

Volaris Reports December 2024 Traffic Results: Load Factor of 88%

Mexico City, Mexico, January 8, 2025 – Controladora Vuela Compañía de Aviación, S.A.B. de C.V. (NYSE: VLRS and BMV: VOLAR) (“Volaris” or “the Company”), the ultra-low-cost carrier (ULCC) serving Mexico, the United States, Central and South America, reports its **December 2024** preliminary traffic results.

In December, Volaris' ASM capacity decreased by 4.5% year-over-year due to the Pratt & Whitney engine inspections, slightly better than forecast as we recovered more engines than anticipated. Volaris transported 2.8 million passengers during the month with a load factor of 87.6%, a 2.2 pp increase from last year. RPMs for the month declined by 2.1%, with Mexican domestic RPMs down 8.3%, while international RPMs increased by 9.0%. Compared to December 2023, we are now seeing stability across the network and the return to service of aircraft that have completed their required engine inspections. While we anticipate some ongoing fluctuations in ASM production as engine inspections are completed, we remain committed to delivering a reliable network for our customers.

Enrique Beltranena, Volaris' President and CEO, said: “We are pleased with the execution of our strategy and continue to prioritize the operational performance and network stability as we work through the Pratt & Whitney required engine inspections. We remain committed to high levels of customer satisfaction and operational excellence, reinforcing Volaris as the preferred airline in its core markets. As a result of the hard work of our ambassadors, we delivered a 99% completion rate for the full year in a challenging operating environment. I would like to thank all of our ambassadors for their efforts in 2024 and look forward to continuing excellence in 2025”.

	December 2024	December 2023	Variance	YTD December 2024	YTD December 2023	Variance
