

## Azul Announces New ESG Commitments with Release of 2020 Sustainability Report

**São Paulo, May 27, 2021** – Azul S.A., “Azul”, (B3: AZUL4, NYSE: AZUL), the largest airline in Brazil by number of cities served and departures, announces today its commitment to reaching net-zero carbon emissions by 2045 with the release of its 2020 Sustainability Report. Azul also became the first airline in Brazil to join the United Nations Global Compact (UN).

Azul's Sustainability Report highlights initiatives already in place and new commitments to sustainable growth, focused eco-efficient operation through the country's youngest and most fuel-efficient fleet, aligned with a fleet transformation plan and robust social responsibility initiatives. With this, we are helping Brazil to become a more equal country, increasing access to safe and efficient air service.

In the last decade, Azul was one of the companies that most contributed to Brazil's growth, connecting the country by offering air services to more than 100 cities and developing regions never served by aviation before. Azul was born with the intention of serving and developing Brazil, and that is what we have proudly done since our beginning. We already have the most fuel-efficient fleet in Brazil, and our future fleet transformation program will be one of the main initiatives to achieve our sustainable growth targets,” says John Rodgerson, Azul's CEO. “Now, as a signatory to the United Nations (UN) Global Compact, we take another step that reinforces our commitment to socio-environmental responsibility and the Sustainable Development Goals”, adds Rodgerson.
