We have reviewed the accompanying interim balance sheet of PPLA Participations Ltd. ("Company") as at September 30, 2024 and the related statements of income and comprehensive income for three and nine-month period then ended, and the statements of changes in shareholders' equity and cash flows for nine-month period then ended, and notes, comprising material accounting policies and other explanatory information.

Management is responsible for the preparation and fair presentation of these interim financial statements in accordance with the International Accounting Standard (IAS) 34 - "Interim Financial Reporting", issued by the International Accounting Standards Board (IASB). Our responsibility is to express a conclusion on this interim financial statement based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International Standards on Reviews of Interim Financial Information (NBC TR 2410 - "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", and ISRE 2410 - "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", respectively). A review of interim information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial statements referred to above do not present fairly, in all material respects, the financial position of PPLA Participations Ltd. as at September 30, 2024 and its financial performance for the three and nine-month period then ended, and its financial performance and cash flows for the nine-month period then ended in accordance with IAS 34 - "Interim Financial Reporting", issued by International Accounting Standards Board (IASB).

Emphasis of matter

Material uncertainty related to going concern

We draw attention to Note 1 to these financial statements, which states that the Company has incurred recurring decreases in shareholders' equity over the past few years for the reasons set out in that Note. The plans for reversing this situation, are also described in Note 1, and depends on the success of the initiatives taken by Management, through obtaining loans, which can be capitalized, if necessary. This situation, among others described in that Note, indicates the existence of significant uncertainty that may cast significant doubts about the ability of the Company to continue as a going concern. Our conclusion is not modified in respect of this matter.

Statement of value added

The interim financial statements referred to above include the statement of value added for the nine-month period ended September 30, 2024, prepared under the responsibility of the Company 's management and presented as supplementary information under IAS 34. Based on our review, nothing has come to our attention that causes us to believe that this statement of value added has not been properly prepared, in all material respects, in accordance with the criteria established in this accounting standard, and that they are consistent with the interim financial statements taken as a whole.

Notes to the Interim Financial Statements
September 30, 2024
(In thousands of reais)

1. Operating context

PPLA Participations Ltd. ("PPLA Participations", "Company" or “PPLAP”) was constituted as a tax exempted Limited Liability Company under the laws of Bermuda on March 26, 2010. On December 29, 2010, the Bermuda monetary authority approved the constitution of the Company. PPLA Participations headquarters is located at Clarendon House, 2 Church Street, HM 11, Hamilton, Bermuda.

The Company has applied for and has been granted exemption from all forms of taxation in Bermuda until September 30, 2035, including income, capital gains and withholding taxes. In jurisdictions other than Bermuda, some foreign taxes will be withheld at source on dividends and certain interest received by the Company.

PPLA Participations (together with BTG Pactual, the “Group”) have units listed on NYSE Euronext in Amsterdam and B3 in São Paulo. Each unit issued corresponds to 1 class A shares and 2 class B shares of PPLA Participations Ltd. All units listed and traded in Amsterdam remained wholly interchangeable with the units in Brazil.

The Company is the sole owner of BTG Bermuda LP Holdco Ltd ("BTG Holdco") which, on December 29, 2010, received a Class C common share from BTG Pactual Management Ltd. and thus became general partner of PPLA Investments LP. (“PPLA Investments“), previously denominated BTG Investments LP. As a consequence of this transaction, the Company obtained the right to control the financial and operating policies of PPLA Investments.

PPLA Investments was formed in 2008 and makes proprietary capital investments in a wide range of financial instruments, including Merchant Banking investments in Brazil and overseas, and a variety of financial investments in global markets.

BTG Pactual’s asset management area manages PPLA Investments’ assets and receives fees at arm’s length.

The Management of PPLA Investments is monitoring the recurring reduction in the Company's Shareholders' Equity over the last few years, mainly due to losses arising from negative mark-to-market in its investment entity portfolio. Reverting the accumulated deficit situation requires a successful implementation of Management's initiatives through loans - made between the Company and BTG MB Investments LP (“BTG MB”) - which can be capitalized, if necessary.

Although the deficit picture portraits the existence of a relevant uncertainty that can raise questions about the Company's operational continuity, management evaluation came to conclude, based on the aforementioned initiatives, that PPLA Participations has the capacity to continue operating in the next 12 months.

Loan Agreement

On June 21st, 2021 PPLAI entered into a Loan Agreement with BTG MB Investments LP ("BTG MB") in which PPLAI approved a credit line with BTG MB with total amount to BRL750 million, to be disbursed according to PPLAI request, on dates and amounts of the company loan installments, on the following dates: June 21st,2021, July 9th, 2021, December 16th, 2021, December 12th, 2022 and December 23th, 2023, with 30 months maturity, starting of June 21st, 2021 and interest rate of 117.3% of CDI to be applied on each amount disbursed. The agreement does not have on the date of its execution, a provision that would enable BTG MB to capitalize such credits fully or partially in the corresponding number of shares (partnership interests) of PPLA Investments, without prejudice to any commercial agreement to be negotiated on an arm's length basis. Simultaneously with the execution of the Agreement, PPLA Investments requested the first disbursement to BTG MB in the amount of approximately BRL90 million, which was made on the same date by BTG MB.

On July 9, 2021, PPLA Investments requested the second disbursement to BTG MB in the amount of approximately BRL 160 million, which was made on the same date.

On December 16, 2021, PPLA Investments requested the third disbursement to BTG MB in the amount of approximately BRL 116 million, which was made on the same date.

On November 13, 2023, PPLA Investments settled BRL 142 million of these loans, with cash and resources arising from operations with financial assets at amortized cost.

On December 21, 2023, the parties entered into a contractual agreement that extends the final maturity of the loan by one year. The remaining contractual terms were maintained.

On August 30, 2024, PPLA Investments settled approximately BRL 73 million of these loans, with cash and resources arising from operations with financial assets at fair value through profit or loss.

The loans corresponding to this Loan Agreement are conducted within the scope of the Company's initiatives to address its economic and financial situation and PPLA Investments' recurring capital needs, especially considering the maturity of certain loans and other short-term liabilities.

2. Presentation of Interim Financial Statement

The interim financial statements have been prepared in accordance with international standard IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board (IASB).

The items included in the Interim Financial Statement of each of the businesses of the Company are measured using the currency of the primary economic environment in which the company operates ("functional currency").

The Interim Financial Statement for the period ended September 30, 2024 was approved by the Management on November 12, 2024, and it contains a true and fair view of the financial position and results of the Company.

Amendments to IAS 7 – Statement of Cash Flow and IFRS 7 – Financial Instruments: Disclosures issued in May 2023 increasing the disclosure requirements for supplier financing agreements and their effect on a company's liabilities, cash flows and exposure to liquidity risk. These amendments will become effective as of January 1, 2024. The possible impacts are being evaluated and will be completed by the date on which the standard enters into force.

3. Main accounting practices

a. Use of estimative

The preparation of Interim Financial Statement in conformity with IFRS requires management to make estimates and assumptions that affect the reported balances of assets, liabilities and disclosure of contingent assets and liabilities at the date of the Interim Financial Statement, as well as the reported amounts of revenues and expenses during the year. These estimates are based on historical experience and various other factors that Management believes are reasonable under the circumstances, the results form the basis for judgments about carrying values of assets and liabilities, which are not determined through other sources. The actual results could differ from those estimates.

b. Functional currency and presentation

The Company's functional currency is the real, since most business transactions, especially its investments, are in this currency.

c. Cash

Cash and cash equivalents include cash, bank deposits and highly liquid short-term investments redeemable in up to 3 months, subject to an insignificant risk of change in value.

d. Revenue and expense recognition

Net gains with financial instruments

Amounts that arise from trading activity including all gains and losses from changes in the fair value and the interest and dividend income or expense of financial assets and liabilities held for trading.

Interest income (expense)

Interest income (expense) is recognized as incurred, using the effective interest rate method. The interest on financial instruments held for trading are recorded in the statement of income when applicable.

e. Financial instruments

This section described the accounting practices related to IFRS 9.

Recognition date

All financial assets and liabilities are initially recognized on the trading date, that is, the date on which the entity becomes an interested party to the contractual relationship of the instrument. This includes purchases or sales of financial assets or liabilities that require delivery of the asset at a specified time established by regulation or market standard.

Initial recognition of financial instruments

The classification of the financial instruments at their initial recognition depends on the purpose for which they were acquired and their characteristics. IFRS 9 classification is generally based on the business model in which a financial asset is managed and its contractual cash flows. Subsequently to the IFRS 9 early adoption without electing fair value option, the Company classified its financial assets as measured at fair value through profit or loss (FVTPL), fair value through other comprehensive income (FVOCI) with or without recycling or at amortized cost.

Derivatives financial instruments

Derivative financial instruments are recorded at fair value and held as assets when fair value is positive and as liabilities when fair value is negative. The changes in fair value of derivatives are recognized in the income statement "Net gains (losses) with financial instruments held for trading".

Financial assets and liabilities designated at fair value through profit and loss

Financial assets and liabilities classified in this category are those designed as such on initial recognition. The designation of a financial instrument at fair value through profit or loss on initial recognition is only possible when the following criteria is observed, and the designation of each instrument is individually determined:

- Designation eliminates or significantly reduces the inconsistent treatment which would occur in the measurement of assets and liabilities or in the recognition of gains and losses corresponding to different ways; or

- Assets and liabilities are part of a group of financial assets, financial liabilities, or both, which are managed and with their performance assessed based on the fair value, as a documented strategy of risk or investment management; or

- The financial instrument contains one (or more) embedded derivative(s), which significantly modifies the cash flows that would otherwise be required by the agreement.

Financial assets and liabilities at fair value through profit and loss are recorded in the balance sheet at fair value. Changes in the fair value and earned or incurred interest are recorded in "profit and loss".

Financial assets measured at amortized cost

A financial asset shall be measured at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and.

- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, financial assets are measured at amortized cost using the effective interest rate method.

Financial liabilities at amortized cost

Financial liabilities are measured at amortized cost using the effective interest rate method and considering any discount or premium on issue and relevant costs that become part of the effective interest rate.

Reclassifications

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Company changes its business model for managing financial assets.

Impairment of financial assets

Under IFRS 9, at initial recognition of a debt instrument, the Company needs to project its expected credit losses for the next 12 months and recognize it as an allowance for credit losses, even though no losses have yet occurred.

If the Company is expecting a significant deterioration in the credit quality of its counterparty, it should recognize an allowance equivalent to the lifetime expected credit losses of the instrument, rather than only the 12 month expected credit losses.

Measurement

Expected credit losses are a probability-weighted estimate of credit losses. They are measured as follows:

- Financial assets that are not credit-impaired at the Report date: as the present value of all cash shortfalls (the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive).
- Financial assets that are credit-impaired at the Report date: as the difference between the gross carrying amount and the present value of estimated future cash flows.
- Undrawn loan commitments: as the present value of the difference between the contractual cash flows that are due to the Group if the commitment is drawn down and the cash flows that the Group expects to receive; and
- Financial guarantee contracts: the expected payments to reimburse the holder less any amounts that the Group expects to recover.

If the assets are no longer performing (a credit event), despite considering the expected credit losses for the lifetime of the instrument, the Company should also recognize interest revenue based on the net carrying amount, which means that the allowance should be accounted for on interest recognition.

The main evidence of deterioration of the credit quality of the counterparty are:

- the significant decline in the fair value of any security for a prolonged period.
- noncompliance with contract terms for delay of principal or interest.
- deterioration in ability to pay and operational performance.
- breach of covenants.
- notable change in the performance of the counterparty market.
- reduced liquidity of the asset due to financial difficulties the lender.

For impairment losses related to debt instruments through other comprehensive income, such losses will be recognized on the consolidated statements of income against other comprehensive income in an account called “accumulated impairment amount.” However, if in a subsequent period occur an increase in the fair value of the financial asset that can be related to any event, the loss previously considered will be reversed in profit and losses.

The Company is required to reduce the gross carrying amount of its financial instruments when there is no reasonable expectation of recovering the contractual cash flows on the financial assets on its entirety or a portion thereof.

f. Valuation of Investment entity portfolio

Within the context of IFRS 10, this entity is treated as an investment entity and therefore it is not necessary to conduct all the procedures related to the consolidation of investees, as the exception indicated in this rule. The objective is to earn gains through the management of portfolios and eventual purchase and sale transactions.

Investment entity portfolio is held at fair value with movements in fair value going through the profit and loss account. The investments held by BTG Holdco (through BTGI) are defined as underlying investments. These underlying investments correspond substantially to an investment in global markets and merchant banking investments which are generally made directly or through ownership in limited partnership funds. The merchant banking investments are comprised of equity ownerships, loans and convertible instruments which most of the risk and return are dependent on the fair value and characteristics of underlying equity. The Company may adjust these values if, in its view, the values do not reflect the price which would be paid in an open and unrestricted market between informed and prudent parties, acting at arm's length and under no compulsion to act.

Investment entity portfolio is measured according to the fair value measurement hierarchy described below:

Level 1: Price quotations observed in active markets for the same instrument.

Level 2: Price quotations observed in active markets for instruments with similar characteristics or based on pricing model in which the relevant parameters are based on observable active market data.

Level 3: Pricing models in which current market transactions or observable data are not available and require a high degree of judgment and estimation. Instruments in this category have been valued using a valuation technique where at least one input which could have a significant effect on the instrument's valuation is not based on observable market data. Where inputs can be observed from market data without undue cost and effort, the observed input is used. Otherwise, the Company determines a reasonable level for the input. The valuation models are developed internally and are reviewed by the pricing team, which is independent from the revenue generating areas, they are updated whenever there is evidence of events that could have affected the assets' pricing. Investment entity portfolio primarily includes certain limited partnership interests in private equity funds mainly derived from our merchant banking activities and OTC derivatives which valuation depends upon unobservable inputs. No gain or loss is recognized on the initial recognition of an investment entity portfolio valued using a technique incorporating significant unobservable data.

Level 3 valuation assumptions

Asset	Valuation technique	Main assumptions
Private Equity Funds (unquoted investments)	Price of recent investments; Models based on discounted cash flows or earnings; market transactions (M&A) multiples.	Market and revenue growth, profitability and leverage expectations, discount rates, macro-economic assumptions such as inflation and exchange rates, risk premiums including market, size and country risk premiums.
Derivatives	Standard models and non-bidding quoted prices	Counterpart - Probability of default and recovery rates.

In certain cases, data used to determine fair value may be from the different levels of the fair value measurement hierarchy. In these cases, the financial instrument is classified in the most conservative hierarchy in which the relevant data for the fair value assessment were used. This evaluation requires judgment and considers specific factors of the relevant financial instruments.

Changes in the availability of the information may result in reclassification of certain financial instruments among the different levels of fair value measurement hierarchy.

g. Financial instruments – Offsetting

Financial assets and liabilities are presented net in the balance sheet if, and only if, there is a current and enforceable legal right to offset the amounts recognized and if there is the intention to offset, or to realize the asset and clear the liability simultaneously.

h. Contingent assets and liabilities

Provisions are recognized when the Company has a current obligation (legal or constructive), as the result of a past event and it is probable that an outflow of resources which incorporates economic benefits shall be required to settle the obligation and a reliable estimate of the amount of the obligation can be made. The expense related to any allowance is presented in the income statement net of any reimbursement.

The recognition, measurement and the disclosure of the assets and contingent liabilities and of the legal are made pursuant to the criteria described below.

Contingent assets - not recognized in the Interim Financial Statement, except when there is evidence that realization is virtually certain.

Contingent liabilities - are recognized in the Interim Financial Statement when, based on the opinion of legal advisors and Management, the risk of loss of an action, judicial or administrative is deemed likely, with a probable outflow of resources to settlement of the obligations and when the amounts involved can be reasonably measured. Contingent liabilities classified as possible losses by the legal advisors are only disclosed in explanatory notes, while those classified as remote losses are neither provided for nor disclosed.

i. Profit allocation

The dividends are classified as liabilities when declared by the board and approved by the Extraordinary / Ordinary General Meeting.

j. Segment information

IFRS 8 requires that operating segments are disclosed consistently with information provided to the Company's chief operating decision maker, who is the person or group of persons that allocates resources to the segments and assesses their performance. Management understands the Company has only one segment, which is related to the company's an investment activity and so no segment information is disclosed.

You will have the ability to download and print documents we send to you through the DocuSign system during and immediately after the signing session and, if you elect to create a DocuSign account, you may access the documents for a limited period of time (usually 30 days) after such documents are first sent to you. If you elect to receive required notices and disclosures only in paper format, it will slow the speed at which we can complete certain steps in transactions with you and delivering services to you because we will need first to send the required notices or disclosures to you in paper format, and then wait until we receive back from you your acknowledgment of your receipt of such paper notices or disclosures. Further, you will no longer be able to use the DocuSign system to receive required notices and consents electronically from us or to sign electronically documents from us.

All notices and disclosures will be sent to you electronically

Unless you tell us otherwise in accordance with the procedures described herein, we will provide electronically to you through the DocuSign system all required notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you during the course of our relationship with you. To reduce the chance of you inadvertently not receiving any notice or disclosure, we prefer to provide all of the required notices and disclosures to you by the same method and to the same address that you have given us. Thus, you can receive all the disclosures and notices electronically or in paper format through the paper mail delivery system. If you do not agree with this process, please let us know as described below.
