the production of HP FeSi in 2Q24, which registered a decrease of 8.0% and a share of 41.8% in the total silicon alloys.

**SALES VOLUME** – A total of 63.4 thousand tons of ferroalloys were sold in the second quarter of the year. The slight increase of 0.5% compared to 1Q24 is due to the combination of a 1.7% increase in sales to the foreign market and a slight decrease of 0.8% in volumes destined for the domestic market. In 1H24, total sales volume fell by 10.6% compared to 1H23, with declines of 8.1% in exports and 13.3% in sales to the Brazilian market.

**NET REVENUE** – In 2Q24, net revenue totaled R\$522.0 million. The 2.5% growth compared to 1Q24 was driven by factors such as the stability in sales volume, the 4.0% increase in the average dollar price charged and the 4.5% drop in the average dollar price of alloys. In the comparison between 1H24 and 1H23, net revenue fell 23.2%, with a reduction in revenue in the domestic and foreign markets.

**COST OF GOODS SOLD** – Consolidated COGS reached R\$402.8 million in 2Q24, reflecting a 2.2% reduction compared to 1Q24. When considering exclusively the COGS of ferroalloys, there was a 2.4% decrease – despite the slight 0.5% increase in sales volume – reflecting lower production costs in the period. The ratio between COGS and net revenue of ferroalloys went from 71.6% in 1H23 to 79.8% in 1H24, a fluctuation explained mainly by the decrease in revenue, which neutralized the improvement in production costs.

**SALES AND GENERAL/ADMINISTRATIVE EXPENSES** – Sales expenses in 1H24 totaled R\$10.4 million, an increase of 8.3% compared to 1H23, while general/administrative expenses totaled R\$106.5 million, decreasing 8.1% compared to the same period.

**OTHER OPERATING REVENUES/EXPENSES** – In 1H24, operating expenses totaled R\$11.7 million, 62.4% lower than the R\$31.1 million recorded in 1H23. In the quarter, a gain of R\$17.8 million was obtained, originating from the constitution of tax credits for federal taxes, and R\$8.6 million from monetary restatement recorded in the financial result, totaling a benefit of R\$26.4 million in the Company's result, as a result of tax planning work.

**ADJUSTED EBITDA** – Operating cash generation, measured by Adjusted EBITDA, reached R\$99.5 million in 2Q24 (R\$12.2 million of which related to BWG), with an EBITDA margin of 19.1% and an increase of 26.9% compared to 1Q24. In 1H24, Adjusted EBITDA reached R\$177.9 million (R\$13.1 million of which related to BWG) and a margin of 17.2%, 46.4% lower than that achieved in 1H23.

**CASH GENERATION/CONSUMPTION** – Consumption of cash, cash equivalents and financial investments totaled R\$125.6 million in 1H24, ending the period with a consolidated financial reserve of R\$1.047 billion. Deducting the consolidated debt of R\$308.7 million, the net cash position was R\$738.3 million in 2Q24 compared to R\$897.6 million at the end of 4Q23.

**FINANCIAL RESULT** – The consolidated financial result was R\$21.5 million in 2Q24, 22.4% lower than in 1Q24, due to the 10.1% decrease in financial revenue and an increase of 32.6% in financial expenses. Comparing 1H24 with 1H23, the financial result was 6.8% lower than in the same period of the previous year, a decrease mainly explained by the decline in financial expenses is due to lower interest rates and the greater cash consumption in the first six months of 2024.

**CAPEX** – In 1H24, R\$114.0 million was invested, 9.2% lower than in 1H23, with emphasis on the acquisition of machinery and equipment intended, for the most part, for Metallurgy and Mining, as well as for the maintenance of biological assets in the Forest Resources area. Also noteworthy was the investment of R\$37.8 million made in equity interest in an electricity generating company.

**NET INCOME** – Consolidated net income reached R\$56.8 million in 2Q24, an increase of 38.2% compared to 1Q24. The 61.4% decline recorded between 1H23 and 1H24 is due to the aforementioned effects, which will be detailed in the following sections of this report.

## 2. CORPORATE PROFILE

A national leader in the production of ferroalloys and the only integrated producer of Ferrochrome in the Americas, **FERBASA** is among the 10 largest companies operating in Bahia, according to the Valor 1,000 ranking of 2023. With an integrated and verticalized production cycle in the areas of Mining, Metallurgy, Forest Resources and Renewable Energy, the Company is supported by a solid Integrated Management System, certified in accordance with ISO 9001, ISO 14001 and ISO 45001 standards.

Its portfolio consists of High Carbon Ferrochrome (HC FeCr), Low Carbon Ferrochrome (LC FeCr), Ferrosilicon (FeSi 75), High Purity Ferrosilicon 75 (HP FeSi75) and Ferrosilicon Chromium (FeSiCr) alloys, intended mainly for the steel industry

and the manufacture of stainless and special steels. With a solid 63-year history, the Company serves the domestic market and countries such as China, Japan, the United States and the European Union.

In the Mining segment, **FERBASA** has two chrome ore extraction units (one underground and one open-pit), two quartz mines and a plant focused on the production of quicklime, located in the Central North and Northeast regions of the state of Bahia (BA). Almost all its mineral production is directed to its metallurgical unit, located in the town of Pojuca/BA, where ferroalloys are produced in 14 electric furnaces equipped with baghouse filters designed to neutralize the release of particulate matter into the atmosphere. The Forestry area consists of 64 thousand hectares (about 158,000 acres), of which 25,000 (about 61,776 acres) are planted with renewable eucalyptus forests. The remaining extension of the forestry asset includes areas of legal reserve, firebreaks, native forests, Private Natural Heritage Reserve (PNHR – in Portuguese: RPPN – *Reserva Particular do Patrimônio Natural*), among other characteristics.

Guided by sustainability and verticalization of the business, the Company's strategy was strengthened with the incorporation of the BW Guirapá Wind Complex, located in the towns of Caetitê and Pindaí/BA. The 7 parks in the Complex will have their clean and renewable energy available to integrate **FERBASA**'s supply mix as of 2036, either for own consumption or commercialization of the energy generated.

Located in Salvador/BA, the Company's corporate office centralizes services for all of the group's operational units.

Noted for its civic trajectory, which distinguishes and forges its culture, **FERBASA**, since its foundation, has acted responsibly and with integrity, seeking to contribute to the socioeconomic development of surrounding communities.

### 3. MARKET ENVIRONMENT

**CRUDE STEEL:** according to data from the World Steel Association (WSA), in 1H24 global crude steel production, a relevant driver of ferrosilicon consumption, remained stable compared to 1H23, reaching 954.6 Mt. China accounted for 56% of the total produced in the period (530.6 Mt). Among the largest global producers, the best performances came from countries such as Turkey (+ 16.9%), India (+ 7.4%), Iran (+ 5.9%), Germany (+ 4.5%) and Brazil (+ 2.4%). The worst results were recorded in China (1.1%), USA (- 2.4%), Japan (- 2.6%), Russia (- 3.0%) and South Korea (- 6.4%).

In South America, production volume in 1H24 was 20.7 Mt, a slight reduction of 1.0% compared to 1H23. Of this total, 16.4 Mt came from Brazil. According to statistics from the Brazilian Steel Institute (IABr), domestic crude steel production continues to be supported by the good level of domestic demand, despite the continued high level of imports. Between 1H23 and 1H24, domestic apparent consumption grew by 6.0%, while imports increased by 23.9% and exports fell by 25.3%.

**FeSi:** in China, which accounts for around 70% of the global supply of silicon alloys, 2.6 Mt were produced in 1H24, representing a 2.5% decrease compared to 1H23, according to specialized reports. During the period, there was also a slight drop in overall demand for Chinese FeSi due to lower domestic steel production (-1.1%) and stable exports (-0.7%). In April/24, the country's silicon alloy production reached its lowest level since October/21. The recovery in the price of Chinese FeSi was again observed after 6 consecutive months of contraction, stimulating the resumption of local supply, which ended 2Q24 with the highest production level of the year.

In Europe, the average price of FeSi, in dollars, fell by 1.4% in Europe between 2Q24 and 1Q24, while in the US there was an increase of 12.8%. In the case of China, the export price remained stable (-0.1%) and the domestic price grew (+1.8%).

**STAINLESS STEEL:** specialized reports indicate that global production of stainless steel, a reference for FeCr consumption, totaled 31.3 Mt in 1H24, an increase of 7.5% compared to 1H23. Of this amount, China was responsible for 19.8 Mt (63% of the total in 1H24), which represents an increase of 9.4% compared to 1H23. In Europe, production was estimated at 2.9 Mt in 1H24, 10.7% below 1H23, while in the US it was estimated at 896 thousand tons and fell by 5.0%. In Brazil, the expectation is for an increase of 9% (198 thousand tons).

**FeCr:** Global production of HC FeCr, which remains in line with stainless steel production volumes, reached 8.3 Mt in 1H24, an increase of 8.5% compared to 1H23, according to estimates from specialized publications. China accounted for

4.4 Mt (53% of the 1H24 total) of this volume, jumping 27.6% compared to 1H23 and reaching, in 2Q24, the highest quarterly production in its history.

Driven by record consumption in 2Q24, Chinese imported HC FeCr prices grew 4.2% compared to 1Q24, after 4 consecutive quarters of contraction.

It is also worth noting that UG2 reached USD 320/t in 2Q24, its highest price level during the current bull cycle. In 2Q24, the average price of UG2 increased 7.1% compared to 1Q24, driven by the increase in HC FeCr production and the decrease in the average level of inventories. A popular category of chrome ore produced in South Africa as a byproduct of platinum mining (PGM – Platinum Group Metals), UG2 has recorded average quarterly price levels above USD 250/t since 1Q23, serving as an important support for FeCr prices in China.

We reiterate that the prices charged by **FERBASA** are based on a “basket” of international prices, including those charged by the European, American and mainly Asian markets.

## 4. OPERATIONAL RESULTS

### 4.1 Production of Ferroalloys

In 2Q24, 74.8 thousand tons of ferroalloys were produced, a decrease of 2.7% compared to the previous quarter, reflecting the reductions of 2.4% in the production of chromium alloys and 3.2% in silicon alloys. HP FeSi, which accounted for 41.8% of the total silicon alloys produced in 2Q24, recorded a decrease of 8.0% compared to 1Q24.

Between 1H23 and 1H24, there was a 5.0% increase in ferroalloy production, as a result of 3.0% growth in chromium alloys and 9.1% in silicon alloys. In the same sense, HP FeSi saw a slight increase of 1.1%.

It is important to highlight that a portion of the ferroalloys manufactured is consumed internally, as an input in other production chains.

| Production (tons)                        | 2Q24          | 1Q24          | Δ%           | 2Q23          | Δ%          | 1H24           | 1H23           | Δ%          |
|--|---------------|---------------|--------------|---------------|-------------|----------------|----------------|-------------|
| Chromium Alloys                          | 50,067        | 51,297        | -2.4%        | 49,911        | 0.3%        | 101,364        | 98,373         | 3.0%        |
| Silicon Alloys                           | 24,683        | 25,491        | -3.2%        | 24,185        | 2.1%        | 50,174         | 45,978         | 9.1%        |
| <b>Total</b>                             | <b>74,750</b> | <b>76,788</b> | <b>-2.7%</b> | <b>74,096</b> | <b>0.9%</b> | <b>151,538</b> | <b>144,351</b> | <b>5.0%</b> |
| <b>Use of Installed Capacity (MWh) %</b> | <b>82.6%</b>  | <b>84.7%</b>  |              | <b>80.2%</b>  |             | <b>83.7%</b>   | <b>78.5%</b>   |             |

Installed capacity, measured based on the amount of electrical energy that can be consumed in MWh, is based on the premises of daily and uninterrupted operation of furnaces at normal power (without power reduction or shutdowns of any kind) and the product mix that enables the furnaces to operate at maximum power. The use of installed capacity, in turn, may be affected by (i) furnace shutdown or power reduction for maintenance, renovation or operational intervention; (ii) production of alloys that require power reduction in some furnace; and (iii) commercialization of part of the contracted energy in the Free Market.

In 2Q24, **FERBASA** used 82.6% of the installed capacity of the Metallurgical Plant. The decrease of 2.1 p.p. compared to 1Q24 mainly reflected operational demands that implied shutdowns for maintenance and furnace renovations.

In the comparison between 1H24 and 1H23, an increase of 5.2 p.p. was recorded in the use of installed capacity, resulting from the end of the restriction on energy use during peak hours (6 pm to 9 pm) from August 2023.

## 4.2 Electric Power Generation – BW Guirapá

Net energy generation at BW Guirapá's wind farms was 60.0 MW on average in 2Q24, 23.8% lower than in 2Q23 and 17.5% below the 72.7 MW on average contracted for the quarter. The climate effect was the main driver, accounting for a 10.0 MW reduction on average in expected gross generation. In this scenario, the easing of El Niño generated a meteorological condition that directly impacted wind quality during the second quarter.

The results mentioned above should be analyzed in light of the main factors that influence the energy generation of the BW Guirapá Wind Complex: (i) the operational availability of the entire Wind Complex, which, in the case of the wind turbine, is related to the time available to operate and the time relative to the effective generation (availability by energy); (ii) performance of the wind turbines, measured by the association between the actual and expected generation, based on the theoretical power curve of the turbine; (iii) climatic conditions of the atmosphere that are reflected in the quality of the winds (speed and density), a determining factor for the level of energy generation of the wind farms; (iv) systemic restrictions imposed by the National Electric System Operator - ONS; and (v) internal and external electrical losses.

The difference between the expected gross generation (best expectation) of 83.2 MW average for 2Q24 and the net generation actually achieved, of 60.0 MW average, can be explained as follows:

### Manageable factors (- 3.5 MW average):

- Realized availability of 97.2%, which caused an average decrease of 1.9 MW in energy generation, a result mainly related to damage to wind turbines, more specifically the generator and gearbox.
- Average performance achieved was 97.7%, which implied a decrease of 1.6 MW on average, as a result of the calibration of the equipment that guides the wind turbines.

### Unmanageable factors (- 19.7 MW average):

- The weather negatively impacted the expected gross generation by an average of 10.0 MW, as the average wind speed (17.9 mph) was below that expected for the period (19.69 mph).

- The systemic restrictions imposed by the ONS for real-time management of the National Interconnected System - SIN resulted in an average reduction of 5.4MW in the Park's generation.
- Internal and external electrical losses relating, respectively, to equipment and the transmission system (external systemic losses – ONS allocation) removed an average of 4.3 MW from gross generation.

## 5. SALES

Sales in 2Q24 reached 63.4 thousand tons of ferroalloys, a slight increase of 0.5% compared to 1Q24, due to the 1.7% growth in sales to the foreign market and the 0.8% decline in sales in the domestic market, characterizing stability in the total volume sold.

In 1H24, traded volumes fell 10.6% compared to 1H23, in line with declines of 13.3% and 8.1% in domestic and foreign market volumes, respectively. The domestic scenario reflects a difficult time for the steel industry, which has already signaled discomfort with the growth in steel imports, especially those of Chinese origin. In the case of exports, the international scenario is significantly impacted by the protectionist actions recently intensified by the United States. In addition, logistical challenges continue to exist, such as the unavailability of containers and ships, as well as the effect of limited operations in the Suez and Panama Canals. This set of factors affected the Company's sales pace in the semester.

### 5.1 Net Revenue

Net revenue in 2Q24 totaled R\$522.0 million, an increase of 2.5% compared to 1Q24. This result reflects the combination of stable sales volume, a 4.0% increase in the average dollar price charged and a 4.5% reduction in the average price of alloys in dollars.

Compared to the same period in 2023, total net revenue in 1H24 decreased, in line with the 23.5% drop in revenue from ferroalloys. This result reflects the 10.6% decrease in the volume sold, the 12.9% slowdown in the average dollar price of ferroalloys and the 1.2% reduction in the average dollar price practiced.

| Net Revenue (R\$ millions)  | 2T24         | 1T24         | Δ%          | 2T23         | Δ%            | 1S24         | 1S23         | Δ%            |

(\*) Includes revenue with chromite sand, lime, microsilica, wood and slag .

## 5.2 Net Revenue by Product and Market

As it follows, there is the Net Revenue by Product :

Sales Mix - 1H24

Salex Mix - 1H23

The chart below shows the trajectory of net revenue between 1Q21 and 2Q24, distributed between the domestic market and exports. In 2021, Brazil recorded the highest level of steel production in recent years, boosting the sale of **FERBASA** products. In 2022, the outbreak of the conflict in Eastern Europe caused a sharp increase in commodity prices, which was reflected in the increase in revenue in both markets, in addition to the record profit in the period. The reorganization of supply chains in 2023 caused the accommodation of prices and revenue from ferroalloys throughout the year, while 2024 has been characterized by the stabilization of this trend. For the domestic market, we observed the impact of steel imports, mostly of Chinese origin, on the dynamics of the national steel sector.

### Distribution of Net Revenue by Market (In millions of Reais)

## 6. COST OF GOODS SOLD

The consolidated cost of goods sold (COGS) totaled R\$ 402.8 million in 2Q24 and incorporated a decrease of 2.2% compared to 1Q24, in line with the 2.4% reduction in the COGS of ferroalloys.

Compared to 1H23, consolidated COGS in 1H24 decreased 14.7%. In the case of COGS for ferroalloys, there was a decrease of 14.4% due to the 10.6% decrease in sales volume, in addition to reflecting lower production costs with electricity and coke.

In relation to the electricity consumed in the production of ferroalloys, there was a decrease of 20.5% in the average cost between 1H23 and 1H24, because of the 32.8% drop in the average energy tariff, due to the optimization of the portfolio of contracts, which exceeded the growth of 5.0% in expenses with sectoral charges.

Regarding the lower production cost of high carbon ferrochrome, verified between 1H23 and 1H24, the most relevant factor, in addition to the reduction in electricity costs, was the cost of coke, due to the decline in the international price of coal.

As for the decrease in the cost of low-carbon ferrochrome, the expenses with the FeSi Cr reducer (produced domestically) stand out, benefiting from the lower costs of HC FeCr, consumed in its production.

The retraction in the cost of ferrosilicon production is due to the reduction in electricity expenses, in addition to the dilution of fixed costs because of the increase in production volume.

Specifically, regarding the ratio between COGS and net revenue of ferroalloys, there was an increase from 71.6% to 79.8% between 1H23 and 1H24, mainly caused by the decrease in revenue from the drop in trading prices in dollars and in the exchange rate, which neutralized the improvement in production costs.

The "Wind Energy" line presented in the table below is related to the COGS of the BW Guirapá wind complex, which covers the main cost components associated with the operation of wind turbines, equipment maintenance, power transmission and depreciation.

| COGS (R\$ millions)      | 2Q24          | %NR(*) | 1Q24          | %NR(*) | 2Q23         | %NR(*) | 1H24          | %NR(*) | 1H23         | %NR(*) |

(\*) Considers the percentages of COG by the Net Revenue of each product.

(i) They include costs for the products: chromite sand, lime, microsilica, wood and slag.

## 7. EXPENSES

### 7.1 Sales Expenses

Sales expenses totaled R\$10.4 million in 1H24, representing an increase of 8.3% compared to 1H23. In relation to net revenue, the percentage of sales expenses corresponded to 1.0% in 1H24, while in 1H23 it was recorded at 0.7%.

### 7.2 General and Administrative Expenses

Consolidated general and administrative expenses include amounts related to salaries, benefits, management fees, social charges, consulting services and the provision for profit sharing.

For 1H24, such expenses totaled R\$95.7 million (R\$3.9 million related to BWG), a decrease of 10.1% compared to the R\$106.5 million recorded in the first half of 2023 (R\$3.5 million related to BWG), reflecting the reduction of R\$16.8 million in the profit-sharing line, which occurred due to the drop in profit in the period.

### 7.3 Other Operating Expenses/Revenues

Operating expenses in 1H24 totaled R\$27.9 million, 10.3% lower than the R\$31.1 million recorded in 1H23.

The main expenses in 1H24 were related to Social and Corporate Responsibility (R\$6.5 million), other taxes and fees (R\$4.9 million), energy transfer (R\$6.1 million), and geological surveys, consulting and others (R\$10.4 million).

## 8. ADJUSTED EBITDA

EBITDA is not a measure defined by Brazilian and international accounting standards, representing the profit for the period before interest, income tax, social contribution, depreciation, amortization and depletion. **FERBASA** discloses its adjusted EBITDA in accordance with **CVM\* Resolution 156/22**, that is, with the purge of the net effect of the fair value of biological assets, the provision for contingencies and other non-recurring effects.

\*CVM – in Portuguese: *Comissão de Valores Mobiliários*, which stands for Securities and Exchange Commission of Brazil.

| EBITDA - Consolidated (R\$ millions)  | 2T24         | 1T24         | Δ%           | 2T23         | Δ%            | 1S24         | 1S23         | Δ%            |

| <b>Adjusted EBITDA</b>  | <b>99.5</b>  | <b>78.4</b>  | <b>26.9%</b> | <b>144.4</b> | <b>-31.1%</b> | <b>177,9</b> | <b>331,7</b> | <b>-46,4%</b> |
| <b>EBITDA Margin</b>  | <b>19.1%</b> | <b>15.4%</b> |              | <b>23.1%</b> |               | <b>17,2%</b> | <b>24,7%</b> |               |

1) The capital gain refers to the effect of the realization of assets measured at their fair value, reflecting the acquisition of BWG;

2) Effect of the creation of new processes and reversals of provisions for contingencies for the period (Note 27 of the 2023 Financial Statements);

3) Establishment of tax credits for federal taxes (does not include monetary adjustment).

Additionally, we present below the EBITDA table of the subsidiary BW Guirapá.

| EBITDA - BW (R\$ millions)                          | 2Q24         | 1Q24        | Δ%              | 2Q23         | Δ%            | 1H24         | 1H23         | Δ%            |

## 9. FINANCIAL STRUCTURE

### 9.1 Net Cash and Cash Consumption

According to the Cash Flow Statement (DFC, CPC – 03 R2), which considers only the variation in cash accounts and cash equivalents, the amount consumed by operating, investing and financing activities in 1H24 was (+) R\$47.1 million, mainly impacted by:

(+) R\$16.7 million of operating income generated in the period, including variations in working capital, interest payments and taxes;

(+) R\$63.8 million from investment activities, a result influenced by: i) transfer of financial investments in the amount of (+) R\$214.9 million to Cash and Cash Equivalent; ii) acquisitions for fixed assets and biological assets, which together totaled (-) R\$114.0 million; iii) equity interest in an energy generation company, in the amount of (-) R\$ 37.8 million (ref. APE – Self-production by equivalence); and (iv) others, in the amount of (+) R\$ 0.7 million;

(-) R\$33.4 million from financing activities, whose impacts were: i) amortization of loans and consolidated financing in the amount of (-) R\$26.7 million (with emphasis on the R\$13.2 million related to BWG's debt with BNDES – Brazilian Bank of Development, in Portuguese – *Banco Nacional do Desenvolvimento*); ii) payment of leases/rents totaling (-) R\$ 45.7 million; (iii) Payment of interest on equity in the amount of (-) R\$ 17.5 million; and (iv) Raising of financial resources through advances on exchange contracts (ACC – Portuguese acronym that stands for *Adiantamento de Contrato de Câmbio*) in the amount of (+) R\$56.5 million, at an average discount of 6.4% p.a., monthly maturities in 2Q25, average exchange rate of R\$/US\$5.25, with the objective of financing the growth of ferroalloy inventories and taking advantage of the favorable level of the exchange rate at the moment.

Also considering the "Financial Investments" account, whose variation was negative by R\$172.7 million, there was a total cash consumption of R\$125.6 million in 1H24. As of June 30, 2024, the consolidated financial reserve reached approximately R\$1.047 billion (including cash, cash equivalents and marketable securities, of which R\$127.6 million came from BWG) and consolidated debt of R\$308.7 million (of which R\$201.1 million referred to BWG's debt with BNDES). Thus, the Company ended the quarter with a net cash position of R\$ 738.3 million.

| Net Cash - Consolidated (R\$ million) | 06/30/2024     | 12/31/2023     | Δ              |
|---------------------------------------|----------------|----------------|----------------|
| Cash and cash equivalents             | 388.9          | 341.8          | 47.1           |
| Financial investments                 | 658.1          | 830.8          | (172.7)        |
| <b>Total Financial Reserve</b>        | <b>1,047.0</b> | <b>1,172.6</b> | <b>(125.6)</b> |
| Loans and financing*                  | (308.7)        | (275.0)        | (33.7)         |
| <b>Net Cash</b>                       | <b>738.3</b>   | <b>897.6</b>   | <b>(159.3)</b> |

(\*) The IOF value on the collection is R\$ 3.4 and R\$ 3.6 million for 06/30/24 and 12/31/23, respectively.

## 9.2 Net Financial Result

In 2Q24, the financial result totaled R\$ 21.5 million, 22.4% lower than the R\$ 27.7 million recorded in 1Q24. This decrease was due to the combination of the 10.1% decrease in financial revenue, mainly justified by the monetary adjustment of R\$8.6 million related to the constitution of federal tax credits, and the 32.6% increase in financial expenses, influenced by the raising of financial resources through exchange contracts (ACC).

The analysis of 1H24 points to an 6.8% reduction in the financial result compared to 1H23. Financial revenue fell 21.4% due to the lower interest rate for financial investments and cash consumption in 1H24. On the other hand, financial expenses decreased by 21.6% due to the amortization of financing contracts and the drop-in interest rates. There was also a positive effect of the exchange rate variation in the period analyzed.

| Financial Results (R\$ million) | 2Q24        | 1Q24        | Δ%            | 2Q23        | Δ%            | 1H24        | 1H23        | Δ%           |
|---------------------------------|-------------|-------------|---------------|-------------|---------------|-------------|-------------|--------------|
| Financial performance           |             |             |               |             |               |             |             |              |
| Financial revenue               | 31,3        | 34,8        | -10,1%        | 46,7        | -33,0%        | 66,1        | 84,1        | -21,4%       |
| Financial expense               | (12,6)      | (9,5)       | 32,6%         | (14,4)      | -12,5%        | (22,1)      | (28,2)      | -21,6%       |
| Net Exchange variation          | 2,8         | 2,4         | 16,7%         | (2,8)       | -200,0%       | 5,2         | (3,1)       | -267,7%      |
| <b>Total</b>                    | <b>21,5</b> | <b>27,7</b> | <b>-22,4%</b> | <b>29,5</b> | <b>-27,1%</b> | <b>49,2</b> | <b>52,8</b> | <b>-6,8%</b> |

Additionally, we inform that the Company has US\$ 2.7 million in export restrictions, at an average exchange rate of R\$/US\$ 5.31 and with maturity dates of up to 120 days from the respective contracting.

## 10. CAPEX

### 10.1 Operacional

In 1H24, CAPEX totaled R\$114.0 million, representing a decrease of 9.2% compared to the total amount spent in 1H23. The amounts broken down by business unit are shown in the table below:

| CAPEX (R\$ millions)    | Metallurgy  | Mining      | Forestry    | Wind Power | 1H24         | 1H23         |
|-------------------------|-------------|-------------|-------------|------------|--------------|--------------|
| Machinery and Equipment | 15.9        | 21.3        | 6.6         | 4.3        | 48.1         | 56.0         |
| Biological Asset        | -           | -           | 36.1        | -          | 36.1         | 32.9         |
| Land slots              | -           | -           | -           | -          | -            | 15.9         |
| Mines                   | -           | 9.7         | -           | -          | 9.7          | 8.6          |
| Buildings               | 1.0         | 7.6         | 7.7         | -          | 16.3         | 7.3          |
| Vehicles and Tractors   | -           | 0.2         | -           | -          | 0.2          | -            |
| Furniture and utensils  | 0.2         | -           | -           | -          | 0.2          | 0.1          |
| Others (i)              | 1.4         | 0.5         | 1.5         | -          | 3.4          | 4.8          |
| <b>Total</b>            | <b>18.5</b> | <b>39.3</b> | <b>51.9</b> | <b>4.3</b> | <b>114.0</b> | <b>125.6</b> |

(i) Including: advances, IT, intangible and others.

The most significant investments in the period were related to the acquisition of machinery and equipment (42.2%), mostly for the Metallurgy and Mining units, as well as maintenance of biological assets (31.7%) for the Forest Resources area. Such expenses represented 73.9% of the total CAPEX carried out in 1H24.

## 10.2 Corporate Interest

In 1H24, R\$37.8 million was disbursed for the acquisition of a 45% stake in *Sociedade NK232* (a company of the *Auren Energia S.A. group*) with the objective of operating the *Ventos de São Ciro* (located in the Brazilian state of Piauí) and *Ventos de São Bernardo* (located in the Brazilian state of Pernambuco) wind farms, which will allow the Company to supply an average of 35MW of electricity for 20 years, under the self-production by equalization (APE – Portuguese acronym that stands for *Autoprodução por Equiparação*) regime, as disclosed to the market on February 9, 2024.

## 11. NET PROFIT AND RESULTS

As a result of the effects mentioned in this report, consolidated net income in 2Q24 was R\$76.9 million (net margin of 14.7%). As a cumulative result in 1H24, net income reached R\$118.0 million (margin of 11.4% on net revenue). The main elements that influenced the result of 1H24, in relation to the same period of the previous year, were:

- (i) 12.9% drop in the average dollar-weighted price of ferroalloys;
- (ii) 10.6% reduction in total sales of ferroalloys;
- (iii) 1.2% devaluation in the average dollar rate;
- (iv) 14.4% drop in cost of goods sold (COGS) for ferroalloys;
- (v) BW Guirapá suffers R\$16.3 million loss;
- (vi) Consolidated cash consumption of R\$125.6 million in 1H24.

The following graph shows the evolution of EBITDA, EBITDA margin and net profit since 1Q21.

## 12. STATEMENT OF ADDED VALUE

The table below shows the wealth generated by the Company and its respective distribution. In 1H24, **FERBASA** generated R\$384.4 million.

| DVA (Statement of Added Value) (R\$ millions) | 1H24         | 1H23         | Δ%            |
|---|--------------|--------------|---------------|
| Employees                                     | 206,2        | 207,1        | -0,4%         |
| Government                                    | 75,6         | 123,2        | -38,6%        |
| Others (1)                                    | 4,7          | 27,7         | -83,0%        |
| Net Profit (2)                                | 97,9         | 253,3        | -61,4%        |
| <b>Total</b>                                  | <b>384,4</b> | <b>611,3</b> | <b>-37,1%</b> |

- (1) They refer to interest, rents, leases, financial expenses, including passive exchange rate variation, and others.  
(2) Shareholders and retained earnings.

## 13. CAPITAL MARKETS AND INVESTOR RELATIONS

**FERBASA** maintains strict transparency standards to preserve the trust of its stakeholders, prioritizing the timely disclosure of information, providing an institutional website and other direct communication channels with the Investor Relations area. In addition, the Company holds quarterly results release conferences and an annual public meeting. Below, we present a summary of relevant information for our investors and the market in general.

### 13.1 Earnings

Remaining a regular payer of dividends, **FERBASA** presents below a historical series of its profit distribution. In June 2024, the Company credited the payment of R\$ 17.5 million in dividends in the form of JCP (Interest on Equity), reaching a payout of 23% in relation to the adjusted profit of 1H24.

### 13.2 FESA4 performance on B3

The table below presents some indicators on the behavior of **FERBASA** preferred shares in 2Q24.

|                                    | 2T24   | 1T24   | Δ%    |
|------------------------------------|--------|--------|-------|
| Volume of shares traded (thousand) | 52.363 | 31.946 | 63,9% |

|   |           |           |        |
|---|-----------|-----------|--------|
| Transacted value (R\$ thousand)                                   | 426.473   | 387.123   | 10,2%  |
| Market value (R\$ thousand) <sup>(1)</sup>                        | 3.551.642 | 3.921.408 | -9,4%  |
| Shares in <i>Free Float</i> Circulation (thousand) <sup>(2)</sup> | 161.858   | 161.830   | 0,02%  |
| Weighted average price during the period (R\$ PN)                 | 8,14      | 12,12     | -32,8% |
| Last quotation of the period (R\$ PN)                             | 8,07      | 8,67      | -6,9%  |
| Equity value per share (R\$)                                      | 9,67      | 9,49      | 1,9%   |

Notes:

(1) Number of shares (by ON and PN class) multiplied by their respective stock prices on 06/31/2024 and 03/31/2024;

(2) Total volume of Company shares, excluding the shares of the treasury (ON: 160,000; PN: 12,733.2 thousand), of the Controlling Shareholder (ON: 116,346,800 thousand; PN: 62,045.6 thousand) and of the Management (ON: 312; PN: 136.5 thousand).

The Company's ADTV (Average Daily Trading Volume) in 2Q24 reached R\$6.8 million, up 6.7% compared to 1Q24. In 1H24, ADTV fell 41.9% compared to 1H23, due to the 25,9% drop in the average price of FESA4, which outweighed the effect of the growth in the average volume of PNs traded. Furthermore, 2024 has been marked by a reduction in stock market volume associated with the outflow of foreign capital and worsened by the uncertain scenario in the steel sector.

In the following graph, we present the evolution of the shareholder base by type of shareholder and liquidity measured by ADTV.

### 13.3 Investor Profile

The shareholding profile of FERBASA's preferred shares (FESA4), taking as reference the shareholding base of 06/30/2024, is configured as follows:

## 14. GLOSSÁRIO

---

**High Carbon Ferrochrome (HC FeCr)** – An alloy of iron and chromium with a high carbon content, also known as "Charge Chrome", is used in the manufacture of stainless steels and special alloys. Stainless steels are used in the food, chemical, cellulose and petroleum industries, as well as in the so-called "white goods", household appliances, construction and other products.

**Low Carbon Ferrochrome (LC FeCr)** – Iron and chromium alloy that presents carbon with a maximum content of 0.15%, used during the production of steels to correct chromium contents without causing undesirable variations in carbon content. Industrially, it has the same purpose as ferrochrome high carbon, being used in the production of stainless steels with wide application in the consumer goods industries.

**Ferrosilicon Chromium (FeSiCr)** – Reducing element in the manufacture of Low Carbon Ferrochrome and steels, for the addition of chromium and silicon.

**Ferrosilicon 75 (FeSi75)** – In steel production, Standard Ferrosilicon 75 is used as a deoxidant and alloying element; in the casting industry serves as a graphite agent. High Purity Ferrosilicon (HP) makes up the manufacture of steels intended for the manufacture of transformers, hydroelectric plants, freezers, airtight compressors for refrigerators and others.

**Million tons (Mt)** – According to the International System of Units (SI), the prefix designating million (mega) can be represented by the capital letter M. In the case of a ton, its representation in the SI is the lowercase letter t. Therefore, for millions of tons, the abbreviation Mt can be adopted (conversion: 1 Mt = 1,000,000 t).
