### Note 1 - Operations

Caixa Econômica Federal ("CAIXA" or "Institution") is a financial institution with 164 years of operations. It was set up by Decree-Law 759 on August 12, 1969, as a public company set up under private law and linked to the Federal Government through the Ministry of Finance. It is headquartered and domiciled at Setor Bancário Sul, Quadra 4, Lotes 3 e 4, Brasília, Federal District, Brazil. In accordance with article 173 of the Federal Constitution and article 2, paragraph 1 of Law No. 13,303, of 06/30/2016, its constitution as a public company is justified by the relevant collective interest marked by the promotion of citizenship and the development of the country, both as a financial institution and agent of public policies, and as the main strategic partner of the Brazilian State.

By delegation of the Federal Government, CAIXA operates the role of operating agent of funds and social programs, among which the Severance Pay Fund (FGTS) stands out. Its main financial agent, the Fund for the Compensation for Salary Fluctuations (FCVS), the Residential Lease Fund (FAR), the Mandatory Insurance Fund for Personal Injuries caused by Motor Vehicles on Land or for its cargo, to persons transported or not (FDPVAT), among others. The funds are independent legal entities managed by specific regulations and governance structure and their own accounting, whose assets are segregated from CAIXA. Therefore, the information about those funds is not part of the limited review of CAIXA's interim financial statements by independent auditors.

(1) The amounts presented reflect the most current closing position of the funds' assets.

## Note 2 – Presentation of financial statements

#### (a) Context

CAIXA's condensed parent company and consolidated interim financial statements are the responsibility of management and were approved by the Board of Directors on June 2, 2025, and by the Board of Directors on June 3, 2025.

On initial adoption of CMN Resolution No. 4,966/2021, Caixa opted for the exemption provided for in article 79 of the presentation in the financial statements of the comparative amounts for prior periods, arising from changes in the classification and measurement of financial assets and liabilities, including expected losses associated with credit risk.

#### (b) Basis of preparation and statement of compliance

CAIXA's condensed parent company and consolidated interim financial statements have been prepared in accordance with the accounting guidelines set forth by Laws No. 4,595/1964 (National Financial System Law) and No. 6,404/1976 (Brazilian Corporate Law), CMN Resolution No. 4,966/2021 – which sets forth the accounting criteria applicable to financial instruments, as well as the designation and recognition of hedging instruments (hedge accounting), and subsequent amendments, CMN Resolution No. 4,818/2020 – which consolidates the general criteria for the preparation and disclosure of parent company and consolidated financial statements in accordance with the regulations issued by the Central Bank of Brazil (BACEN) – BCB Resolution No. 2/2020 and BCB Resolution No. 352/2023 and, in addition, the standards issued by the Brazilian Securities and Exchange Commission (CVM) to the extent that they do not conflict with the standards issued by BACEN, in accordance with accounting policies adopted in Brazil.

These financial statements are presented in reais, and all amounts have been rounded to the nearest thousands, except when otherwise indicated.

Brazilian accounting policies involve management's judgment about estimates and assumptions related to the measurement of allowances for credit losses; deferred tax assets; fair value of certain financial instruments; Provisions for civil, labor and tax lawsuits; Allowances for impairment losses on financial and non-financial assets; supplementary pension plans; assets and liabilities related to post-employment benefits; and determination of the useful life of some assets. Definitive values may be different from those established by these estimates and assumptions and will be known at the time of their settlement or due to the review of the methodologies adopted by the Company. The sensitivity of book values to estimates does not show significant disparity and estimates are periodically evaluated. The nature and book values of assets and liabilities are presented in the related notes.

#### (c) Consolidation

The condensed consolidated financial statements include the financial statements of CAIXA and its direct and indirect subsidiaries, exclusive investment funds and receivables investment funds, as shown below:

| Federation   | . باز زند ۸                | % of interest                             |  |  |
|--|----------------------------|---|--|--|
| Enterprise   | Activity                   | As of March 31, 2025                      |  |  |
| CAIXA ECONÔMICA FEDERAL  | Bank                       | Leader of the Conglomerate                |  |  |
| Caixa Loterias   | Holding company            | 100%                                      |  |  |
| Fundo de Investimento CAIXA Extramercado Exclusivo Loterias      | Investment Funds           | 100% ownership interest by<br>subsidiary  |  |  |
| Caixa Cartões  | Holding company            | 100%                                      |  |  |
| Fundo de Investimento CAIXA Extramercado Exclusivo Cartões       | Investment Funds           | 100%                                      |  |  |
| Caixa Seguridade   | Holding company            | 80%                                       |  |  |
| Caixa Holding  | Holding company            | 100%                                      |  |  |
| Caixa Corretora  | Insurance Brokerage        | 100%                                      |  |  |
| Fundo de Investimento CAIXA Extramercado Exclusivo<br>Seguridade | Investment Funds           | 100% ownership interest in the subsidiary |  |  |
| Fundo de Investimento CAIXA Extramercado Exclusivo<br>Corretora  | Investment Funds           | 100% ownership interest in the subsidiary |  |  |
| Caixa Asset  | Distribution of securities | 100%                                      |  |  |
| Fundo de Investimento CAIXA Ibirapuera Renda Fixa                | Investment Funds           | 100% ownership interest by<br>subsidiary  |  |  |
| Receivables Investment Fund – ACR IV                             | Investment Funds           | % of variable                             |  |  |

Controlled entities are those over which CAIXA has power, is exposed to or has rights to variable returns arising from its involvement, and is able to exert influence over such returns through said power. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control is established until the date that control ceases and control is evaluated on an ongoing basis.

The condensed consolidated financial statements are prepared using uniform accounting policies. The balances of balance sheet and profit or loss accounts and the amounts of intercompany transactions are eliminated.

The companies in which CAIXA Conglomerate holds direct or indirect interest and which are included in the consolidated financial statements are presented in notes 11 and 32.

#### (d) Impacts resulting from the adoption of new standards

#### (d.1) CMN Resolutions No. 4,966/2021 and BCB Resolutions No. 352/2023

CMN Resolutions No. 4,966/2021 and BCB Resolutions No. 352/2023, effective as from January 1, 2025, have had impacts on the accounting concepts and criteria applicable to financial instruments by financial institutions and other institutions authorized to operate by the Central Bank of Brazil. The purpose of the new standard was to align the criteria for classification, measurement, recognition, write-off and disclosure of financial instruments with international accounting standards.

The effects arising from the application of the accounting criteria established by CMN Resolutions No. 4,966/2021 and BCB Resolutions No. 352/2023 were recognized as an offsetting entry to the equity account, as established by CPC 23 – Accounting Policies, Changes in Accounting Estimates and Errors.

The condensed consolidated financial statements for the period ended March 31, 2025 have been prepared in accordance with Brazilian accounting practices applicable to institutions authorized to operate by the Central Bank of Brazil (BACEN), and are being presented in an additional manner, as allowed by article 77 of CMN Resolution No. 4,966/2021 and article 100 of BCB Resolution No. 352/2023 to the consolidated financial statements in accordance with the of the Institutions Regulated by the Central Bank of Brazil (COSIF) until 2027, in accordance with the provisions of BCB Resolution No. 2, of August 12, 2020.

Due to the new categories of financial instruments, the nomenclatures of the main equity and profit or loss items were revised, while CMN Resolution No. 4,966/2021 incorporates the concept of business model and the assessment of the contractual characteristics of cash flows. In order to internalize the changes, CAIXA conducted analyses and surveys about its business models. The main changes resulting from the adoption of the new standard are listed below:

- i. The "held to maturity", "available for sale" and "held for trading" categories of financial instruments have been abolished.
- ii. New measurement categories for financial instruments have been introduced:
  - Amortized Cost: the asset is managed within a business model whose objective is to receive contractual cash flows, consisting solely of payments of principal and interest. Loans and other held-to-maturity instruments fall into that category.

- Fair value through other comprehensive income: the asset is managed within a business model whose purpose is to receive contractual cash flows, consisting solely of payments of principal and interest, and of sale. Available-for-sale instruments fell into this category. Moreover, reverse sale and repurchase agreements were allocated to this category upon initial recognition.
- Fair value through profit or loss: remaining assets and royalty rights.

#### Impairment loss on loans

The valuation of financial assets, in accordance with CMN Resolution No. 4,966/2021, employs macroeconomic estimates and scenarios in addition to considering the default period, establishing the problematic asset as a target. In this sense, assets are now classified into three stages:

**Stage 1** – consists of the probability of the financial instrument being classified as a financial asset with credit recovery problems within the next 12 months, or over the expected term of the instrument if it is lower than 12 months, for financial assets originated or purchased without credit recovery problems;

**Stage 2** - considers the probability of the financial instrument becoming a credit-impaired asset over the entire expected term of the financial instrument for financial assets originated or purchased without a credit recovery problem and whose credit risk has increased significantly; and

Stage 3 - the instrument is an asset with credit recovery problems.

#### Credit and credit commitments to be released

A credit commitment is considered to be the commitment to grant credit under pre-established terms and conditions. On the other hand, the credit to be released is the commitment to release credits already contracted, linked to revolving operations.

The allowance for impairment loss on this instrument is recognized when it meets at least one of the characteristics described in note three (letter I).

#### **Securities**

The main impact on securities is the introduction of the allowance for impairment loss on loans. These financial assets, which were classified into the categories of "held for trading", "available for sale" and "held to maturity", according to Circular Letter No. 3,068/2001, have given way to the following business models: fair value through profit or loss, fair value through other comprehensive income and amortized cost.

#### Income from services and banking fees

Loans are now measured at the effective rate. As a result, revenues from the provision of services considered incremental are no longer recognized in cash in their entirety. Revenues that meet the concept of incremental are added to the contractual value of the loan transactions and make up the gross carrying amount. Therefore, incremental revenue is deferred on a straight-line basis over the term of the contract.

#### (d.2) Transition to CMN Resolution No. 4,975/2021 – Leases

In order to adopt CMN Resolution No. 4,975/2021 as from January 1, 2025, CAIXA opted to adopt the prospective approach for first-time adoption. Therefore, no impacts were recognized in the balance sheet account upon first-time adoption, only prospectively for new lease agreements.

CAIXA leases several properties and equipment. However, the most relevant items that fall into the category are rents and assignments for consideration for the installation of administrative units and branches. CAIXA does not have sub-lease agreements.

When setting lease terms, the Company considers, in addition to contractual terms, the possibility of renewing contracts for the legal terms allowed.

#### (d.3) Standards applicable to future periods

CMN Resolution No. 5,185/2024 consolidates the general criteria for the preparation and disclosure of parent company and consolidated financial statements by financial institutions and other institutions authorized to operate by the Central Bank of Brazil and brings, in its Article 12-A, the creation of the sustainability-related financial information report, adopting the following technical pronouncements from the Brazilian Committee for Sustainability Pronouncements – CBPS:

I - CBPS Technical Pronouncement 01 – General Requirements for Disclosure of Financial Information related to Sustainability, as approved on September 12, 2024; and

II - CBPS Technical Pronouncement 02 – Climate-Related Disclosures, as approved on September 12, 2024.

An assessment of the impacts of implementing the standard is underway at CAIXA and is expected to be completed by its effective date in 2026.

### Note 3 – Significant accounting policies

#### (a) Foreign currency translation

These financial statements are presented in reais, which is CAIXA's functional currency. The items included in the financial statements of each group entity are measured using CAIXA's functional currency.

Transactions in foreign currencies are translated into the Company's functional currency at the exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the exchange rates of the functional currency at the exchange rate at that date. Gains or losses resulting from translation are recognized in profit or loss for the period.

#### (b) Results of operations

Revenues and expenses are recognized on an accrual basis when the related underlying event occurs, simultaneously, when they relate to each other, and regardless of receipt or payment.

Fixed-rate finance charge transactions are stated at redemption value and income and expenses for the future period are stated as a contra account to the related assets and liabilities. Variable-rate or foreign currency-denominated transactions are adjusted for inflation through the reporting date.

Interest income and expenses are recognized on a pro rata basis and calculated according to the exponential method, except those related to discounted receivables or foreign transactions, which are calculated under the straight-line method.

#### (c) Cash and cash equivalents

The amount of cash and cash equivalents in local currencies are stated at historical cost, while foreign currency amounts are translated using the exchange rate disclosed by the Central Bank of Brazil on the reporting date.

Cash equivalents (interbank investments) are highly liquid and their purpose is to fulfill short-term commitments that mature within 90 days or less from the acquisition date and pose an insignificant risk of changes in their market value.

The breakdown of cash and cash equivalents is presented in note 5.

#### (d) Financial instruments – Recognition, classification and measurement

#### (d.1) Date of recognition

All financial assets and liabilities are initially recognized on the trade date, i.e., the date on which CAIXA becomes party to the contractual relationship of the instrument, including purchases or sales of financial assets that require their delivery within a time frame established by market regulation or practice.

#### (d.2) Initial recognition of financial instruments

Management initially classifies financial instruments on the date of their acquisition, origination or issue:

- I Transaction price calculated according to prevailing regulation for receivables from contracts with clients without a significant financing component; or
- II Fair value calculated according to prevailing regulations in the other cases.

#### (d.3) Classification of financial assets according to the business model

CAIXA classifies and measures financial assets according to the business model and contractual cash flow characteristics. Financial assets are classified into three categories: amortized cost (AC); fair value through other comprehensive income (FVOCI); and fair value through profit or loss (FVTPL).

The entity's business model for managing financial assets is normally observable and not defined in an imposing manner, through specific activities performed by the entity such as:

- The manner in which the performance of financial assets under that particular business model is reported to key management personnel; and
- What are the risks linked to each defined aggregation of financial assets and how are they managed.

The business model refers to the way CAIXA manages its financial assets to generate cash flows. In such scenario, management defines to which of the following business models the portfolios belong to:

- Hold assets to receive contractual cash flows: financial assets are managed within a business model whose objective is to generate return by holding financial assets to receive the related contractual cash flows;
- Hold the assets both to receive the contractual cash flows and for sale: the objective is to receive the contractual cash flows and possible sale of the financial assets when appropriate. In this model, sales are usually more frequent and with a higher volume than in the business model whose objective is to hold financial assets to receive contractual cash flows; and
- Other business models: the objective is not to hold assets to receive contractual cash flows, nor to hold assets to receive and to sell cash flows. Financial assets are managed within a business model whose objective is to generate return only by selling the financial asset.

When financial assets are managed within business models, CAIXA should apply the SPPJ (Payment of Principal and Interest Only) test. Financial assets managed within the business model are measured at FVTPL.

The purpose of the SPPJ test is to evaluate the contractual terms of financial instruments to determine whether they give rise to cash flows on specific dates that fall solely as payments of principal and interest on the principal amount. Principal is the fair value of the financial asset upon initial recognition, and interest is the consideration for the time value of money, the credit risk associated with the principal, other risks, other costs and profit margin.

Financial assets that do not pass the SPPJ test cannot be classified as "solely payments of principal and interest" assets and must be classified as at FVTPL.

#### (d.3.1) Financial assets measured at amortized cost (AC)

Loans and receivables are non-derivative financial assets with fixed or determinable payments and a fixed maturity, for which CAIXA intends to receive the related cash flows, as well as to collect the principal and interest payments. Therefore, to be classified as AC, assets must undergo the SPPJ test. Assets resulting from restructuring or renegotiation also fall into this category.

Financial assets measured at amortized cost, which consist of receivables from contracts with customers without a significant financing component, are initially recognized at the transaction price and in all other cases are initially recognized at fair value. Transaction costs individually attributable to the transaction are added to the acquisition or origination of assets and are deducted.

All loan transactions are classified as amortized cost, except if the purpose is to generate a return on the sale of the asset or the cash flows do not consist solely of payments of principal and interest on specified dates.

Transaction costs and the amounts received on the acquisition or origination of the instrument considered immaterial are allowed to be recognized in profit or loss.

When CAIXA chooses this option, it must define in its accounting policy relative and absolute materiality criteria, which are:

I - Consistent and verifiable; and

II - applied to all financial instruments, regardless of the nature of the cost or revenue to be recognized.

Revenues and charges are recognized in profit or loss at least on a pro rata basis at the time of trial balances and balance sheets, using the effective interest method.

#### (d.3.2) Financial assets measured at fair value through other comprehensive income (FVOCI)

The fair value through other comprehensive income category includes assets that are managed under a business model whose purpose is both to maintain the contractual cash flows and to generate returns from the sale of financial assets. CAIXA may also irrevocably designate an equity instrument for which the purpose is not to generate return from its sale to the category of Fair Value in Other Comprehensive Income.

Transaction costs individually attributable to the transaction are added to the acquisition or origination of assets and are deducted.

Interest income is recognized in profit or loss. Dividends and other similar forms of remuneration on equity instruments are deducted from the instruments' book value, when CAIXA obtains the right to receive them, if they refer to the year of the instrument's acquisition and represent a recovery of the initial investment or are recognized in profit or loss for the period, in the other cases. Foreign exchange translation gains and losses are recognized in profit or loss.

Financial assets classified as at FVOCI are stated at fair value, at least at the time of trial balance sheets and balance sheets, and the valuation or devaluation is computed as an offsetting entry to the appropriate other comprehensive income account, at the net of tax effects, until the financial asset is no longer recognized.

#### (d.3.3) Financial assets measured at fair value through profit or loss (FVTPL)

The fair value through profit or loss category includes assets whose objective is to generate return solely by selling financial assets, as well as assets that do not meet the criteria for measurement at amortized cost or FVOCI.

Interest income is recognized in profit or loss. Dividends and other similar forms of remuneration on equity instruments are recognized by CAIXA when it obtains the right to receive them, measured according to the amount declared by the investee. Foreign exchange translation gains and losses are recognized in profit or loss.

Financial assets classified as at FVTPL are stated at fair value, at least at the time of trial balance sheets and balance sheets, and the appreciation or depreciation is recorded as an offsetting entry to the proper revenue or expense account in profit or loss for the period.

#### (e) Hedge accounting

CAIXA uses derivative financial instruments, such as swaps, interest rate futures and exchange futures in foreign currency, held in the portfolio for financial or accounting hedging purposes.

Derivatives are accounted for according to the fair value description and held as assets, when positive, and as liabilities, when negative. They are subsequently revalued at fair value, and the appreciations and devaluations are recognized directly in profit or loss for the period, except for the effective portion of cash flow hedges that is recognized directly in equity.

CAIXA is based on the principle of hedge accounting, which explains that the use in the financial statements of financial instruments to manage exposures resulting from specific risks that may affect the entity's profit or loss or other comprehensive income.

When applying hedge accounting methodology, CAIXA documents, at the beginning of the transaction, the relationship between the *hedging* instruments (derivatives) and the hedged items, the risk management objectives and the strategy for *hedging* the realization.

Documentation also covers the nature of the hedged risks, the nature of the excluded risks, the prospective statement of the effectiveness of the hedging relationship and the manner in which the effectiveness of derivatives in offsetting changes in fair value or cash flows of hedged items will be assessed.

CAIXA applies the hedge accounting methodology and classifies derivative financial instruments into the fair value hedge category, which protects CAIXA from the effects of changes in the fair value of assets or liabilities or firm commitments that may affect profit or loss or other comprehensive income. There is also the cash flow hedge, which protects CAIXA from the effects of variability in cash flows attributable to a specific risk of the totality or of a component of an asset or liability that may affect profit or loss. Finally, there is the classification of net investment abroad hedging transactions, which totally or partially protect CAIXA from the risks arising from exposure to exchange rate fluctuations on the net investment abroad whose currency is different from the local currency.

If the hedging instrument is discontinued, and the hedging instrument is a financial instrument measured at amortized cost, the gain or loss reported in CAIXA should be amortized in profit or loss in the following manner:

- In proportion to the remaining term of the hedged item, using the effective interest rate, which shall be recalculated on the date when repayment begins; or
- Fully when the hedged item is written off.

The breakdown of the amounts recorded in derivative financial instruments, both in balance sheet and memorandum accounts, is presented in note 6.2.

#### (f) Interbank investments

Interbank investments were allocated to the category of fair value through other comprehensive income upon initial recognition in the case of money market investments (own portfolio and third-party funds) and to the category of amortized cost for interbank deposits. Income from interbank investments is obtained from expenses incurred on reverse sale-and-repurchase agreements (difference between repurchase and sale amounts) and from revenue on financing transactions backed by third-party fixedrate securities (difference between resale and purchase amounts).

Interbank investments are measured at fair value, at least at the time of trial balance sheets and balance sheets, and their valuation or devaluation is recorded as an offsetting entry to the appropriate other comprehensive income account, net of taxes, until the investment is no longer recognized.

The composition and terms of interbank investments are presented in notes 7.1 and 8.2.

#### (g) Financial liabilities

On initial recognition, CAIXA classifies financial liabilities into the amortized cost category, except for derivatives that are liabilities and must be classified into the fair value category in profit or loss; Financial liabilities generated from transactions involving the loan or lease of financial assets, which should be classified as fair value through profit or loss; financial liabilities generated by the transfer of a financial asset; credit commitments and credits to be released; The financial guarantees provided, which, subsequent to initial recognition, shall be measured at the higher of:

- The allowance for impairment loss on loans; and
- The fair value on initial recognition, less the cumulative amount of revenue recognized in accordance with specific regulations.

Financial liabilities are classified as amortized cost. Subsequent measurement is also at amortized cost, except for:

- Financial liabilities measured at fair value through profit or loss: derivatives and financial liabilities involving loans or leases of financial assets;
- Financial liabilities generated by the transfer of a financial asset: recorded as an offsetting entry to the amounts received for the transaction in assets;
- Financial liabilities measured at present value: credit commitments and credits to be released; and
- Financial guarantees: measured at the higher of the allowance for impairment loss on loans and the fair value on initial recognition, less the cumulative revenue recognized in accordance with specific regulations.

The reclassification of financial liabilities is prohibited.

#### (h) Derecognition of financial assets and liabilities

#### (h.1) Financial assets

A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is written off when:

- The rights to receive the cash flows from the financial asset are past due; or
- CAIXA transfers the right to receive the cash flows from the financial asset or enters into a pass-on agreement and substantially transfers all the risks and rewards of this asset.

When CAIXA transfers the right to receive the contractual cash flows from the asset or enters into a passon agreement and does not substantially transfer or retain all of the risks and rewards, but retains control of the asset, it continues to recognize such risk to the extent of its continuing involvement with the transferred asset, recognizing a related liability.

The transferred assets and the related liabilities are measured based on the rights and liabilities retained by CAIXA.

The continuing involvement, which takes the form of a security interest in the transferred asset, is measured at the lower of the original amount recorded in the books of account and the maximum amount of compensation that CAIXA may be required to pay.

In transactions that involve a substantial transfer of risks and rewards, recognition is made upon the writeoff of the asset and its allocation in profit or loss. On the other hand, in transactions where substantial retention of risks and rewards is maintained, the recognition is made with the financial asset sold or transferred, which remains, in its entirety, recorded in assets. There is also the income receivable against an assumed liability and the income and expenses that are recognized monthly.

For transactions without substantial transfer or retention of risks and rewards, the asset should be written off and the new asset and the new liability should be recognized separately when recognizing the transfer of control.

When control is recorded, the following events occur:

- The asset remains in proportion to the continued involvement (exposure);
- Assumed liabilities must be recorded; and
- The results of the transaction are determined.

#### (h.2) Financial liabilities

Where an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference in the book value is recognized in profit or loss. The Company derecognizes a financial liability when its contractual obligations expire, are settled, canceled or terminated.

# (i) Deposits and money market funding, funds from acceptance and issuance of securities and borrowings and on-lendings

Deposits and bills of exchange are stated at settlement amounts and consider charges payable by the reporting date, recorded on a pro rata basis.

Deposits; money market funding and borrowings and on-lendings; and the terms and amounts of the funds from the issuance of securities are recognized in balance sheet and profit or loss accounts, and their charges are recognized monthly according to the flow of their terms, as shown in notes 15.1, 15.2 and 15.3, respectively.

Because these transactions have fixed rates, funding through the issuance of securities has its expenses recognized in profit or loss according to the terms of the transactions and is presented as a contra account to the related liabilities.

#### (j) Unearned revenue

Funds received in advance to be recognized as revenue in profit or loss in subsequent periods and for which no refund to the other parties involved in the agreement is expected over the normal course of the agreement. They are recognized initially as prepaid revenue in liability and are recognized in the statements of income over the term of the agreement.

#### (k) Provisions, contingent assets and liabilities and tax and social security liabilities

The recognition, measurement and disclosure of provisions for contingent liabilities and contingent liabilities are made in accordance with the criteria set by CPC 25 – Provisions, Contingent Liabilities and Contingent Assets, approved by CMN Resolution No. 3,823/2009.

- **Contingent liabilities**: under CPC 25, contingent liabilities are not provided for, and administrative or legal cases assessed as possible losses are only disclosed in the notes to the financial statements;
- **Provisions for liabilities**: provisions for liabilities are recognized whenever loss is considered probable, which is a probable outflow of economic benefits to settle the obligation, and provided that the amounts involved can be measured reliably;
- **Contingent assets:** CAIXA does not have contingent assets whose inflow of economic benefits is virtually certain.

Details about contingent liabilities and provisions, as well as their movements, is presented in note 16.

#### (I) Loan commitments, credits to be released and financial guarantees provided

Guarantees are commitments entered into to protect the financial liabilities of third parties. The accounting treatment of guarantees is crucial for a proper assessment of CAIXA's risk and financial exposure.

The allocation to the internships must consider the chances of future disbursements by the institution in the event that the counterparty does not honor the contractual obligations.

CAIXA provides for expected loss on loans and credits to be released to cover losses arising from the possible need to honor obligations. Commitments must meet at least one of the following characteristics (CMN Resolution No. 4,966/2021):

- The commitment is not cancellable unconditionally and unilaterally by the institution;
- The institution does not have the capacity to cancel, block or suspend the contract or the disbursement of funds or does not execute the cancellation, blocking or suspension in the normal day-to-day management of the financial instrument; or
- The Bank is unable to monitor the financial instrument or the financial situation of the counterparty individually to allow the immediate cancellation, blocking or suspension of the commitment or disbursement of funds if the counterparty's financial capacity is reduced.

The recognition of the provision for financial guarantees provided by CAIXA follows the criteria established by CMN Resolution No. 4966/2021, which fall into the following categories:

Loans to other entities – on-lendings to financial institutions and public entities, where CAIXA provides FGTS as collateral for the transferred amounts. Therefore, the allowance for impairment loss is recognized according to expected losses, taking into consideration the borrowing entities' risk associated with the recourse guarantees, which consist of the loan portfolios formed by the borrowing institutions and funding FGTS (Severance Pay Fund).

FIES – These are credits intended for individual students, selected by the FNDE Operator Agent (National Fund for the Development of Education), with resources from FIES, according to rules established by MEC and by the FNDE Operator Agent, directed to the financing of non-free undergraduate courses.

FIES transactions are part of the CAIXA loan portfolio, whose allowance is based on expected loss, considering information about PD (probability of default), LGD (loss given default) and stage of each transaction.

Details about the loans, credits to be released and financial guarantees granted are presented in note 17.

#### (m) Actuarial liabilities

Employee benefits, consisting of short-term benefits granted to current employees, are recognized on an accrual basis and are expensed as the related service is provided. Post-employment benefits under CAIXA's responsibility related to supplementary retirement benefits and health care are recognized according to the criteria set by Technical Pronouncement CPC 33 (R1), adopted by the Central Bank of Brazil through CMN Resolution No. 4,877/2020.

CPC 33 (R1) establishes specific parameters for the sponsoring company to measure the assets, liabilities and, consequently, the retirement plan surplus and deficit. However, due to legal provisions present in Brazil, the financial statements of the related plans must be prepared in accordance with the provisions established by the national competent body, which leads to different surplus and deficit calculations.

Considering that CAIXA has already recognized an actuarial provision , in accordance with the provisions of CPC 33 (R1), there is only a prerogative to supplement this provision if the deficit, which is the subject matter of a reduction plan, determined in accordance with local legislation, is higher than that provided for by CPC 33 (R1).

In this case, the addition is made as an offsetting entry to equity, according to Technical Interpretation ICPC 20 - Defined Benefit Asset Limit, Minimum Funding Requirements and their Interaction.

Actuarial reviews are made every six months. Therefore, the notes on employee benefits are prepared in the six-month periods ended June 30 and December 31, and their details are presented in note 18.

#### (n) Other financial assets and liabilities

The other financial assets are non-transitory funds invested by CAIXA and do not fall into the category of cash and cash equivalents, interbank liquidity transactions, securities transactions, loan transactions and loan-granting transactions, given that there are defined groups for these specific transactions.

Other financial liabilities consist of liabilities that do not fit into deposits, repurchase and reverse repurchase agreements, debt instruments and derivatives, and borrowings and on-lendings.

Details about financial assets and liabilities are presented in notes 8.5 and 15.4, respectively.

#### (o) Other non-financial assets and liabilities

Other assets are measured at the realizable value including, when applicable, earnings and monetary and foreign currency gains and losses allocated on a pro rata basis and impairment loss, when considered necessary. The other liabilities included known and estimated amounts plus, when applicable, monetary and exchange rate fluctuations incurred on a pro rata basis. Details about non-financial assets and liabilities are presented in notes 14 and 19, respectively.

#### (p) Allocation of financial instruments in stages

The process of classifying CAIXA's financial instruments into stages is based on credit quality, where the deterioration in credit risk is assessed since initial recognition. The correct allocation of instruments into stages is important for the disclosure of accurate information and a correct assessment of the risks inherent in these assets.

CMN Resolution No. 4,966/2021 introduced the definition of stages for the classification of financial instruments, which replaces the classification of loans in ratings.

CAIXA classifies its financial instruments into the following stages:

#### (p.1) Stage 1

Financial instruments with signs of credit risk deterioration, but which have not yet shown significant losses since initial recognition. Assets whose loss is expected over the next 12 months; and

Financial instruments whose credit risk has not increased significantly after initial recognition. Loans and receivables are financial assets that are up-to-date or past due within 30 days and whose credit risk is rated as low risk.

#### (p.2) Stage 2

Financial instruments with a significant increase in credit risk since initial recognition, indicating the possibility of an increase in default. They are evidenced by delays ranging from 31 to 90 days in the payment of principal or charges or whose internal credit rating of the clients has migrated from low to medium or high risk, but they are not problematic assets.

#### (p.3) Stage 3

Financial instruments with credit recovery problems, in which case the loss is fully recognized. Principal or charges are evidence of a delay of more than 90 days in the payment of principal or charges or an indication that the related obligation will not be fully settled. At this stage interest is recognized on a cash basis.

#### (p.4) Allocation review

The stage allocation should be reviewed:

- Monthly, in view of the late payment of principal or charges;
- Every six months for a financial instrument of the same counterparty that is higher than 5% of the institution's equity;
- Once every 12 months for the other months, except for financial instruments proven to be of low risk;
- Whenever new facts indicate a significant change in the credit quality, considering, for example, the economic scenario; and
- When the instrument is renegotiated.

#### (p.5) Relocation

A reallocation occurs when it becomes evident that the credit quality of a financial instrument has changed significantly since initial recognition, which results in a change in the stage from that in which the instrument was previously classified. Reallocation assessment aims to accurately reflect any deterioration or improvement in credit quality over time.

### (p.6) Relevant aspects of the classification into stages:

Reallocation from 3rd to 1st stage – when a financial asset no longer qualifies as a credit-impaired asset (problematic asset).

Reallocation from the 2nd to the 1st stage – when there is a significant reduction in credit risk.

Allocation to the 3rd stage - When a financial instrument is allocated to the third stage, all financial instruments of the same counterparty must be allocated to the third stage, except if the financial instrument has proven to have lower risk (drag).

#### (q) Credit risk

There may be a significant increase in credit risk when:

- Changes occur in external or internal indicators;
- Adverse changes in business conditions occur;
- Other obligations of the counterparty are restructured; and
- Late payment of principal or charges.

Financial instruments are allocated to the first stage when the principal or charges are overdue for more than 30 days, i.e. when there is a significant increase in credit risk.

One can wait up to 60 days in arrears to consider the significant increase in credit risk.

Credit risk also includes:

- Counterparty credit risk, which is the possibility of losses arising from the default on obligations related to the settlement of transactions involving bilateral flows, including the trading of financial assets or derivatives; and
- Concentration risk, understood as the possibility of losses associated with significant exposures: to the
  same counterparty; counterparties that operate in the same economic segment, geographic region or
  segment; to counterparties whose revenues depend on the same type of merchandise or activity; to
  financial instruments whose risk factors are significantly related; associated with the same type of
  financial product or service; and whose risk is mitigated by the same type of instrument.

#### (q.1) Criteria applied to decharacterize the instrument as a credit-impaired asset:

The de-characterization (cure) of problematic assets occurs from the finding that an asset shows evidence of overcoming the deterioration in credit quality, observing the application of the criteria established for a specific minimum period after its marking, and provided that there are no overdue installments, including charges.

#### (r) Restructured operations

Transactions are classified as restructured when they involve renegotiation which entails significant concessions to the counterparty due to a significant deterioration in its credit quality, which would not be granted if such deterioration were not reported, among other cases that show renegotiation with increased risk.

#### (r.1) Measurement of renegotiated or restructured instruments

In the case of restructuring of financial assets, the gross carrying value of the instrument must be revalued to represent the present value of the restructured contractual cash flows, discounted using the effective interest rate originally contracted. When the financial asset is restructured, transaction costs must be added to and possible amounts received in the restructuring of the instrument must be deducted. The difference arising from the revaluation of the gross carrying amount of the instrument should be recognized in profit or loss for the period in which the restructuring takes place.

CMN Resolution No. 5,146/2024 amends CMN Resolution No. 4,966/2021 and allows, until December 31, 2026, the use of the renegotiated effective interest rate to determine the present value of contractual cash flows restructured.

#### (s) Treatment of financial instruments by portfolios

CAIXA may collectively assess credit risk and may group financial instruments as follows:

- Same homogeneous risk group;
- Retail transactions; and
- They need to be managed on a mass basis.

#### (s.1) Homogeneous risk group

Consists of the set of financial instruments with similar characteristics, which allow the assessment and quantification of credit risk collectively, considering the characteristics of the counterparty's credit risk; the type of financial instrument, type of collateral or collateral; the stage to which it is allocated; late payments of principal or charges; as well as the economic segment, geographic location, origination and term.

#### (t) Method used to calculate the allowance for impairment loss on loans

CAIXA recognizes the allowance in an amount corresponding to the expected losses associated with the credit risk of financial instruments. The provision should be recognized on the initial recognition of the financial instrument as an expense for the period, with an offsetting entry to the proper account:

- 1) assets in the case of financial assets, in the case of losses on financial assets; and
- 2) Liabilities, in the case of losses related to:
- Financial guarantees provided;
- commitments of credits to be released; and
- Consideration falling due on operating leases.

In order to measure the provision, CAIXA considers the following calculation bases:

- 1) the gross carrying amount of financial assets; and
- 2) Present value:
- of the total amounts receivable from lease transactions;
- estimated future disbursements linked to financial guarantee agreements provided;
- the estimated use of credit commitment funds; and
- of the credit to be released.

The allowance for impairment loss on loans should be reviewed at least monthly.

When recovery of the financial asset is not likely, the write-off of that asset should occur.

Financial instruments that are renegotiated must be allocated to the third stage, with an allowance equal to 100% of the instrument's value.

#### (u) Taxes

Taxes applicable to CAIXA and its subsidiaries are calculated according to the rates presented in the table below:

| Taxes   | Aliquot  |
|---|----------|
| Income tax (15.00% + surtax of 10.00%)                | 25%      |
| Social Contribution Tax – CSLL (1)                    | 20%      |
| PIS/Pasep (2)   | 1%       |
| Contribution for Social Security Funding – COFINS (2) | 4%       |
| Service Tax – ISS                                     | Up to 5% |

(1) The rate of 20% is applicable to CAIXA, 15% to CAIXA Asset and 9% to the other companies of the conglomerate. In the period from August 1 to December 31, 2022, the Social Contribution on Net Income rate is raised by 1% for banks and other financial entities, as provided for in Law No. 14,446, of 09/02/2022; and

(2) For non-financial companies under the non-cumulative taxation system, the PIS/PASEP rate is 1.65%, and the COFINS rate is 7.6%.

The recognition of deferred tax assets is based on technical studies and analyses by Management, considering prevailing tax rates. The criteria for measuring and recognizing tax assets and liabilities have been consolidated by CMN Resolution No. 4,842/2020 since January 1, 2021.

As from January 2025, the realization estimates of Deferred Tax Assets include expected and incurred losses, according to CMN Resolution No. 4,966/2021 and Law No. 14,467/2022 for transactions defaulted on by December 31, 2024. Losses from delinquent transactions and from companies that are undergoing bankruptcy or court-supervised reorganization may be deducted from the income and social contribution tax bases.

Law No. 14,467/2022, amended by Law No. 15,078/2024, allows credits that were unpaid as of December 31, 2024, to be utilized at the rate of 1/84 per calculation period as of January 2026. CAIXA may choose until 12/31/2025 to make the aforementioned use at the rate of one hundred and twenty (1/120) in each calculation period, as of January 2026.

The new regulatory framework was considered by the study that originated CAIXA's Tax Policy, published in 2024, establishing the guidelines for governance and management of compliance with tax rules, through legislative monitoring, control of the application of the related legislation and the bank's tax compliance situation.

The breakdown of IRPJ and CSLL amounts, their calculations, origin and expected realization of tax credits are in support by note 10.

#### (v) Investments

Investments in subsidiaries, joint ventures or companies over which CAIXA has significant influence are accounted for under the equity method. In order to calculate the share of profit (loss) of equity-accounted investees of permanent investments in non-financial companies, the amounts are adjusted to comply with the standards and instructions issued by the National Monetary Council (CMN) and the Central Bank of Brazil (BACEN). Other permanent investments are stated at acquisition cost.

The breakdown of investments and of equity-accounted investees is presented in note 11.

#### (w) Property and equipment

Property and equipment includes tangible assets used for the maintenance of its operating activities, recorded at acquisition cost and depreciated using the straight-line method, according to CMN Resolution No. 4,535/2016.

CAIXA started to apply CMN Resolution No. 4,975/2021 and related CPCs, according to a prospective approach, and agreements entered into or renewed as from January 1, 2025, will be recognized according to the new regulations.

CAIXA, as a lessee, has operating leases that basically consist of lease agreements and assignments for consideration for the installation of administrative units and branches; No sub-lease agreements.

In addition to contract terms, the possibility of renewing contracts for the statutory periods is allowed, starting from the date the agreement is signed. For lease agreements of low value, such as mobile phones and printers, a lease exemption applies.

The useful lives of property and equipment for own use are reviewed at least at the end of the reporting period and adjusted as necessary. Right-of-use assets are depreciated over the lease term and revalued annually or when there is sign of impairment.

CAIXA does not finance property, plant and equipment and does not have related borrowing costs. The breakdown of the amounts recorded as property and equipment is in note 12.

#### (x) Intangible assets

CAIXA's intangible assets basically consist of the acquisition of payroll and software projects.

These assets are initially recognized at acquisition or production cost and subsequently minus accumulated amortization calculated using the straight-line method, according to contractual terms (CMN Resolution No. 4,534/2016).

Payroll acquisitions consist of amounts paid under business partnership agreements with the public and private sectors to provide banking services consisting of processing payroll and payroll loans, maintenance of the collection portfolio, payment services to suppliers and other banking services. Its useful life is five years and its monthly amortization is calculated by dividing the value of the asset by the useful life, less the grace period.

Software projects consist of software acquisitions and internal development, and internally developed software is recognized as an intangible asset only if CAIXA can identify the capacity to use or sell them, and the generation of future economic benefits can be demonstrated reliably. Its useful life is five years and its amortization is calculated monthly according to one sixtieth (1/60) of the asset's cost value. The breakdown of the amounts recorded in intangible assets is presented in note 13.

#### (y) Impairment losses

CAIXA evaluates financial and non-financial assets at least annually or at any time when facts that interfere with their value become known, with the purpose of identifying evidence of devaluation in their book value. If there is an indication of impairment, the asset's recoverable amount is estimated, and if it is confirmed, such impairment loss must be recognized immediately in profit or loss.

The net book value of an asset is defined after deducting the allowances for impairment losses (CMN Resolution No. 4,966/2021).

Right-of-use assets are tested for impairment if there is any indication that the leases with which they are associated do not bring in a significant manner the benefits expected at the beginning of the lease agreement (for example, idleness in the use of the assets).

#### (z) Recognition of revenues and expenses

CAIXA prepares its consolidated financial statements on the accrual basis.

The following specific recognition criteria must be met before the income or expense is recognized.

#### (z.1) Interest income and expense

Income and expenses are recognized on the accrual basis. Interest income, fees and commissions are recognized when the amount of the income and its associated costs and the stage of completion of the transaction can be measured reliably and it is probable that the economic benefits associated with the transaction will be realized.

Interest income or expenses are recognized by using the TJEO (Effective Interest Rate) for all financial instruments measured at amortized cost, interest-bearing financial assets classified as at fair value through other comprehensive income, and financial instruments designated at fair value through profit or loss.

The TJEO is the rate that exactly discounts estimated future receipts or payments over the expected life of the financial instrument or, when appropriate, in a shorter period, to the net carrying amount of the financial asset or liability. The calculation of the TJEO considers all contractual terms of the financial instrument and includes any incremental rates or costs directly attributable to the instrument and which are part of the effective rate, except for expected credit losses.

The book values of financial assets and liabilities are adjusted whenever CAIXA reviews its estimates for payment and collection. It is calculated according to the original interest rate of the contract. The respective adjustment is recorded as "Interest and related income". However, for a financial asset that has been reclassified to which CAIXA subsequently increases its estimate of future cash collection as a result of an increase in the probability of credit recovery, the effect of this increase is recognized as an adjustment in the effective rate since the date of the change in the estimate.

#### (z.2) Income from services and banking fees

Income from services and banking fees are recognized by CAIXA, when it provides or makes the services available to clients, in an amount that reflects the consideration expected in exchange for the services. Incremental costs, when material, are recognized in assets, thus impacting the effective interest rate of the transaction, and are recognized in profit or loss only when contracts are evolving.

For purpose determining the recognition of revenues, CAIXA evaluates judgment to check whether the performance obligation is satisfied when the service is provided or over the term of the contracts.

#### (z.3) Income from dividends

Dividends from dividends received from investments in associates and jointly controlled entities are recognized as income when approved at the related shareholders' meetings.

#### (aa) Recurring and non-recurring profit (loss)

Under BCB Resolution No. 2/2020 the recurring and non-recurring profit (loss) is to be disclosed in a segregated manner in notes to the financial statements. For the purposes of the Resolution, non-recurring profit (loss) is considered to be profit or loss if: I - is not related or is incidentally related to the institution's typical activities; and II - is not expected to occur very often in future fiscal years. Details about recurring and non-recurring profit (loss) are presented in note 36.

#### (bb) Subsequent events

A subsequent event is an event that occurs between the end of the reporting period and the date that the financial statements are authorized for issue. They consist of:

- Events that give rise to adjustments: events that show conditions that already existed on the reporting date; and
- Events that do not give rise to adjustments: are those events that show conditions that did not exist on the reporting date.

Subsequent events, if any, will be described and disclosed in note 38 according to the criteria set by CPC 24 – Subsequent Events, approved by CMN Resolution No. 4,818/2020.

### (cc) Initial adoption of CMN Resolution No. 4,966/2021

The table below shows the balance sheet classified according to CMN Resolution No. 4,966/2021 and the consequences of adopting the standard:

| Par                                       | ent Company                 |                   |                            |                             |  |
|---|-----------------------------|-------------------|----------------------------|-----------------------------|--|

## Note 4 - Significant judgments and estimates

CAIXA makes estimates and judgments in accordance with its accounting policies, which reflect the complexity and subjectivity involved in the preparation of the notes. Assumptions are determined in accordance with the applicable accounting standard.

#### (a) Expected credit loss

CAIXA recognizes an allowance for allowance for impairment loss on loans based on prudential and consistent criteria, taking into consideration the probability of default and the risks inherent in each transaction. Provisions are not a static fact, and may be adjusted whenever there are significant changes in risk factors.

The process of determining the level of provision requires continuous estimates and judgments. Therefore, it is possible that actual losses, when they occur in subsequent periods, may differ from the estimates made according to the assumptions and assumptions in effect at the time of valuation.

At CAIXA loss is reviewed monthly for retail and wholesale segments are reviewed half-yearly or annually.

CAIXA sets accounting concepts and criteria for recognizing the allowance for impairment loss on loans to the following financial instruments:

- Financial assets;
- Financial guarantees provided; and
- Credit commitments and credits to be released.

The techniques and assumptions used to measure allowance for impairment loss on loans are described in note 33 - Risk and capital management.

#### (b) Assessment of impairment loss on loans

CAIXA assesses the expected credit risk loss considering the probability of the instrument being characterized as a credit-impaired asset and the expected recovery of the financial instrument.

CAIXA uses a simplified methodology for calculating the allowance for impairment loss on loans, which allows a more accurate estimate of expected losses and helps to ensure the soundness of the Company's business.

### (c) Tax assets and liabilities

CAIXA accounts for deferred tax assets when there are deductible temporary differences that will result in future reductions in income taxes. Deferred tax liabilities, on the other hand, arise when there are taxable temporary differences that will result in higher taxes payable in the future.

Such differences arise when the tax basis of an asset or liability is lower than its carrying amount and these differences are expected to reverse, increasing the company's taxable profit in future years.

#### (d) Amortization and depreciation

Amortization and depreciation are concepts that involve the analysis of the allocation of the depreciable value of a tangible or intangible asset over its useful life.

Amortization refers to the process of gradually allocating the cost of an intangible asset over time. This means that, over the useful life of the asset, CAIXA recognizes an expense corresponding to the consumption of that asset, reducing its book value.

Depreciation analyzes the loss of value of the Bank's tangible material assets according to their time of use. As physical assets are used, they lose value due to wear and tear, obsolescence, or deterioration. Depreciation allows CAIXA to recognize this impairment loss in a systematic manner, ensuring that the residual value of assets is faithfully represented in the accounting records.

#### (e) Provisions

CAIXA recognizes provisions for liabilities considering the opinion of the General Counsel and Management, the nature of the actions, their similarity with previous proceedings, the complexity and position of appeal courts. The amount recognized as a provision should be the best estimate of the outflow of funds required to settle the current obligation at the reporting date.

A provision is also recognized to cover losses on financial guarantees provided in any manner in the proper liability account, with an offsetting entry to profit or loss for the period.

Contingent liabilities whose likelihood of unfavorable outcome is remote do not require provision or disclosure. The analysis and assessment of losses is based on the opinion of the Legal Department and Management.

Provisions are recognized when:

- CAIXA has a present obligation (legal or constructive) as a result of a past event;
- It is probable that an outflow of resources that embody economic benefits will be required to settle the obligation; and
- The amount of the obligation can be estimated reliably.

#### (f) Fair value and fair value hierarchy

Considering the concept of fair value, when there is no quoted price in an active market for a financial instrument and it is not possible to identify recent transactions with a similar financial instrument, CAIXA defines the fair value of financial instruments according to market pricing methods, such as the present value method obtained from discounted cash flows. and assuming assumptions such as the adoption of a credit spread based on the issuer's credit rating, the inclusion of an early redemption model using a defined discount rate in the construction of a binomial probability tree (for instruments with the possibility of early redemption) or other valuation techniques.

Under the present value valuation of financial instruments, future cash flows estimated according to the instruments' profitability indexes are discounted to present value considering interest flows, principal payments and discount curves.

The purpose of the credit spread is to adjust the price based on market or internal perception of the status of the issuer of a particular instrument at the reporting date.

The Hull binomial probability tree construction model is used to value private instruments with early redemption clauses.

CPC 46 (IFRS 7) specifies a hierarchy of valuation techniques based on the criterion of using observable or unobservable inputs.

Observable data reflects information obtained in the market from independent sources and unobservable data reflects the market assumptions used by the Institution.

These two types of data have created the following fair value hierarchy:

- Level 1 quoted prices (unadjusted) in asset markets for identical assets or liabilities. This level includes listed securities and debt instruments traded on the stock, mercantile and futures exchange, for example;
- Level 2 inputs other observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices), except for those included in Level 1, including most over-the-counter derivative contracts, negotiated loans and structured debt issuance; and
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs). This level includes equity and debt instruments significantly composed of unobservable inputs.

The methods and assumptions described above may result in a fair value that does not indicate the net realizable value of an instrument in a particular transaction given market conditions. However, CAIXA believes that the methods and assumptions adopted by it are appropriate to the contractual characteristics of each instrument and consistent with best market practices. In addition, the application of different methods or the use of different assumptions in determining fair value may generate other fair value results at the reporting date, given that those instruments are naturally sensitive to the methods and assumptions made given their contractual characteristics.

The inputs for data collection that make up the process of establishing the price of instruments, as a primary source, are obtained from the following sources:

- Secondary markets for federal government securities: ANBIMA; and
- Share prices, prices and adjustments of futures contracts, market rates for swaps, DI rate: B3 S.A., I Brasil, Bolsa, Balcão.

CAIXA bases its judgment decisions on its own knowledge and observations of market behavior relevant to the individual assets and liabilities, and the judgments made may vary based on market conditions.

Items observed by CAIXA when measuring fair value:

- Clear definition of fair value as the market price in a transaction between knowledgeable and willing parties;
- Using the three-level hierarchy for measurement based on observable and unobservable data;
- Importance of robust documentation and justifications for methods used, particularly for Level 3 measurements;
- Need for proper disclosure of measurement criteria and hierarchical levels in the financial statements; and
- Strict governance of measurement processes, with an emphasis on transparency and reliability of reported information.

#### (g) Actuarial liabilities

The actuarial assessment comprises calculations and estimates, as well as the provision of information, reports, statements, projections and other support as may be necessary for the accounting recognition and tax adjustments of all post-employment benefits under CAIXA's responsibility.

CAIXA performs the actuarial assessment every six months, in June and December every year.

## Note 5 - Cash and cash equivalents

Amounts recognized as cash and cash equivalents consist of cash assets in local currency, foreign currency and interbank investments acquired within 90 days or less and with insignificant risk of change in value.

Cash and cash equivalents are the same in the parent company and consolidated financial statements, except for the item " Availability in nation currency ", which on March 31, 2025, presents the amount of R\$ 8,047,870 in the consolidated financial statements.

| Parent Company   |             |  |  |  |  |  |
|--|-------------|--|--|--|--|--|
| Description  | 03/31/2025  |  |  |  |  |  |
| Total cash   | 8,253,679   |  |  |  |  |  |
| Availability in nation currency                            | 8,047,713   |  |  |  |  |  |
| Foreign currency availability                              | 205,966     |  |  |  |  |  |
| Interbank investments                                      | 254,705,391 |  |  |  |  |  |
| Voluntary deposits – Central Bank of Brazil (note 8.1 (a)) | 21,599,997  |  |  |  |  |  |
| Total  | 284,559,067 |  |  |  |  |  |

## Note 6.2 – Derivatives

CAIXA uses derivative financial instruments (DFIs), recorded in balance sheet and memorandum accounts, which are intended to meet the Company's own needs to manage its risk exposure (hedge). These transactions involve futures contracts bearing interbank deposit (DI), US dollar contracts, coupon exchange rate and swap agreements.

Derivative financial instruments, when used as *hedging* instruments, are intended for hedging against foreign exchange gains and losses on assets and liabilities.

CAIXA uses two strategies to operate in the derivative instruments market:

- 1. Hedging of financial instruments both in the trading portfolio and in the banking portfolio; and
- 2. Make the trading portfolio more profitable.

The main market risk associated with the first strategy, linked to the fair value hedge of loan transactions, is the exposure to interest rate fluctuations due to the ineffective portion of the hedge.

Regarding the second strategy, the main market risk is associated with changes in the prices of derivative instruments. These variations are recognized in profit or loss.

CAIXA does not currently hold derivatives subject to non-linear price fluctuations, which makes these fluctuations less extensive.

The Institution manages market risk within the trading portfolio to control its exposure to that risk, its expected loss and the consumption of capital to cover that risk.

The net exposure to market risk, VaR – Value at Risk, concentration on risk factors, forward structure, duration and capital allocation of the trading portfolio are daily calculated. Moreover, stress tests are carried out weekly.

CAIXA has a limit structure for these indicators, which are daily tracked and reported to the risk governance system when any extrapolation occurs.

Derivatives generally represent future commitments to exchange currencies or indexes, or to buy/sell other financial instruments on the terms and dates specified in the contracts. Swap agreements are registered with or without collateral at B3.

A clearing house is responsible for calculating the daily adjustments and the security margin to be deposited for payment if any of the parties defaults. Thus, it is the clearing house that becomes a counterparty to the contracts. Therefore, this type of record does not pose any credit risk.

In the case of unsecured registration, there is no *clearing house* to calculate the daily adjustments and guarantee the payments; the amounts are calculated between the parties. However, in these cases, contracts may be signed (Global Derivative Agreement - CGD and Fiduciary Assignment) in which clauses are established that guarantee payment between the parties. Even in this type of credit limit is set which, when exceeded, requires the need to deposit assets in a security account, which is managed by the parties. In this case, there is a credit risk up to the limit established in the contract.

The notional values of futures contracts are recorded in memorandum accounts and adjustments are recorded in balance sheet accounts.

CAIXA does not have derivative instruments whose gains or losses are recorded in a separate equity account, which occurs only in cash flow hedge accounting frameworks.

Caixa Econômica Federal, as the operating agent of the Severance Pay Fund – FGTS, is responsible for running the Fund's assets and liabilities, providing a guarantee of minimum profitability for FGTS assets pursuant to Law No. 8,036/1990 and the Resolutions of the FGTS Board of Trustees No. 681/2012, 764/2014, 553/2007, 633/2010, 295/1998 and 649/2010.

Given its legal obligation and according to current accounting rules, CAIXA must measure, at least annually, the book value to be recognized in connection with the guarantee of minimum profitability assumed with the FGTS.

Considering that CAIXA provides FGTS with a financial guarantee whose minimum obligation will be zero if the minimum yield is reached and there is no benefit if the performance is higher than what has been agreed, this obligation is characterized as a derivative liability arising from the obligations established for the management of FGTS.

Therefore, the purpose of the FGTS derivative is to recognize the book value in CAIXA's financial statements as a guarantee of minimum profitability assumed against the FGTS, which should correspond to the estimated real loss on the investments made, considering the due offsets provided for in the standard.

With respect to foreign exchange derivatives, CAIXA makes use of US dollar futures contracts and FRA (Foward Rate Agreement) of coupon exchange rates to hedge proprietary positions and cash flows in foreign currency against foreign exchange gains and losses. Swaps may be entered into as derivatives for foreign market issues that occur sporadically to hedge these transactions.

All foreign exchange derivatives traded by CAIXA are registered with B3, and there is no credit risk because the Clearing Company plays the role of counterparty to the transactions, making daily adjustments in positions and requiring the deposit of a security margin. The settlement of US dollar futures contracts and FRA of coupon exchange are linked to PTAX, while swap contracts have their indicators negotiated between the parties, the most common being the exchange of exchange rate + fixed rate x DI percentage. On the maturity of these instruments, the US dollar futures contracts are traded by CAIXA for terms of up to 30 days, while the FRA contracts of the coupon exchange rate are contracted with a maturity of up to one year. Swap agreements can have maturities higher than 5 years, depending on the hedging needs.

#### (a) Hedge accounting

The structured hedge for loan transactions, called Macro Hedge of the banking portfolio, aims at hedging the market value of credit agreements, and the protection occurs through DI futures contracts, as described:

- DI futures long position: % of the DI variation; and
- DI futures short position: Fixed rate.

Because the future flows of the hedged item is matched in the case of financial bills and the swap long position, the effectiveness of transactions remains close to 100%, within the range of 80% and 125% established by BCB Circular Letter No. 3,082/2002.

The same level of effectiveness is observed in the hedging of loan transactions.

The item "Market value adjustment of hedging instruments "consists of the accumulated adjustment in swap and futures contracts (DI).

Article 81 of BCB Resolution No. 352/23 establishes that, in order to calculate the provisions for expected credit risk, financial institutions must classify their financial assets into five portfolios, according to the type of collateral or lack thereof:

- Portfolio 1: Receivables with solid guarantees, such as real estate under conditional sale or guarantees from the Federal Government and international organizations.
- Portfolio 2: Receivables that are secured by leases, mortgages, pledges, chattels, bank deposits, guarantees from institutions authorized by the Central Bank of Brazil and credit insurance policies from unrelated entities.
- Portfolio 3: receivables related to receivables, such as discounts or guarantees by fiduciary assignment, pledge or pledge of receivables, in addition to other guarantees not provided for in previous portfolios.
- Portfolio 4: Unsecured transactions, such as working capital, foreign exchange advances, debentures and rural credit for investment.
- Portfolio 5: Riskier credits, such as personal loans with or without payroll, revolving and rural credit without guarantees, in addition to other commercial operations with credit characteristics also without guarantees.

#### (d) Renegotiated and restructured loans

| Company/Consolidated |  |  |  |  |
|----------------------|--|--|--|--|
| 03/31/2025           |  |  |  |  |
| 10,462,224           |  |  |  |  |
| 278,610              |  |  |  |  |
|                      |  |  |  |  |

(1) Amount of renegotiations not characterized as restructuring.

#### (e) Restructured operations

#### (e.1) Percentage of restructured financial assets in relation to total renegotiated:

In March 2025, the percentage of financial assets restructured in relation to total financial instruments renegotiated was 10.23%, totaling R\$43,815,048.

The most significant component in the portfolio classified as problematic results from default and restructuring, which account for 58.40% and 23.60%, totaling R\$39,497,215 and R\$15,960,777, respectively.

Considering the mark to market by problematic asset segment, the housing industry (individuals and legal entities) stands out, accounting for 48.52% (R\$32,813,651) of the total problematic assets. The relevance of this segment's exposure stands out, in the amount of R\$851,781,087, which accounts for 67.27% of CAIXA's total portfolio. This concentration is due to the long-term characteristics of the housing portfolio, given the relevance of the exposure classified as problematic due to the restructuring motivator with (41%), which corresponds to (R\$13,453,840).

#### (e.2) Expected recovery of financial instruments with credit recovery problems:

The expected recovery of financial instruments with credit recovery problems in March 2025 totaled R\$35,408,685.

#### (e.3) Unrecognized revenues because the asset has credit recovery problems:

In March 2025, unrecognized revenues due to a credit recovery problem totaled R\$5,880,689.

#### (f) Crop loans

| Company/Consolidated                |                        |                   |                          |  |  |  |  |
|-------------------------------------|------------------------|-------------------|--------------------------|--|--|--|--|
| (                                   | 03/31/2025             |                   |                          |  |  |  |  |
| Description                         | Allocated<br>resources | Total liabilities | Total liabilities<br>(%) |  |  |  |  |
| Cash deposits                       | 13,696                 | 13,472            | 30%                      |  |  |  |  |
| Rural savings-account deposits      | 6,702                  | 6,509             | 65%                      |  |  |  |  |
| LCA – Agribusiness Letter of Credit | 7,053                  | 7,372             | 50%                      |  |  |  |  |
| Total                               | 27,451                 | 27,353            |                          |  |  |  |  |

In March 2025 there were no costs for non-compliance with rural credit requirements.

# Note 8.5 – Other financial assets at amortized cost

#### (a) Composition

|  | Parent Company<br>03/31/2025    | Consolidated<br>03/31/2025      |  |
|--|---------------------------------|---------------------------------|--|
| Description  | Book value, net of<br>allowance | Book value, net of<br>allowance |  |
| Receivables from the National Housing System (b) (1) | 24,574,932                      | 24,574,931                      |  |
| Debtors for guarantee deposits (note 16 (e))         | 21,722,528                      | 21,722,528                      |  |
| Income receivable from the public sector (2)         | 1,573,766                       | 1,573,766                       |  |
| Income receivable from the private sector (2)        | 316,837                         | 520,331                         |  |
| Credit card  | 254,754                         | 254,754                         |  |
| Other  | 140,239                         | 140,239                         |  |
| Total  | 48,583,056                      | 48,786,549                      |  |

(1) Net book value of provision for operational risk in the amount of (R\$9,703,192) and credit risk in the amount of (R\$3,700,074). (2) Article one, paragraph two, item II of CMN Resolution No. 4,966/2021 specifies the accounting criteria that are not applied to assets arising from the Bank's contracts with customers, which consist of amounts receivable that are received under CPC 47 – Revenue from Contracts with Customers.

#### (b) Restricted loans - National Housing System (SFH)

The FCVS is a public fund of an accounting and financial nature, created within the scope of the Housing Financial System (SFH) by Resolution No. 25 of 1967 of the Board of Directors of the BNH (National Housing Bank).

The institutional responsibility of the FCVS is presented in the following purposes:

- Guarantee the term limit for the repayment of housing loans, contracted by borrowers under the SFH, assuming, on behalf of the borrower, the residual debt balance during the term of the contracted financing;
- Assume, on behalf of the borrower, the discounts granted in early settlements, renegotiations and transfers of housing financing agreements, in compliance with the governing legislation;
- Assume, due to Law No. 12,409, of 2011, the outstanding balance of housing financing, total or partial, in case of death or permanent disability, and assume the recovery or indemnification expenses arising from Physical Damage to the Property and the losses of Civil Liability of the Builder; and
- Settle the remaining transactions of the terminated Credit Insurance to the Acquirer.

It should be noted that the FCVS relates exclusively to the financial agent, since the qualification only occurs after the borrower's relationship with the financing institution of the contract ceases. Therefore, possible non-compliance with a housing agreement covered by the FCVS, such as non-compliance with relevant legislation or non-conformities found in the concession or maintenance of the contract by the financial agent, may cause the agent operating the FCVS to deny coverage, which causes losses for the financial agent.

The table below shows the status of the cases that have been novated against the fund:

- Qualified registration of the contract by CAIXA as the financial agent in the FCVS system (CAIXA Operating Agent);
- Not qualified agreements under analysis by CAIXA, the financial agent, for the qualification procedures at the FCVS;
- Qualified and not approved Qualified agreements not yet analyzed by the FCVS;

- Approved under appeal agreements with funds issued by CAIXA financial agent and not yet analyzed by the FCVS, with difference in values;
- Approved without recourse agreements under analysis by CAIXA financial agent to validate with the FCVS for the issue or not of an appeal; and
- Denial of coverage includes contracts with denial of coverage with and without recourse, and contracts that may not be appealed due to exhaustion of the possibilities of reversal of the denial, by the FCVS.

|  | 03/31/2025   |                      |             |  |  |
|--|--------------|----------------------|-------------|--|--|
| Description  | Base balance | Balance of provision | Net balance |  |  |
| FCVS (Salary Changes Compensation Fund) receivable | 37,941,987   | (13,399,806)         | 24,542,181  |  |  |
| Not enabled  | 39,901       | (24,549)             | 15,352      |  |  |
| Qualified and not approved                         | 284,553      | (185,501)            | 99,052      |  |  |
| Approved with/without appeal or manifestation      | 6,067,622    | (1,981,742)          | 4,085,880   |  |  |
| Approved, validated and under novation             | 14,663,402   | (186,499)            | 14,476,903  |  |  |
| Coverage denial (1)                                | 13,209,057   | (7,344,063)          | 5,864,994   |  |  |
| Financial impediment – credit risk (Stage 3) (2)   | 3,677,452    | (3,677,452)          | -           |  |  |
| FGTS (Severance Pay Fund) to be reimbursed         | 32,751       | -                    | 32,751      |  |  |
| Total  | 37,974,738   | (13,399,806)         | 24,574,932  |  |  |

Includes the negative amount due to multiplicity of CADMUT in the amount of R\$4,578,187, net of allowance. CADMUT is the registry for recording information on housing financing contracts, active and inactive, signed within the scope of the Housing Financial System – SFH and the housing and social programs of the federal government, as provided for in Law No. 10,150, of 12/21/2000.
 All the impediment contracts are classified into stage 3 and there were no movements in the period.

The agreements to be reimbursed by the FCVS bear interest of up to 6.17% per year and are adjusted for inflation according to the benchmark interest rate (TR), in accordance with Act No. 10,150 of December 21, 2000, amended by Act No. 13,932 of December 11, 2019. The actual realization of these credits depends on compliance with a set of standards and procedures set forth on regulations issued by the FCVS.

The provision for FCVS assets is calculated according to a set of rules, statistical methodology and operational risk concepts. Given that the novation of credits depends on the documents of the contracts, no credit processing is involved, i.e. the recognition of the provision is to face the expected losses arising from the novation of the contracts covered by the FCVS. Additionally, part of the FCVS's assets were classified as credit risk, and therefore their allocation was migrated to credit risk, according to the new rules of CMN Resolution No. 4,966/2021. Moreover, the contracts that were allocated to stage 3 had their provisions determined at 100% of the expected amount.

# Note 9 – Allowance for impairment loss on financial instruments

## (a) Expected losses by class

## Note 15.3 – Funds from securities issues

#### (a) Composition

| Description                                   | Parent Company | Consolidated |
|---|----------------|--------------|
| Description                                   | 03/31/2025     | 03/31/2025   |
| Funds accepted and issuance of securities (b) | 248,702,456    | 248,702,456  |
| Subordinated financial instruments (c)        | 35,625,774     | 35,625,774   |
| IHCD – Authorized principal (d) (1)           | 33,927,964     | -            |
| Debt instruments eligible to capital (2)      | 2,878,883      | 2,878,883    |
| Total   | 321,135,077    | 287,207,113  |

(1) Consists of hybrid equity and debt instruments authorized to be part of capital. In the consolidated financial statements, the balance is reclassified to equity according to CMN Resolution No. 4,955/2021; and

(2) Consists of interest payable and inflation adjustment not incorporated into the principal.

#### (a.1) FGTS - Subordinated Debt Instrument - FGTS

CAIXA has eight subordinated debt instruments authorized by the Central Bank of Brazil as part of Level II of the mandatory capital, in accordance with the provisions of CMN Resolution No. 4,958/2021, which addresses the methodology for calculating total capital, entered with the Severance Pay Fund (FGTS).

On the total amount of debts, monetary adjustment is applied through the application of the adjustment coefficient identical to that used for the remuneration of FGTS blocked accounts and monthly capitalized interest.

#### (a.2) Subordinated financial bills – level I (complementary)

CAIXA raised subordinated financial bills in the local market with a total par value of R\$1,718,700. Of this total R\$1,713,241 is authorized to make up level 1 supplementary capital.

#### (b) Funds from acceptance and issuance of securities

(1) The composition of the RC is detailed in note 33 (h).

Level 1 of total capital is divided into core capital and supplementary capital. CAIXA has Hybrid Capital and Debt Instruments – HICD authorized to make up its core capital.

CMN Resolution No. 4,955/2021 determines, for purposes of disclosure of the consolidated financial statements, the reclassification to equity of instruments that meet the characteristics of core capital.

The agreements have fully variable compensation clauses, which are annually adjusted for inflation after the payment of interest accrued in the previous year.

Compensation interest payable and the unincorporated monetary adjustment make up the hybrid equity and debt instruments, totaling R\$2,878,883 as of March 31, 2025.

Interest payable on subordinated instruments eligible for additional capital totals R\$78,925 as of March 31, 2025.

To calculate total capital, the Company considers only the face value of the IHCD contracts plus the adjustment for inflation incorporated from prior years. Considering that the agreements have fully variable compensation clauses, inflation adjustment is incorporated annually, after the payment of interest related to the previous year.

| Lottery transactions                | 1,524,863      | 1,577,990    |
| Total                               | 19,689,922     | 19,743,049   |

(1) Includes the amount of R\$452,799 consisting of the funds earmarked for the payment of the New Bolsa Família.

#### (c) Unearned revenue

Unearned revenue consists of the deferral balance of the transactions between CAIXA, its partner companies and its subsidiaries for the right to explore the over-the-counter market, the client base and the use of the brand. As of March 31, 2025, unearned revenue consists of the following partnerships:

- VISA, in the amount of R\$500,000 consisting of the initial bonus received under the ten-year agreement signed between CAIXA and VISA;
- CNP (Holding XS1) in the amount of R\$5,810,000 under the distribution agreement. The balance is recognized monthly for the term of the contract until 2045;
- Tokio Marine (XS3) in the amount of R\$1,197,000, CNP (XS5) in the amount of R\$200,000, Icatu (XS4) in the amount of R\$144,000 and Tempo (XS6) in the amount of R\$23,625, under a 20-year distribution agreement with Caixa Seguridade;
- FISERV, in the amount of R\$128,000, seeking to strengthen its operations in the market of electronic means of payment, establishes a 20-year agreement with Caixa Cartões; and
- VR BENEFITS and FLEETCOR ("VR-FLEETCOR"), in the amount of R\$333,333, to operate in the segment related to prepaid means of payment, for 20 years, according to an agreement entered into with Caixa Cartões.

### Note 16 – Provisions

| FGTS prepayment (c)     | 1,922,009  |  |  |
| Other                   | 17,946     |  |  |
| Total                   | 12,485,676 |  |  |

#### (b) Provisions for legal cases, tax and social security liabilities

CAIXA is party to lawsuits and administrative proceedings of tax, civil and labor nature, arising over the normal course of its business. According to the opinion of its lawyers and considering that the procedures followed by CAIXA comply with legal and regulatory provisions, Management understands that the provisions accrued are sufficient to bear the risks of possible unfavorable decisions on these proceedings.

Considering the high number of administrative and judicial proceedings, CAIXA uses the following methodologies to calculate the probable amount of disbursement:

- a) Individualized method, in which the probable amount of the conviction (accrued amount) is estimated; This calculation is based on the economic repercussion of the claims made by the plaintiff and is weighed against the situation of the case and the prevailing jurisprudence in similar cases; These lawsuits are classified as whose unfavorable outcome is considered probable, possible or remote; mass actions that are in the execution phase are also provided for by this methodology; and
- b) Mass testing is a statistical method used to calculate the probable amount of disbursement for 100% of routine procedures in the discovery phase, which consists of measuring the likelihood and impact of an outcome unfavorable to the entity.

#### (b.1) Changes in provisions for court cases, tax and social security liabilities

#### (b.2) Labor lawsuits

CAIXA is a defendant to lawsuits filed by employees, former employees of the Company itself or of service providers and trade unions, related to labor activities, job plans, collective bargaining agreements, indemnities, benefits, pensions, subsidiarity, among others.

As of March 31, 2025, there were 54,852 labor cases provided for, of which 27,891 were subject to the mass method and 26,961 were subject to the individualized methodology.

To reduce court litigation and the amounts spent on proceedings, CAIXA continues to pursue its policy of judicial and out-of-court conciliation, voluntarily complies with certain court decisions and analyzes the losses incurred in order to reduce the number of new litigations from similar causes. Because of that, significant lawsuits are not individually disclosed in order not to make agreements impossible.

#### (b.3) Civil lawsuits

CAIXA is a defendant in civil actions seeking damages/contracts related to its products, services and services. As of March 31, 2025, 357,456 civil cases were provided for, of which 328,002 were subject to the mass method and 29,454 were subject to the individualized methodology.

Of particular note are demands that contest the purging of indexes of economic plans, as part of the federal government's economic policy to combat inflationary rates in the past, when correcting balances in deposits in savings accounts.

CAIXA complied with the legal order in effect at the time. However, considering the lawsuits actually notified and the analysis of the current case law of the Superior Court of Justice – STJ, on March 31, 2025, R\$838,029 was accrued for these proceedings.

The Federal Supreme Court – STF suspended the analysis of all appeals filed until the decisions are rendered on matters of general repercussion related to the Bresser and Summer Plans (topic 264), of unblocked amounts of the Collor I Plan (theme 265), Collor I Plan (theme 284) and the Collor II Plan (theme 285) that will have binding effects on all related cases.

At the end of 2017, FEBRABAN and CONSIF entered into an agreement with the main consumer protection entities to solve the problem. This agreement was approved by the Federal Supreme Court and CAIXA adhered to its terms. Payments started in July 2018 and continue to be made in compliance with adhesions processed on the <u>https://portalacordo.pagamentodapoupanca.com.br/\_site\_\_</u> and administrative and judicial conciliation task forces.

The agreement had a final deadline on 03/12/2020, which is why FEBRABAN and consumer protection entities reached a good agreement to extend the previous agreement for another 5 years, and an initial extension of 30 months was approved by the STF and after analyzing the results obtained, in December 2022, the STF approved a second extension of another 30 months.

Also significant are the lawsuits aimed at repairing damages involving the contingency of FGTS resource transfers. The amount provided for as of March 31, 2025, for these proceedings is R\$854,574.

Damages lawsuits filed for damages consist of possible problems with bank service, service provision or the acquisition/maintenance of a product.

In 2025, CAIXA continues to implement its policy of judicial and extrajudicial conciliation, spontaneously complying with court decisions and analyzing losses incurred, to mitigate new litigation of similar causes. As of March 31, 2025, the Company reached 12,907 court settlements (66% referring to damages lawsuits and 34% referring to credit recovery), reducing the amount that would be spent if the court conviction persisted and providing the customer with a quick solution to the problem.

#### (b.4) Tax liabilities

CAIXA, as an institution that regularly fulfills the tax obligations that affect its activities, operations and services, is discussing in court the legitimacy of the collection parameters enforced by tax authorities of the various entities of the Federation, according to the specific characteristics of each case.

Provisions accrued under a probable risk assessment based on the opinions of its legal advisers relate to lawsuits about taxes and contributions. CAIXA regularly monitors the cycle of ongoing lawsuits which, in the medium and long term, may have favorable outcomes for the Bank if the reversal of the related provisions will result from the reversal.

The National Institute of Social Security (INSS) has issued assessments of deficiency in social security contributions on payments to CAIXA's employees, challenging the indemnity and non-compensation nature of some amounts, such as meal allowance, APIP and bonus leave. The amounts restated for March 31, 2025, total R\$1,863,747, for which the provision was accrued according to the track record of success and case law, considering in a recent technical and legal analysis on the matter, it is R\$ 5,059.

Regarding the ISSQN, CAIXA applies the guidelines of Federal Supplementary Act No. 116/2003 to adapt its systems and procedures for determining the calculation base and paying the tax on rendered services.

Notwithstanding, tax inspectors from different municipalities of the federation assessed tax deficiencies against the institution under the allegation of non-payment or underpayment, thus initiating a discussion based on a different interpretation of aspects such as materiality, applicable rates and place of incidence of the tax, whose total amount, as of 03/31/2025, corresponds to the amount of R\$ 1,512,250.

Considering the track record of success and the precedent scenario evaluated in a technical and legal analysis about the matter, as of March 31, 2025, the provision accrued is R\$401,922.

Also, as a highlight, CAIXA has been discussing the materiality of CSLL and IRPJ debts and fines arising from failure to approve the Electronic Request for Refund, Reimbursement or Reimbursement and Statement of Offset - PER/DCOMP, which, as of March 31, 2025, totaled R\$25,011, with reference to procedural issues. According to court rulings on each matter, the lawyers' analysis was for the constitution of the full provision of the amount.

#### (c) Provision for prepayments of real estate loans using FGTS funds

- Housing loans, granted with FGTS funds and contemplated with a subsidy for a reduction in the installment, remunerate the Financial Agent with total or partial payment of the subsidy by FGTS, according to the definition described in FGTS Resolution No. 702/2012 and its updates;
- These amounts are transferred to the CAIXA Financial Agent when the contract is signed, to cover the entire period of the transaction. Changes in the flow initially agreed on, such as early settlement, extraordinary amortization, extraordinary amortization with reduced term, transfer or reduction of the financing agreement's term require CAIXA to return to FGTS part of the remuneration received on a pro rata basis; and
- To cover this return of funds to the FGTS, a provision is made for the return of revenues in case of prepayments. The accrued amounts are calculated according to the average flows of return of compensation and their related impacts on the balance of the remuneration amounts paid to the CAIXA financial agent.

#### (d) Contingent liabilities classified as possible losses

#### (d.1) Tax claims

CAIXA regularly monitors tax, administrative and judicial proceedings to which it is a defendant or plaintiff and, supported by the opinions of its legal units, classified as possible risk of loss proceedings which total R\$10,619,996, among which the following demands stand out due to the amounts under dispute:

- a) The Company was assessed a deficiency in PIS/PASEP in the historical amount of R\$9,295,509 on underpayments for the period from January 1991 to December 1995, at the time Decree-Laws 2.445/1988 and 2.449/1988 came into effect, which changed the social security contribution calculation system, and alleged undue offset of overpayments made in the period from January 1992 to May 1993. For the filing of the lawsuit, a deposit was made in guarantee of that amount on December 30, 2010, which, adjusted for inflation using the SELIC (Central Bank overnight rate), totals R\$9,295,509 as of March 31, 2025. On April 8, 2019, the Honorable Judge of the 9th Federal Court of the Judiciary of Brasília/DF granted the request made by CAIXA to declare the extinction of the tax credit in question, considering the proof of the sufficiency of the payments made at the time. On 06/10/2019, the Union filed an appeal requesting the reform of the sentence in question by the Honorable Federal Regional Court of the 1st Region, and the appeal was distributed by lot on 05/04/2023 to the 8th Panel of that Court, awaiting judgment since then;
- b) Assessment of PIS/PASEP deficiency in the total amount of R\$256,597, according to the assessment of differences in the calculation base for paying the amounts in the period from January 1996 to December 1998, and from January to October 1999, arising from the deduction or non-inclusion of revenues and the calculation of expenses considered improper and non-deductible on taxable profit, respectively;
- c) CSLL (Social Contribution Tax) in the amount of R\$214,944, consisting of a credit originating from an overpayment stated in the Corporate Income Tax Return (DIPJ) and offset in 2003. There is a discussion about procedural issues; and
- d) Assessment of ICMS deficiency (São Paulo State Finance Department) in the total amount of R\$347,171. The assessment of the tax is being discussed considering the non-withholding and withholding of taxes on services classified by inspection authorities as "communication" for tax purposes, and the determination of the liability to pay liabilities for tax liability under an agreement signed with the National Council of Treasury Policy (CONFAZ).

The other contingencies that indicate possible loss have the following balance as of December 31, 2024:

a) Federal taxes total R\$1,517; b) Social security contributions total R\$67,318; and c) Regional accounts for R\$436,940.

The matters related to the contingent proceedings under discussion are monitored from the prospect of a possible sedimentation or change in the jurisprudential scenario, allowing the maintenance of the related risk classifications as a result of CAIXA's continuous evaluation.

#### (e) Breakdown of deposits that secure funds

The balances of court deposits accrued for probable, possible and/or remote passive lawsuits:

|              | Company/Consolidated |            |
|--------------|----------------------|------------|
|              | Description          | 03/31/2025 |
| Tax claims   |                      | 14,191,735 |
| Labor claims |                      | 874,448    |
| Civil claims |                      | 6,394,441  |
| Total        |                      | 21,460,624 |

# Note 17 - Loan commitments, credits to be released and financial guarantees provided

| Company/Consolidated                          |             |                    |                      |          |                    |                      |          |                    |                      |             |                    |                      |

### Note 18 – Actuarial liabilities

Actuarial assessments are made every six months. Therefore, the Employee Benefits note was prepared for the six-month periods ended June 30 and December 31 and is available at: <u>https://ri.caixa.gov.br/informacoes-financeiras/central-de-resultados/</u>.

Exceptionally, in March 2025 an actuarial study of the adjusted REG/REPLAN plan was carried out to present the impacts of the changes in the regulation of the plan, which was approved by PREVIC on February 25, 2025. The amendments were necessary to adapt the regulation to the following future benefits to be granted:

- New calculation of the death pension;
- Timing of the payment of the death pension;
- Child support;
- Lump sum death benefit; and
- Adjustment in the Benefit Accumulation Fund (FAB).

The impact of the changes in these benefits generated a reduction in future REG/REPLAN liabilities of approximately R\$5.2 billion, of which R\$2.6 billion for CAIXA and R\$2.6 billion for participants. CAIXA will make a contribution of this amount in the 2nd quarter of 2025.

The total amount will be used to settle the 2014 equalization and amortize part of the 2015 equalization. The remaining amount, added to the 2016 equalization, will be renegotiated in a single equalization with an extension of the payment term, which will increase from 12 to 18 years.

## Note 20 – Equity

#### (a) Reconciliation of equity - Company x Consolidated

| Discrimination                           | 03/31/2025  |
|--|-------------|
| Equity – Company                         | 104,079,740 |
| IHCD – eligible for inclusion in capital | 33,927,964  |
| Non-controlling interests                | 2,840,273   |
| Equity – Consolidated                    | 140,847,977 |

In the parent company financial statements, hybrid capital and debt instruments eligible to be part of core capital are recorded in liabilities and finance charges are recognized as operating expenses, while in the consolidated financial statements they are reclassified to equity, based on the understanding and guidelines of the Central Bank of Brazil, with the purpose of improving the quality of these consolidated financial statements.

NOTES TO THE CONDENSED PARENT COMPANY AND CONSOLIDATED INTERIM FINANCIAL STATEMENTS MARCH 31, 2025 Amounts in thousands of Brazilian real, except when otherwise indicated.

#### (b) Profit reserves

Profit reserves consist of legal reserve, calculated at the rate of 5% on profit, lottery reserve and operating margin reserve.

Lottery reserves are constituted by the result of the administration of federal lotteries that are incumbent on CAIXA as the executor of these public services for incorporation into its net assets.

The reserve for operating margin is recognized according to the justification of the considered percentage of up to 100% of the balance of profit, less the allocation to the legal reserve, unrealized profit reserves, contingency reserves, tax incentive reserve and minimum payment (25% of adjusted profit) of dividends and interest on equity capital, up to the limit of 80% of the share capital.

| Company/Consolidated                                     |            |  |  |
|--|------------|--|--|
| Description  | 03/31/2025 |  |  |

| Profit reserves  | 6,818,618  |  |  |
| Statutory reserve  | 6,788,508  |  |  |
| Reserve established by the Company's by-laws – lotteries | -          |  |  |
| Statutory reserves – operating margin                    | 30,110     |  |  |

#### (c) Dividends and interest on equity capital

According to the Company's bylaws and approved parameters, profit distribution for the year is at least twenty-five percent (25%) of adjusted profit, as established by the Company's bylaws.

The distribution of the year's profit is approved by the Annual Meeting, after a decision by the Board of Directors, at the proposal of the Board of Directors and in compliance with the position of the Fiscal Council, taking into consideration legal provisions and the conditions of CAIXA's Bylaws.

For the calculation of the dividend liability, interest on equity capital is computed, calculated using the yield of the TJLP for the period on adjusted equity, limited to 50% of the net income for the period.

| Total  | 17,127              |

# Note 32 – Related parties

Transactions with related parties are carried out over the course of CAIXA's operating activities and its duties established by specific regulations.

CAIXA's Code of Conduct for Employees and Management prohibits its employees and managers from establishing business or professional relationships, directly or through third parties, with their controlling shareholders and companies belonging to the same economic group.

Under prevailing legislation, as far as CAIXA as a state-owned company and its related parties are allowed to carry out transactions under the same conditions as those presented to the market, particularly with respect to limits, interest rates, grace periods, deadlines, collateral, as well as risk assessment criteria for recognizing impairment loss and write-offs as loss. There are no additional or special benefits when compared with the transactions carried out with other clients of the same profile in the company.

#### (a) Controller

Balances with the parent company consist of transactions with the Federal Government, its related ministries, autonomous agencies, government departments and other agencies.

#### (b) Subsidiaries

In line with its strategy, CAIXA carries out business through its subsidiaries Caixa Seguridade, Caixa Cartões, Caixa Loterias and Caixa Asset.

#### (c) Joint ventures

The direct subsidiaries of Caixa Móveis, and Negócios Digitais are directly controlled by the Company.

Also classified as related parties are the entities in which CAIXA holds indirect interest, through its subsidiaries Caixa Seguridade and Caixa Cartões.

#### (d) Associates

CAIXA's direct associates are Galgo Sistemas de Informações, Núclea, TecBan and Quod.

CNP Seguros Holding Brasil S.A. is an associated company, CNP Seguros Holding Brasil S.A., set up to allow it to hold ownership interest in the companies of CNP Seguros Group, as well as Holding XS1, whose subsidiaries are XS2 Vida e Previdência S.A. and Caixa Vida e Previdência S.A. as wholly owned subsidiaries.

CAIXA has several transactions with Caixa Seguridade, including its investees.

#### (e) Key management personnel

Consists of the members of the Executive Board, the Board of Directors, the Fiscal Council and the other statutory bodies of CAIXA and its subsidiaries.

#### (f) Other entities

This item consists of transactions with state-owned companies and mixed capital companies controlled by the federal government, such as Petrobras, Banco do Brasil, BNDES, Banco do Nordeste and Emgea; in addition to investment funds and government funds operated and/or managed by CAIXA, such as FGTS, FAR, FCVS, FIES.

Funcef, the entity that manages the post-employment benefit plan for CAIXA's employees, has agreements with CAIXA for the provision of banking services and for the lease of real estate owned by that entity.

#### (h) Average compensation (in real)

|            | 03/31/2025    |               |
|------------|---------------|---------------|
| gher Value | Average value | Lowest value  |
| 84,814     | 71,939        | 68,504        |
| 5,545      | 5,545         | 5,545         |
|            | ,             | 84,814 71,939 |

(1) Monthly compensation, including advantages and benefits.

### Note 33 – Risk and capital management

At CAIXA, risk and capital management are perceived as a competitive advantage in financial markets and the most important means of preserving its solvency, liquidity and profitability.

Risk and capital management is performed by dedicated structures that comprise systems, routines, procedures and models, and are responsible for identifying, measuring, evaluating, monitoring, controlling, mitigating, and communicating them to Top Management to support decision-making.

In accordance with current regulation and good corporate governance practices, the risk and capital structures are composed of the Board of Directors – Bo, the Independent Risk Committee – CORIS, which assists the Board of Directors in decision-making on issues related to risk and capital management; the Board of Directors – DC; the Vice-Presidency of Risks – VICOR and the Chief Risk Officer – DECOR as Chief Risk Officer – CRO.

The National Superintendence of Corporate Risks – SUCOR, subordinate to DECOR, is in charge of proposing the risk management policy of the CAIXA conglomerate, the capital management and profit distribution policy of CAIXA, as well as evaluating and issuing business reports and other actions related to the conglomerate's risk and capital management.

#### (a) Risk Management

CAIXA has risk management structures appropriate to the nature of its transactions and the complexity of its products, services, activities and processes compatible with its exposure to each type of risk.

Risks are defined considering quantitative and qualitative criteria and result in the following significant risks:

- Credit Risk;
- Market Risk Trading Portfolio and Banking Portfolio;
- Liquidity Risk; and
- Operational risk.

Other risks considered relevant to CAIXA's risk profile, particularly the risks of contagion; Strategy; Reputation; Social, Environmental and Climate; Actuarial, Cyber and Compliance.

A detailed description of the Bank's risk and capital management frameworks is available at: https://ri.caixa.gov.br/informacoes-financeiras/gerenciamento-de-riscos-e-capital/.

#### (b) Sensitivity analysis of significant positions

The sensitivity analysis allows the Company to check the impact of changes in interest rates on the prices of assets and liabilities, by risk factor. These hypothetical studies become market risk management tools, allowing the formulation of mitigation measures if these scenarios are realized, given that exposures are monitored daily and negative market movements require immediate action by the units involved in the process to mitigate possible losses.

The instruments subject to the sensitivity analysis are those measured at fair value, in this case the instruments of the securities portfolio measured at fair value by levels I – amount quoted in an active market; Level II and level III – unobservable market data – according to CPC 46/2012.

The sensitivity analyses for each type of market risk considered relevant by top management to which CAIXA was exposed included all material transactions with financial instruments and considered the biggest losses in each of the scenarios below:

Scenario I: Probable scenario considering the most probable trajectory of macroeconomic variables and indicators;

- Scenario II: Possible scenario that considers a parallel multiplier shock of 25% to scenario I for the SELIC coupon rate government bonds and a 1% addendum to the other risk factors;
- Scenario III: Possible scenario that considers a parallel multiplier shock of 50% to scenario I for the SELIC coupon rate risk and government bonds and a 2.5% additive to the other risk factors;
- Scenario IV: Possible scenario that considers a parallel multiplier shock of 50% to scenario I for the primitive risk factor SELIC coupon rate government bonds and a 5% addendum to the other risk factors;
- Scenario V: Possible scenario that considers a parallel multiplier shock of 0.75% to scenario I for the primitive risk factor SELIC coupon rate government bonds and subtraction of 1% for the other risk factors;
- Scenario VI: Possible scenario that considers a parallel multiplier shock of 0.5% to scenario I for the primitive risk factor SELIC coupon rate for government bonds and subtraction of 2.5% for the other risk factors; and
- Scenario VII: Possible scenario that considers a parallel multiplier shock of 0.25% to scenario I for the primitive risk factor SELIC coupon rate government bonds and a subtraction of 5% for the other risk factors.

The results of financial instruments as of March 31, 2025, are summarized in the table below:

#### (b) Calculation of regulatory capital requirement

In accordance with CMN Resolutions No. 4,955/2021 and 4,958/2021, the calculation of regulatory capital and the calculation of minimum capital requirements consider the Prudential Conglomerate.

#### The table below shows details about these capital indicators.

| Description   | 03/31/2025   |
|---|--------------|
| .evel I capital + Level II capital - PR                 | 134,270,368  |
| .evel I capital   | 121,332,071  |
| Principal Capital – PC                                  | 119,618,830  |
| Prudential equity (1)                                   | 141,215,865  |
| Prudential adjustments                                  | (21,597,035) |
| Complementary capital                                   | 1,713,241    |
| evel II capital (2)                                     | 12,938,297   |
| Risk-weighted assets – RWA                              | 881,051,294  |
| Credit risk – RWACPAD                                   | 755,555,631  |
| Market risk – RWAMPAD                                   | 6,771,420    |
| Operational risk — RWAOPAD                              | 118,724,243  |
| Additional principal capital – APC                      | 30,836,795   |
| Minimum capital requirement – PRMR (RWA*F Factor) + APC | 101,320,899  |
| Market risk – nontrading portfolio – RBAN               | 6,564,772    |
| Capital margin (PR – PRMR – RBAN)                       | 26,384,697   |
| Principal capital ratio (PC/RWA)                        | 13.58%       |
| evel I capital ratio (Level I / RWA)                    | 13.77%       |
| Basel capital ratio (PR/RWA)                            | 15.24%       |
| Factor  | 8.00%        |

(1) Equity considers hybrid capital and debt instruments authorized as per CMN Resolution No. 4,955/2021.

(2) In accordance with the provisions of articles 29 and 31 of CMN Resolution No. 4,955/2021.

#### (b.1.1) Prudential adjustments less common equity

| Description  | 03/31/2025   |
|--|--------------|
| Prudential adjustments in pricing of financial instruments   | (6,363)      |
| Intangible assets  | (3,312,501)  |
| Tax credits arising from income and social contribution tax losses and those originating from such taxes relating to assessment periods ending up to December 31, 1998   | (3,479,875)  |
| Total amount of deductions related to reciprocal acquisitions of core capital  | (255,429)    |
| Total amount of deductions related to tax credits arising from temporary differences that depend on the generation of future taxable profit or revenues for their realization, which exceed 10% of the core capital of the institution or conglomerate itself, disregarding specific deductions  | (10,034,959) |
| Amount that exceedes, in aggregate form, 15% of the core capital of the institution or conglomerate itself:  | (4,507,908)  |
| (i) of which: deriving from significant net interests in core capital of institutions authorized to operate<br>by the Central Bank of Brazil and from unconsolidated financial institutions abroad and in share<br>capital of companies similar to unconsolidated financial institutions, insurers, reinsurers,<br>capitalization companies and open supplementary private pension fund entities | (1,814,060)  |
| (ii) of which: from tax credits arising from temporary differences that depend on the generation of future taxable profits or revenues for their realization   | (2,693,848)  |
| Total  | (21,597,035) |

#### (b.2) Regulatory indicators versus reported indicators

The table below shows the minimum regulatory requirement established by CMN Resolution No. 4,958/2021, as well as the amounts observed in CAIXA:

| Description                      | Regulatory                 | 03/31/2025 |
|----------------------------------|----------------------------|------------|
| Main capital ratio (1)           | 8.00%                      | 13.58%     |
| Level 1 capital ratio (1)        | 9.50%                      | 13.77%     |
| Basel capital ratio (1)          | 11.50%                     | 15.24%     |
| Fixed assets to equity ratio (2) | up to 50% of total capital | 10.43%     |

(1) Includes additional conservation capital, countercyclical and systemic, totaling 3.50%; and

(2) According to CMN Resolution No. 4,957/2021.

# Note 34 - Fair values of financial assets and liabilities

### (a) Fair value hierarchy

| Parent Company  |                           |             |                   |             |  |

(1) The information presented is not audited by the independent auditor; and

(2) Includes funds invested in shares which are not considered in the ANBIMA ranking.

### Note 38 – Subsequent events

#### (a) Issuance of social bonds in the international market

On May 8, 2025, CAIXA held its first issue of social-themed securities in the international market, totaling US\$ 700 million (approximately R\$ 4.0 billion). The transaction relied on the broad participation of institutional investors from several regions, including the United Kingdom, Switzerland, Portugal, United States, Bahamas, Hong Kong, United Arab Emirates and Brazil.

The issuance aims to raise funds to finance projects that promote financial inclusion, in accordance with the best global sustainable finance practices. This initiative is part of CAIXA's Sustainable Finance Framework, developed in partnership with the Inter-American Development Bank (IDB), which establishes guidelines to ensure the transparent and traceable allocation of resources to projects with a positive social impact.

The transaction marks CAIXA's return to the international capital market, after an interval since the five issues carried out between 2012 and 2014. In addition to representing the largest offer of the year among Brazilian financial institutions, the issuance also stood out for the lower funding cost in the period, with a coupon of 5.625% per year and yield of 5.875%.

# Independent Auditors' Report on Review of Condensed Parent Company and Consolidated Interim Financial Statements

To the Board of Directors, Shareholders and Management of **Caixa Econômica Federal - CAIXA** Brasília – DF

#### Introduction

We have reviewed the condensed parent company and consolidated interim financial statements of Caixa Econômica Federal ("CAIXA") as of March 31, 2025, which comprise the parent company and consolidated condensed interim balance sheet as of March 31, 2025, the related parent company and consolidated condensed interim statements of income and comprehensive income for the three-month period then ended and the related parent company and consolidated condensed interim statements of related parent between the three-month period then ended and the related parent company and consolidated condensed interim statements of the three-month period then ended, and notes to the condensed parent company and consolidated interim financial statements.

CAIXA's management is responsible for the preparation and presentation of these condensed parent company and consolidated interim financial statements in accordance with accounting practices adopted in Brazil applicable to institutions authorized to operate by the Central Bank of Brazil ("BACEN"). Our responsibility is to express a conclusion on these condensed parent company and consolidated interim financial statements based on our review.

#### Scope of review

We conducted our review in accordance with Brazilian and international review standards on interim financial information (NBC TR 2410 - Revisão de Informações Intermediárias Executada pelo Auditor da Entidade and ISRE 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of people responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

# Conclusion on the condensed parent company and consolidated interim financial statements

Based on our review, nothing has come to our attention that causes us to believe that the condensed parent company and consolidated interim financial statements as of March 31, 2025 do not present fairly, in all material respects, the parent company and consolidated financial position of CAIXA as of March 31, 2025, its parent company and consolidated financial performance for the three- and nine-month periods ended on that date, and its parent company and consolidated cash flows for the nine-

month period ended on that date, in accordance with accounting practices adopted in Brazil applicable to institutions authorized to operate by the Central Bank of Brazil.

# Emphasis of a matter - Presentation of comparative amounts in the financial statements

We call attention to note two to the condensed parent company and consolidated interim financial statements, which describes that those financial statements were prepared in accordance with Brazilian accounting policies applicable to the entities authorized to operate by the Central Bank of Brazil, considering the exemption from the presentation in the financial statements for the 2025 periods, comparative amounts for prior periods, as set forth by Resolution No. 4,966 issued by the National Monetary Council (CMN) and by the Central Bank of Brazil (BACEN) Resolution No. 352. Our conclusion does not have a qualification on this issue.

#### Other issues - Statements of Value Added

The condensed parent company and consolidated interim financial statements referred to above, include the condensed parent company and consolidated interim statements of value added for the quarter ended March 31, 2025, prepared under the responsibility of CAIXA's management, whose presentation is not required for the purposes of Brazilian accounting policies applicable to institutions authorized to operate by the Central Bank of Brazil. These statements have been submitted to review procedures performed together with the review of the condensed parent company and consolidated interim financial statements to conclude whether they are reconciled to the parent company and consolidated financial statements and accounting records, if applicable, and whether their form and content are in accordance with the criteria set by Technical Pronouncement CPC 09 - Statement of Value Added. Based on our review, we are not aware of any fact that leads us to believe that these statements of value added have not been prepared, in all material respects, according to the requirements of this Standard and in a manner consistent with the parent company and consolidated financial statements taken as a whole.

#### Other matters - Consolidated financial statements

These consolidated financial statements for the three-month period ended March 31, 2025, which were prepared in accordance with Brazilian accounting policies applicable to institutions authorized to operate by the Central Bank of Brazil, are being presented in an additional manner, as authorized by article 77 of CMN Resolution No. 4,966/2021, the condensed consolidated interim financial statements prepared in accordance with IAS 34 International Financial Reporting Standard – *Interim Financial Reporting*, issued by the *International Accounting Standards Board* – (*IASB*), which to date have not been prepared and disclosed by CAIXA.
