### Important information concerning this presentation

Disclaimer

This presentation, prepared by Nexa Resources S.A. (herein referred to as "Nexa Resources", "Nexa", or the "Company"), is solely for informational purposes. Disclosure of this presentation, its contents, extracts or abstracts to third parties is not authorized without express and prior written consent from the Company.

This Presentation contains certain forward-looking information and forward-looking statements as defined in applicable securities laws (collectively referred to in this Presentation as "forward-looking statements"). All statements other than statements of historical fact are forward-looking statements. The words "believe," "will," "may," "may have," "would," "estimate," "continues," "anticipates," "intends," "plans," "expects," "budget," "scheduled," "forecasts" and similar words are intended to identify estimates and forward-looking statements. Forward-looking statements are not guarantees and involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of NEXA to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Actual results and developments may be substantially different from the expectations described in the forward-looking statements for a number of reasons, many of which are not under our control, among them, the activities of our competition, the future global economic situation, weather conditions, market prices and conditions, exchange rates, and operational and financial risks. The unexpected occurrence of one or more of the abovements may also be influenced by, among others, legal, political, environmental or other risks that could materially affect the potential development of our projects, including risks related to outbreaks of contagious diseases or health crises impacting overall economic activity regionally or globally, as well as risks relating to ongoing or future investigations by local authorities with respect to our business and operations and the conduct of our customers, including the impact to our financial statements regarding the resolution of any such matters.

These forward-looking statements related to future events or future performance and include current estimates, predictions, forecasts, beliefs and statements as to management's expectations with respect to, but not limited to, the business and operations of the Company and mining production our growth strategy, the impact of applicable laws and regulations, future zinc and other metal prices, smelting sales, CAPEX, expenses related to exploration and project evaluation, estimation of mineral reserves and mineral resources, mine life and our financial liquidity.

Forward-looking statements are necessarily based upon a number of factors and assumptions that, while considered reasonable and appropriate by management, are inherently subject to significant business, economic and competitive uncertainties and contingencies and may prove to be incorrect. Statements concerning future production costs or volumes are based on numerous assumptions of management regarding operating matters and on assumptions that demand for products develops as anticipated, that customers and other counterparties perform their contractual obligations, full integration of mining and smelting operations, that operating and capital plans will not be disrupted by issues such as mechanical failure, unavailability of parts and supplies, labor disturbances, interruption in transportation or utilities, adverse weather conditions, and other COVID-19 related impacts, and that there are no material unanticipated variations in metal prices, exchange rates, or the cost of energy, supplies or transportation, among other assumptions.

We assume no obligation to update forward-looking statements except as required under securities laws. Estimates and forward-looking statements refer only to the date when they were made, and we do not undertake any obligation to update or revise any estimate or forward-looking statement due to new information, future events or otherwise, except as required by law. Estimates and forward-looking statements involve risks and uncertainties and do not guarantee future performance, as actual results or developments may be substantially different from the expectations described in the forward-looking statements. Further information concerning risks and uncertainties associated with these forward-looking statements and our business can be found in our annual report on Form 20-F and in our other public disclosures available on our website and filed under our profile on SEDAR (www.sedarplus.ca) and on EDGAR (www.sec.gov).

Nexa's management uses non-IFRS measures such as Adjusted EBITDA, cash cost net of by-products, all in sustaining cash cost net of by-products, among other measures, for internal planning and performance measurement purposes. We believe these measures provide useful information about the financial performance of our operations that facilitates period-to-period comparisons on a consistent basis. Management uses Adjusted EBITDA internally to evaluate our underlying operating performance for the reporting periods presented and to assist with the planning and forecasting of future operating results. Management believes that Adjusted EBITDA is a useful measure of our performance because it reflects our cash generation potential from our operational activities excluding impairment of non-current assets and other miscellaneous adjustments, if any. These measures should not be considered in isolation or as a substitute for profit (loss) or operating profit, as indicators of operating performance, or as alternatives to cash flow as measures of liquidity. Additionally, our calculation of Adjusted EBITDA may be different from the calculation used by other companies, including our competitors in the mining industry, so our measures may not be comparable to those of other companies.

### 2Q24 | Highlights

### 

### **Consistent performance**

- Metal + oxide sales: +7% q-o-q (higher production across operations)
- Mining production: Zinc (-5%) and Lead (-8%) q-o-q, as per Morro Agudo sale.
   Higher Copper (+30%) driven by Cerro Lindo

### FINANCIAL

### Solid performance

- Net revenues: US\$736 million (+27% q-o-q)
- Adj. EBITDA: US\$200 million (+64% q-o-q)
- > Adj. EBITDA margin ~27%
- Lower leverage: 2.72x (vs. 3.75x in 1Q24)

### ARIPUANÃ

### Solid performance: ongoing operation

- Utilization rate: >80% in June (~86% @ P90)
- Higher feed rate + reduced downtime + improved recoveries and concentrate quality = higher production
- Positive Adj. EBITDA: second consecutive quarter and Operating cash flow improving. Positive in June

### GROWTH

**₁**[†

- Cerro de Pasco Integration Project: advancements on all project's work fronts
- > 2024 Exploration program on track

### 

Morro Agudo sale: completed in July

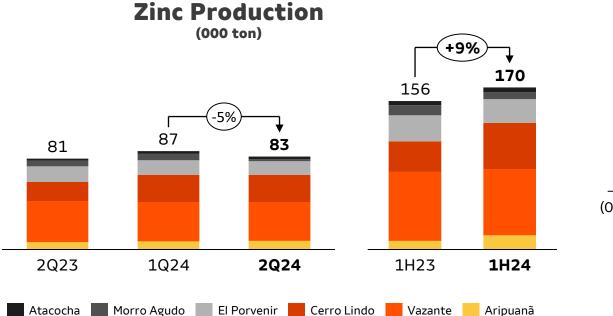

### OTHERS

Liability management: successful issuance of new 10-year notes and tender for part of the notes maturing in '27 and '28: debt profile improvement

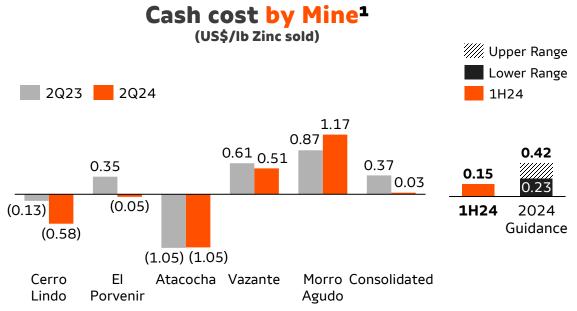

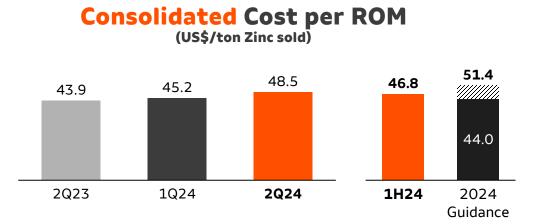

### **Operating Performance | Mining Segment**

- 2Q24 Zn production: +2% y-o-y due to higher Zn grades in Cerro Lindo.
  -5% q-o-q (MA sale). +9% 1H24 vs. 1H23: Aripuanã and Cerro Lindo.
- 2Q24 Consolidated Cash cost: strong reduction q-o-q due to higher byproducts contribution (Cu and Pb prices), and lower TCs. 1H24 below lower range of guidance
- 2Q24 Consolidated Cost ROM: +7% q-o-q due to lower treated ore volumes impacted by MA sale. 1H24 at mid-range of guidance

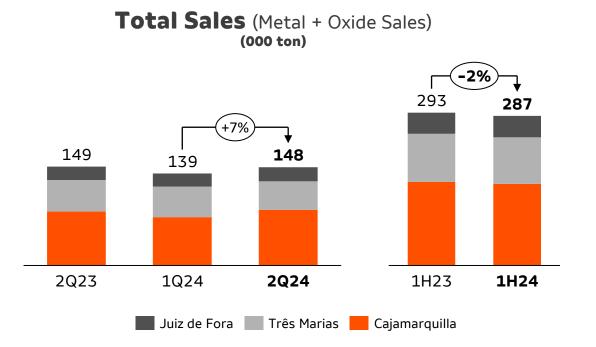

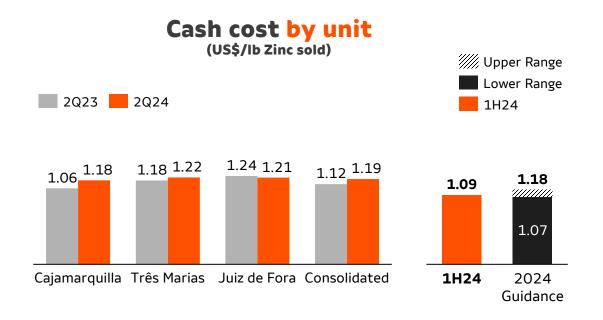

1. 2Q24 consolidated cash cost in US\$/Ib of the Mining Segment and cash cost guidance do not consider Aripuana's cash cost.

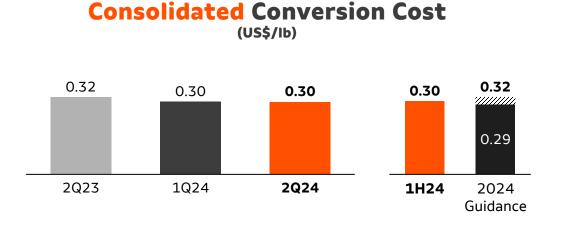

### **Operating Performance | Smelting Segment**

- 2Q24 Metal sales: +7% q-o-q following higher production volumes in Cajamarquilla and Juiz de Fora
- 2Q24 Consolidated Cash cost: higher Zn prices impacting concentrate purchases in 2Q24. 1H24 between lower-mid range of the guidance
- 2Q24 Consolidated Conversion cost: flat q-o-q. 1H24 at lower range of guidance.

### 5

### Aripuanã | Meaningful progress in 2Q24

World-class polymetallic asset. Our 3<sup>rd</sup> flagship mine

### 2Q24 Performance

- ✓ Higher utilization rate: >80% in June (~86% considering P90<sup>1</sup>)
- ✓ Higher treated ore: 133kt in June and 140kt in July (E), (vs. 101kt in March). Capacity of 160kt (expected to be reached in Sept.)
- ✓ **Reduced plant downtime** with significant reduction in corrective downtime (lowest levels)
- ✓ Stable concentrate quality (commercial specification). Metallurgical recoveries further improved
- ✓ **Positive Adj. EBITDA:** Two consecutive quarters.
- ✓ Operating cash flow: 2Q24 close to breakeven, June positive

### Moving forward

- Feed rate: keep increasing while maintaining stability
- **TSF filters:** continue to improve filtration performance to further increase production
- Cost-reduction actions: to continuously improving margin and operating cash flow

### 2Q24 Exploration Program

- **Exploration on track**: focus on Mineral Resources expansion at Massaranduba target
- Drill holes<sup>2</sup> completed in 4Q23 (assay results available in 2Q24): confirmed the continuity of the mineralized zone. Deep and thick mineralization confirmed

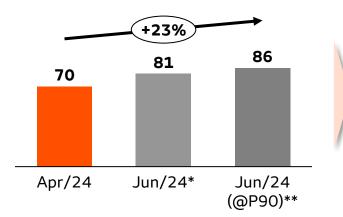

<sup>1.</sup> P90 for June; 2. Drill holes BRAPD000192 and BRAPD000192 (4Q23 drilling with results in 2Q24)

### Aripuanã | Solid operational performance

7

### Plant capacity utilization (%)

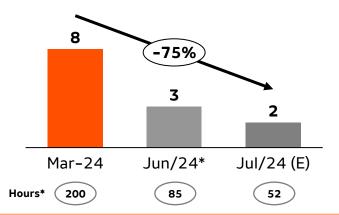

**Higher utilization rate**: >80% in June (~86% considering P90<sup>1</sup>)

Higher feed rate: >90%

End of 2Q24: several days >90%

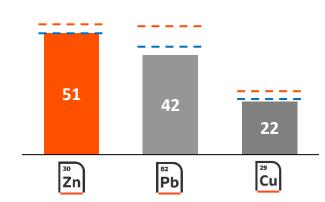

Strong reduction in downtime hours, including corrective hours

### Days of corrective maintenance (#)

### **Concentrate Quality - June (%)<sup>1</sup>**

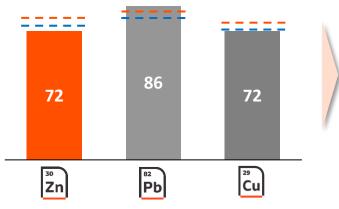

- - Design - - Target

### \* Monthly average. \*\* Considering the P90 for the month. 1. Pb considers numbers as of May/24

Recoveries - June (%)

```
– – Design – – Target
```

### Recoveries: close or above target levels

**Zn to further improve:** higher grades from Link and Ambrex orebodies

**Concentrate qualities**: commercial specification. **At or near target levels** 

### Cerro Pasco Complex Integration | Update

Advancements on technical studies and main work fronts

### Main work fronts: Sconcluded Congoing

Mines
Integration of UG
mines: EP and
ΑΤΑ

• Engineering for the UG interconnection, including infrastructure

• EP: detail engineering to raise tailings storage facilities "TSF"

• ATA: detail engineering to raise tailings storage facilities "TSF 🗸

• Engineering studies for pumping system  $EP \rightarrow ATA$ 

- EP shaft upgrade: to support plant expansion and to improve average operating cost 🔗
- Risk analysis and contingency

### **TSF**

**Increased storage** capacity + pumping system

### **Plant** (upside) Increase EP plant capacity

 Plant engineering assessment and studies on key-routes to improve capacity: crushing C screening area, automation...

### Support

Corporate

structure

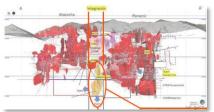

- **Technical report** considering integration: 2P
- Technical Review • Project organizational Chart definition and approval
  - Communities' relations: communities mapping, communication plan, rediscuss commitments etc.
- Environmental study & permits
- Preparation of all MEIA's (Modification of the Environmental Impact Study) and permits 📿
- Overall capex review and update on project financials and feasibility report 🧲

nexa

**Exploration:** increase resources-base and "blue-sky" inventories. Advancements on "Integración" target in 1H24

### 2Q24 | Financial Results

Consolidated Results

Net Revenues<sup>1</sup> (US\$ million) 1,316 1,294 736 627 580 1Q24 2Q24 1H24 2Q23 1H23 +58% **Adjusted EBITDA<sup>2</sup>** 323 (US\$ million) 205 123

2Q24

27%

1H23

16%

1H24

25%

72

2Q23

11%

Adj. EBITDA

Margin

1Q24

21%

- 2Q24 Net Revenues: +27% q-o-q, due to higher prices and higher smelting sales volume, partially offset by lower net premium.
- 2Q24 vs. 2Q23: +17% y-o-y, due to higher prices and higher mining sales volumes, partially offset by lower net premium and slightly lower smelting sales volume.

- 2Q24 Adj. EBITDA: US\$200 million. y-o-y increase primarily driven by higher mine production (incl. ARP), higher by-products contribution, lower variable costs, and higher prices. Adj. EBITDA Margin increased to 27%.
- 2Q24 vs. 1Q24: +64% q-o-q increase, attributed to higher byproducts contribution, higher Zn price, and increased smelting sales volume.

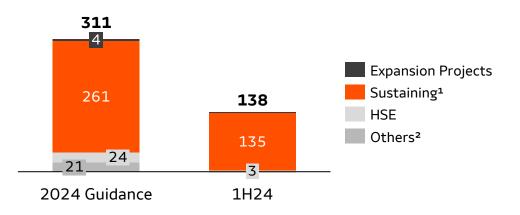

(1) Includes intersegment results; (2) Adjusted EBITDA excludes the items presented in the "Net Income (loss) reconciliation to Adjusted EBITDA" section on our earnings release – US\$112 million in 2Q24, US\$1.7 million in 1Q24 and US\$115 million in 2Q23, totaling US\$113 million in 1H24 and US\$133 million in 1H23.

### 2Q24 | Investments

### **Capital expenditures**

(US\$ million)

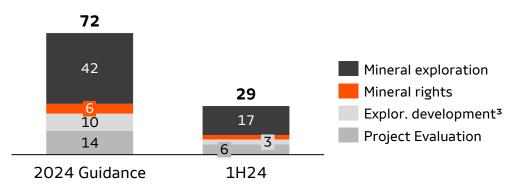

- US\$138 million invested 1H24: mainly sustaining activities (including mining development and TSF).
- 2024 guidance of US\$311 million remains unchanged.

### **Exploration and Project evaluation**

(US\$ million)

- | ~ - | ~ / - | ~ / - | ~ / - | ~ / - | ~ / -

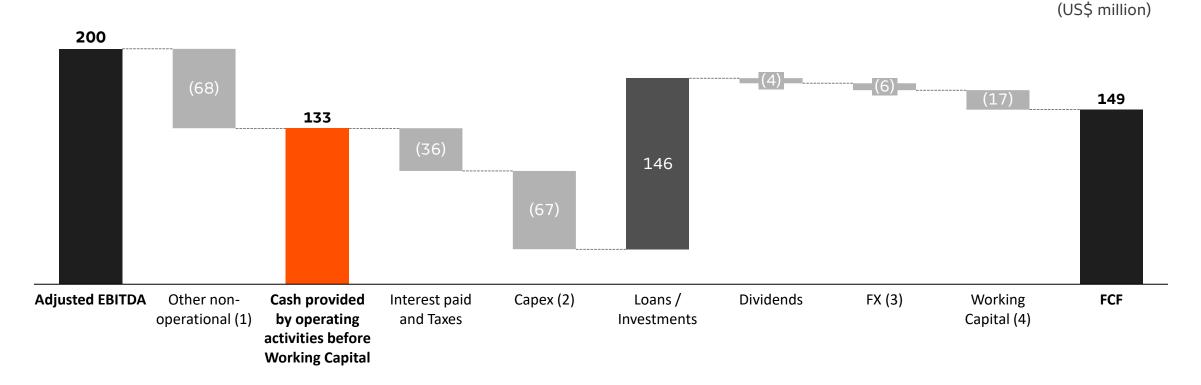

- US\$29 million invested in 1H24: exploration and project evaluation.
- 2024 guidance of US\$72 million remains unchanged.

(1) Investments in tailing disposal and primary mine development are included in sustaining expenses; (2) Modernization, IT, others and Reconciliation to Financial Statements; (3) Exploratory mine development refers to the "secondary" development to support exploration program.

### 2Q24 | Free Cash Flow

Positive FCF in 2Q24: Consistent operational performance and higher Zn price, leading to higher Adj.

EBITDA and Cash from Ops. Working capital evolution (less investment required) and liability

management actions also contributing.

(1) Adjustments to reconcile Adjusted EBITDA to cash provided by operations; (2) "CAPEX" includes Sustaining, HS&E, Tailing Dams, Expansion, Modernization, IT & Others, and Capex Reconciliation to Financial Statements; (3) Foreign exchange effects on cash and cash equivalents; (4) Breakdown available in Financial Statements explanatory note "Changes in operating assets and liabilities".

### Liquidity and Indebtedness

### Debt profile (as of June 30, 2024)

Average debt maturity: 5.9 years @6.61% avg. cost

### Strong liquidity

Leverage reduced to 2.72x (vs. 3.75x in 1Q24): higher LTM Adj. EBITDA and lower net debt

### Liability Management: debt profile improvement

- Apr: US\$600 million 10-year bond issuance at 6.750% coupon. Tender offer for 69.2% and 19.9% of the of 27's and 28's notes, respectively
- Apr: R\$650 million (~US\$130 million) 6-year ESG-linked debenture issuance in Brazil
- June: R\$200 million (~US\$40 million) 8-year ESG credit line in Brazil

Rating agencies	<u>Rating</u>	<u>Outlook</u>
Fitch	BBB-	Stable
S&P	BBB-	Stable
Moody's	Ba2	Negative

Note: In 2Q24 Nexa was in compliance with all of its financial covenants; (1) 5 yrs sustainability-linked US\$320 million Revolving Credit Facility effective on Oct 20<sup>th</sup>, 2023.; (2) Gross debt (US\$1,854 million) minus cash and cash equivalents (US\$462 million), minus financial investments (US\$12 million), plus derivatives (US\$2.2 million), plus Lease Liabilities (US\$9.7 million).

### Net Debt<sup>(2)</sup>/LTM Adj. EBITDA

### **Market Fundamentals**

**Zinc** "silent" participant in energy transition

- Short-term: Tight concentrate market >> lower TCs >> pressure on smelters margin = possibly less metal available. Given current inventory level, this may add positive price support. Expectation of FED action on interest rates, and US elections adding volatility.
- Mid-long term: positive outlook. Support from possible lack of feasible supply to fulfill forecasted demand, expected to be driven by investments in infrastructure, construction, auto sector (boosted by EV sales) and energy transition.

Copper LME price evolution<sup>1</sup> US\$/ton

### **Copper** Key-metal for the "green economy"

- **Short-term:** China's economic stimulus and tight concentrate market. Access to raw material bringing TC to lower levels. Price should remain supported.
- Mid-long term: demand scenario still optimistic, as the metal plays a protagonist role in energy transition. On the supply side, both greenfield and brownfield projects are expected to come online in 2024-2025 however, forecasted future demand would require more supply efforts.

### Nexa | 2024 Focus

**Aripuanã:** solid and consistent operational performance  $\rightarrow$  meaningful progress. Moving forward: focus on further increasing production, improving feed rate and tailings filters performance. Cost-reduction to improve margin and cash generation

**Growth:** Pasco integration progressing towards the approval process. Keep assessing long-term growth options

**Exploration:** focus on LOM extension (positive results also in 2Q24)

**Keep ESG strategy active:** To constantly tracking progress toward achieving our public commitments. Keen eye on safety to further improve our solid safety system

**Strengthening balance sheet:** liability management and deleveraging. Keep strong liquidity, continuously improving debt profile and seek conservative leverage ratios.

# thankyou
