**NOTICE TO THE MARKET**

**COMMERCIAL PARTNERSHIP SEQUOIA AND MELHOR ENVIO (LOCAWEB)**

Sequoia Logística e Transportes S.A. ("Sequoia" or "Company") (B3: SEQL3) communicates to its shareholders and the market in general that has closed a commercial partnership with **Melhor Envio**, a logistics platform that connects sellers to the main carriers and logistics companies in Brazil, a subsidiary of **Locaweb Serviços de Internet S.A.** ("Melhor Envio" and "Locaweb", respectively).

The partnership between **Sequoia** and **Melhor Envio** was developed through **DROPS**, a company controlled by Sequoia, built in September 2021. **DROPS** offers PUDOs ("pick-up and drop-off points") services, and has already more than 1,200 points (entrepreneurs, merchants, and postal services providers) for dropping-off, picking-up and returning orders throughout Brazil. In addition to the wide national presence, **DROPS** has built a proprietary technological platform and conducts constant training for its partners, to offer an agile and easy service, and to generate experiences of excellence for their customers and users.

Through the partnership, customers of **Melhor Envio**, who issue more than 1.5 million labels per month, will be able to drop their packages from different logistics players at any **DROPS'** point, simplifying their delivery processes with lower costs. The operations of **Melhor Envio** and **DROPS** are already systemically and operationally integrated, and the expectation is that in the first half of 2023 all **Melhor Envio** customers will have hundreds of **DROPS'** points available throughout the state of São Paulo and that along this year the service will be extended to other regions of Brazil.

This partnership represents to **DROPS** an important step in the offering of PUDO's services as an alternative to other traditional shipping solutions in the market, enabling the connection of different business models to customizable solutions for the optimization and diversification of their logistics operations.

With this initiative, Sequoia continues to expand its capacity to serve the e-commerce industry, while reinforcing its growth strategy within **micro, small and medium-sized** businesses in the B2C segment and reaffirms its commitment to continue making investments and expanding its digital operation.
