## Important information concerning this presentation

Disclaimer

This presentation, prepared by Nexa Resources S.A. (herein referred to as "Nexa Resources", "Nexa", or the "Company"), is solely for informational purposes. Disclosure of this presentation, its contents, extracts or abstracts to third parties is not authorized without express and prior written consent from the Company.

This Presentation contains certain forward-looking information and forward-looking statements as defined in applicable securities laws (collectively referred to in this Presentation as "forward-looking statements"). All statements other than statements of historical fact are forward-looking statements. The words "believe," "will," "may," "may have," "would," "estimate," "continues," "anticipates," "intends," "plans," "expects," "budget," "scheduled," "forecasts" and similar words are intended to identify estimates and forward-looking statements. Forward-looking statements are not guarantees and involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of NEXA to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Actual results and developments may be substantially different from the expectations described in the forward-looking statements for a number of reasons, many of which are not under our control, among them, the activities of our competition, the future global economic situation, weather conditions, market prices and conditions, exchange rates, and operational and financial risks. The unexpected occurrence of one or more of the abovements may also be influenced by, among others, legal, political, environmental or other risks that could materially affect the potential development of our projects, including risks related to outbreaks of contagious diseases or health crises impacting overall economic activity regionally or globally, as well as risks relating to ongoing or future investigations by local authorities with respect to our business and operations and the conduct of our customers, including the impact to our financial statements regarding the resolution of any such matters.

These forward-looking statements related to future events or future performance and include current estimates, predictions, forecasts, beliefs and statements as to management's expectations with respect to, but not limited to, the business and operations of the Company and mining production our growth strategy, the impact of applicable laws and regulations, future zinc and other metal prices, smelting sales, CAPEX, expenses related to exploration and project evaluation, estimation of mineral reserves and mineral resources, mine life and our financial liquidity.

Forward-looking statements are necessarily based upon a number of factors and assumptions that, while considered reasonable and appropriate by management, are inherently subject to significant business, economic and competitive uncertainties and contingencies and may prove to be incorrect. Statements concerning future production costs or volumes are based on numerous assumptions of management regarding operating matters and on assumptions that demand for products develops as anticipated, that customers and other counterparties perform their contractual obligations, full integration of mining and smelting operations, that operating and capital plans will not be disrupted by issues such as mechanical failure, unavailability of parts and supplies, labor disturbances, interruption in transportation or utilities, adverse weather conditions, and other COVID-19 related impacts, and that there are no material unanticipated variations in metal prices, exchange rates, or the cost of energy, supplies or transportation, among other assumptions.

We assume no obligation to update forward-looking statements except as required under securities laws. Estimates and forward-looking statements refer only to the date when they were made, and we do not undertake any obligation to update or revise any estimate or forward-looking statement due to new information, future events or otherwise, except as required by law. Estimates and forward-looking statements involve risks and uncertainties and do not guarantee future performance, as actual results or developments may be substantially different from the expectations described in the forward-looking statements. Further information concerning risks and uncertainties associated with these forward-looking statements and our business can be found in our annual report on Form 20-F and in our other public disclosures available on our website and filed under our profile on SEDAR (www.sedarplus.ca) and on EDGAR (www.sec.gov).

Nexa's management uses non-IFRS measures such as Adjusted EBITDA, cash cost net of by-products, all in sustaining cash cost net of by-products, among other measures, for internal planning and performance measurement purposes. We believe these measures provide useful information about the financial performance of our operations that facilitates period-to-period comparisons on a consistent basis. Management uses Adjusted EBITDA internally to evaluate our underlying operating performance for the reporting periods presented and to assist with the planning and forecasting of future operating results. Management believes that Adjusted EBITDA is a useful measure of our performance because it reflects our cash generation potential from our operational activities excluding impairment of non-current assets and other miscellaneous adjustments, if any. These measures should not be considered in isolation or as a substitute for profit (loss) or operating profit, as indicators of operating performance, or as alternatives to cash flow as measures of liquidity. Additionally, our calculation of Adjusted EBITDA may be different from the calculation used by other companies, including our competitors in the mining industry, so our measures may not be comparable to those of other companies.

## 1Q24 | Highlights

#### **Consistent operating performance**

- Mining production: higher zinc, copper and lead production y-o-y
- > Metal sales: -3% y-o-y (lower production in Cajamarquilla  $\rightarrow$  scheduled maintenance)
- > Smelting and mining cash costs: below and close to lower range of guidance, respectively
- **Financial Performance:** still challenging price environment + Aripuanã ramp-up + working capital seasonality
  - Net revenues: US\$580 million
  - Adjusted EBITDA: US\$123 million (+17% q-o-q)

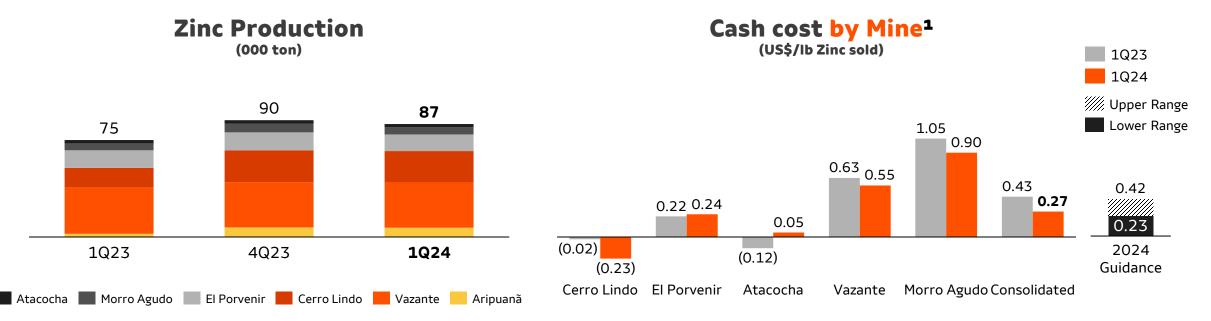

#### **1** Aripuanã ramp-up

- Critical equipment replaced as planned
- Utilization rate ~70% (April). Downtime hours reducing. Higher recoveries and concentrate quality further improved
- > Ramp-up expected to be concluded in mid-2024

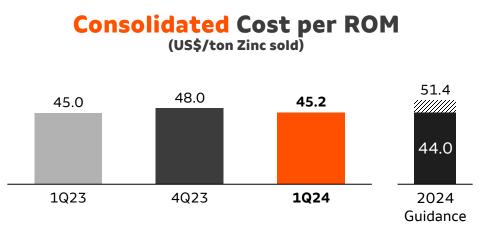

#### Others

- Cerro de Pasco integration: Mineral Reserves increased in 2023 (supported by advancements on the technical studies)
- Morro Agudo sale: important step on portfolio optimization. Focus on cash generation and capital allocation
- 2023 MRMR: +10% Reserves (vs 2022) net of depletion; +4% of Zinc content in inferred Resources mainly driven by Aripuanã

## **Operating Performance | Mining Segment**

- **1Q24 Zinc production: +17%** (vs. 1Q23). Driven by higher treated ore volumes, higher zinc head grades and the ramp-up of Aripuanã.
- **1Q24 Consolidated Cash cost: 37% lower** y-o-y mainly due to lower TCs and higher production volumes.
- 1Q24 Consolidated Cost ROM: -6% q-o-q due to lower operating costs. Flat y-o-y.

## Aripuanã | Update (1/3)

World-class, long-life underground polymetallic mine – our 3<sup>rd</sup> flagship mine

#### Ramp-up Status 1Q24

- ✓ Focus on critical equipment replacement
- ✓ Metallurgical process improved: higher recoveries and concentrate quality
- ✓ **Current challenge**: TSF filters → adjust filtering performance do support production increase

#### **1Q24** Performance

- Utilization rate averaged 57% (~70% April). 3-days stoppage to address equipment replacement, peak of rain season and few working days in 1Q24. On track to finalize ramp up by mid-2024.
- Increased production in Copper, Lead and Silver. Zinc flat q-o-q
- Zn, Pb and Cu recoveries and concentrates grades/quality improved significantly. Keep focusing on plant stabilization

#### **1Q24 Exploration**

 Results from drill holes<sup>1</sup> in Babaçu: confirmed the continuity of mineralization with high polymetallic contents (e.g. 20.0m with 12.24% Zn, 4.03% Pb, 109.36g/t Ag)

Increased Mineral Reserves base

10% overall increase in Mineral Reserves (Mt) net of 2023 depletion. 14% increase in Zn Reserves. Driven by:

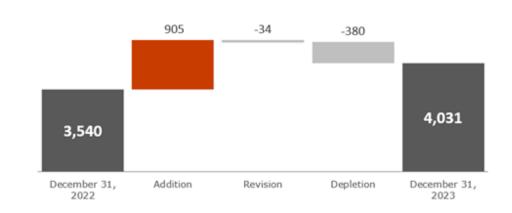

- > Infill and brownfield positive results from drilling activities at Aripuanã;
- Re-inclusion of the Atacocha Mineral Reserves (underground and open pit) driven by the positive results from the Cerro Pasco Integration Project.

Consolidated Results

## **Adjusted EBITDA<sup>2</sup>**

(US\$ million)

- 1Q24 Net Revenues: -13% y-o-y due to lower zinc prices, lower net premium and lower smelting sales volumes, partially offset by higher mining sales volumes.
- 1Q24 vs. 4Q23: -8% due to slightly lower net premium and lower smelting sales volume.

- 1Q24 Adj. EBITDA: US\$123 million, -8% y-o-y mainly due to lower zinc prices and lower smelting sales volumes.
- **1Q24 vs. 4Q23: +17%** due to lower costs, lower mineral exploration and project evaluation expenses.

(1) Includes intersegment results; (2) Adjusted EBITDA excludes the items presented in the "Net Income (loss) reconciliation to Adjusted EBITDA" section on our earnings release – US\$1.7 million in 1Q24, US\$101 million in 4Q23 and US\$18 million in 1Q23

## 1Q24 | Investments

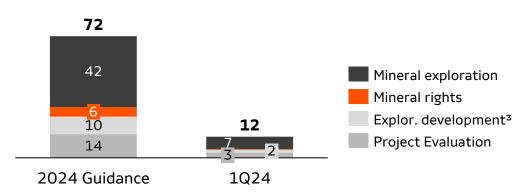

#### 

- US\$74 million invested 1Q24: mainly sustaining activities (including mining development and TSF).
- 2024 guidance of US\$311 million remains unchanged.

## Exploration and Project evaluation

(US\$ million)

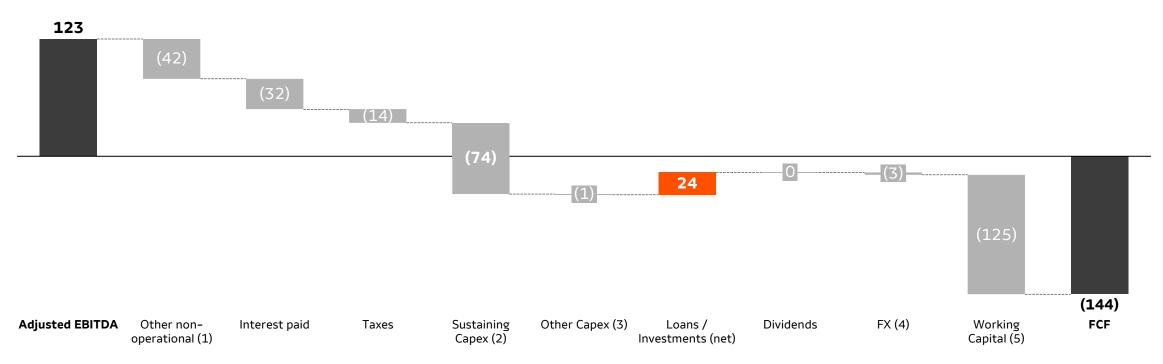

- US\$12 million invested in 1Q24: exploration and project evaluation.
- 2024 guidance of US\$72 million remains unchanged.

(1) Investments in tailing disposal and primary mine development are included in sustaining expenses; (2) Modernization, IT, others and Reconciliation to Financial Statements; (3) Exploratory mine development refers to the "secondary" development to support exploration program.

## 1Q24 | Free Cash Flow

FCF in 1Q24: negatively impacted by expected seasonality in working capital behavior.

(1) Adjustments to reconcile Adjusted EBITDA to cash provided by operations; (2) "Sustaining CAPEX" includes Sustaining, HS&E and Tailing Dams; (3) "Other CAPEX" includes Expansion, Modernization, IT, Others and Reconciliation to Financial Statements (detailed breakdown available in our Earnings Release); (4) Foreign exchange effects on cash and cash equivalents; (5) Breakdown available in Financial Statements explanatory note "Changes in operating assets and liabilities".

## **Market Fundamentals**

#### jan/23

apr/24

#### <u>Zinc</u>

- **Short-term**: support from the Chinese economy stimulus and tight concentrate market (lowering TCs and squeezing smelters margin).
- Mid-long term: outlook remains positive, supported by possible lack of feasible supply to fulfill forecasted demand, which is expected to be driven by investments in infrastructure, construction, the auto sector (boosted by EV sales) and energy transition.

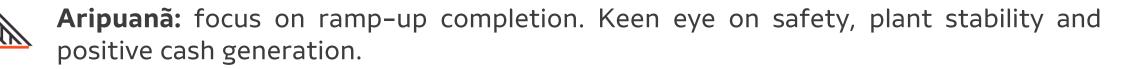

#### Copper

- **Short-term:** China's economy recovery and global tensions causing volatility. Any positive sign should put upward pressure on prices.
- Mid-long term: demand scenario still optimistic, as the metal plays an important role in energy transition. On the supply side, both greenfield and brownfield projects are expected to come online in 2024–2025 however, forecasted future demand would require more supply efforts.

<sup>&</sup>lt;sup>(1)</sup> Based on daily prices until April 29<sup>th</sup>, 2024, as reported by the London Metal Exchange

## Nexa | 2024 Focus

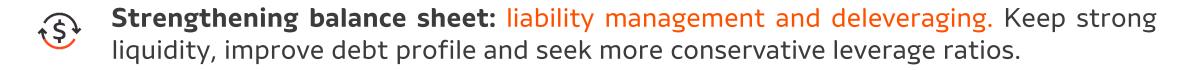

**Growth** (Pasco integration): progressing towards the approval process.

**Exploration:** keep focusing on LOM extension (positive results already seeing in 1Q24) and long-term growth options.

**Keep ESG strategy active:** important advancements in 2023. To constantly tracking progress toward achieving our public commitments.
