

UNIGEL ANNOUNCEMENT

Unigel Participações S.A. – Under Judicial Reorganization ("Company" or "Unigel" and, together with its subsidiaries, "Unigel Group"), hereby informs, on this Thursday (January 8), the suspension of operations at its styrene and toluene plant located in Cubatão, São Paulo, and the concentration of polystyrene production at the plant located in Guarujá.

The Company's decisions were taken in the context of an unprecedented downturn cycle in the global chemical industry, marked by a significant oversupply of petrochemical commodities, which has intensified since 2023 due to the expansion of international production capacity, particularly in Asia.

In view of the lack of short-term prospects for market recovery, the Company understands that the reallocation of activities within specific business units represents the best alternative to preserve value and ensure the economic sustainability of the Unigel Group's remaining operations.

The Company reiterates that it will continue to normally serve its customers and suppliers.

Unigel will conduct this process with transparency, maintaining dialogue with employees and labor unions, fully complying with labor and environmental legislation, preserving assets and the possibility of a future resumption of such activities, which are essential to Brazil's petrochemical sector and to the Unigel Group, as soon as market conditions allow.
